Human Zoos offers a fascinating, sobering and macabre tour of man's exploitation of man--that is, Western man's exploitation of non-Western men and women--as recorded throughout the early history of photography, from the 1860s to the 1930s and the invention of "humane exhibiting" of nonwhite persons. Freak shows, the circuses of Buffalo Bill and P.T. Barnum and European colonial exhibitions provided the occasions for most of these images, several of which were incorporated into posters, postcards and other ephemera, designed with an improbable jauntiness. Human Zoos traces the evolution of such paradigmatic conceptions as "specimen," "savage" and "native" for the designation of peoples as various as Native Americans, Asians and Africans from all corners of the continent. As horrific and compelling as it is brilliantly researched and compiled, this volume unflinchingly surveys the very recent history of the West's arrogant abuse of those deemed to fall outside its brutal terms of civilization.

The Chinese-speaking Muslims have for centuries been an inseperable but anomalous part of Chinese society--Sinophone yet incomprehensible, local yet outsiders, normal but different. Long regarded by the Chinese government as prone to violence, they have challenged fundamental Chinese conception of Self and Other and denied the totally transforming power of Chinese civilization by tenaciously maintaining connectios with Central and West Asia as well as some

cultural differences from their non-Muslim neighbors. Familiar Strangers narrates a history of the Muslims of northwest China, at the intersection of the frontiers of the Mongolian-Manchu, Tibetan, Turkic, and Chinese cultural regions. Based on primary and secondary sources in a variety of languages, Familiar Strangers examines the nature of ethnicity and periphery, the role of religion and ethnicity in personal and collective decisions in violent times, and the complexity of belonging to two cultures at once. Concerning itself with a frontier very distant from the core areas of Chinese culture and very strange to most Chinese, it explores the influence of language, religion, and place on Sino-Muslim identity.

Gossip Girl meets the Gilded Age in this delicious and compelling novel, the third in the New York Times bestselling series from author Anna Godbersen. In the thrilling third installment of Anna Godbersen's bestselling Luxe series, Manhattan's most envied residents appear to have everything they desire: Wealth. Beauty. Happiness. But sometimes the most practiced smiles hide the most scandalous secrets. Jealous whispers. Old rivalries. New betrayals. This is Manhattan, 1899. Two months after Elizabeth Holland's dramatic homecoming, Manhattan eagerly awaits her return to the pinnacle of society. When Elizabeth refuses to rejoin her sister Diana's side, however, those watching New York's favorite family begin to suspect that all is not as it seems behind the stately doors of No. 17 Gramercy Park South. Farther uptown, Henry and Penelope Schoonmaker are the city's most celebrated couple. But despite the glittering diamond ring on Penelope's finger, the newlyweds share little more than scorn for each other. And while the newspapers call Penelope's social-climbing best friend, Carolina Broad, an heiress, her fortune—and her fame—is anything but secure. "Mystery, romance, jealousy, betrayal, humor, and gorgeous, historically accurate details. I

couldn't put The Luxe down!" —Cecily von Ziegesar, author of the #1 New York Times bestselling Gossip Girl series

From celebrated translator of the Hebrew Bible Robert Alter, the "groundbreaking" (Los Angeles Times) book that explores the Bible as literature, a winner of the National Jewish Book Award. Renowned critic and translator Robert Alter's The Art of Biblical Narrative has radically expanded our view of the Bible by recasting it as a work of literary art deserving studied criticism. In this seminal work, Alter describes how the Hebrew Bible's many authors used innovative literary styles and devices such as parallelism, contrastive dialogue, and narrative tempo to tell one of the most revolutionary stories of all time: the revelation of a single God. In so doing, Alter shows, these writers reshaped not only history, but also the art of storytelling itself.

Essai d'histoire locale by Djiguiba Camara John Wiley & Sons

Salt comes from the north, gold from the south, but the word of God and the treasures of wisdom are only to be found in Timbuktu." 15th-century Malian proverb. In a joint project between South Africa and Mali, a library to preserve more than 200 000 Arabic and West African manuscripts dating from the 13th to the 19th centuries is currently under construction. It is the first official cultural project of the New Partnership for Africa's Development (Nepad), the socio-economic development plan of the African Union, and when the library is built, the cultural role of Timbuktu will be revived, as it becomes the safehaven for the treasured manuscripts. The manuscripts prove that Africa had a rich legacy of written history, long before western colonisers set foot on the continent. This volume, authored by leading international scholars, begins to sketch the 'meaning' of Timbuktu within the context of the intellectual history of West Africa, in particular, and of the African continent, in general. The book covers four broad areas: Part I provides an introduction to the region; outlines what archaeology can tell us of its history, examines the paper and various calligraphic styles used in the manuscripts; and explains how ancient institutions of scholarship functioned. Part II begins to analyse what the manuscripts can tell us of African history. Part III offers insight into the lives and works of just a few of the many scholars who achieved renown in the region and beyond. Part IV provides a glimpse into Timbuktu's libraries and private collections. Part V looks at the written legacy of the eastern half of Africa, which like that of the western region, is often ignored. A fascinating read for anyone who wishes to gain an understanding of the aura of mystique and legend that surrounds Timbuktu. The Meanings of Timbuktu strives to contextualise and clarify the importance of efforts to preserve Timbuktu's manuscripts for Mali, for Africa and for the intellectual world."--Abstract

With its breadth and depth of coverage, as well as 530 black-and-white and 32 color illustrations, the encyclopedia continues to be a standard international reference.

This important cultural analysis tells two stories about food. The first depicts good food as democratic. Foodies frequent 'hole in the wall' ethnic eateries, appreciate the pie found in working-class truck stops, and reject the snobbery of fancy French restaurants with formal table service. The second story describes how food operates as a source of status and distinction for economic

and cultural elites, indirectly maintaining and reproducing social inequality. While the first storyline insists that anybody can be a foodie, the second asks foodies to look in the mirror and think about their relative social and economic privilege. By simultaneously considering both of these stories, and studying how they operate in tension, a delicious sociology of food becomes available, perfect for teaching a broad range of cultural sociology courses.

Hugh Clapperton was one of the first British explorers to enter the central Sahara, but his journals have never been published before. Recently discovered in South Africa, they show him to be one of the most sensitive and sympathetic travellers, his observations untainted by any sense of moral superiority. Hugh Clapperton has a sharp eye for detail, be it wind-stiller magicians, the effect of the evil eye or slave skeletons clustered around well heads. He hears musicians in jackal-headed masks and bagpipes in a wedding procession. He has a gift for friendship, feasting locals, offering himself to women and delighting in the company of both dignified tribal sheikhs and fearsome renegades like Mustapha the Red.

Providing an in-depth comparative study of democracy formation, Gellar traces Senegal's movement from a pre-colonial aristocratic order towards a modern democratic political order. Inspired by Tocqueville's methodology, he identifies social equality, ethnic and religious tolerance, popular participation in local affairs, and freedom of association and the press as vital components of any democratic system. He shows how centralized state structures and monopoly of political power stifled local initiative and perpetuated neo-patrimonial modes of governance.

What accounts for the persistence and spread of "commoning," the irrepressible desire of people to collaborate and share to meet everyday needs? How are the more successful projects governed? And why are so many people embracing the commons as a powerful strategy for building a fair, humane and Earth-respecting social order? In more than fifty original essays, *Patterns of Commoning* addresses these questions and probes the inner complexities of this timeless social paradigm. The book surveys some of the most notable, inspiring commons around the world, from alternative currencies and open design and manufacturing, to centuries-old community forests and co-learning commons - and dozens of others. David Bollier (www.bollier.org) is an American author, activist and independent scholar who has studied the commons for nearly twenty years. Silke Helfrich (commonsblog.wordpress.com) is a German author and independent activist of the commons who blogs at www.commonsblog.de, and cofounder of the Commons-Institut in Germany. With Michel Bauwens, Bollier and Helfrich are cofounders of the Common Strategies Group. For more information, go to the book's website, *Patterns of Commoning* (www.patternsofcommoning.org)
