épistémologie juridique** Taylor &  
Francis

This book traces the intellectual life of the Kingdom of Italy, the area in which humanism began in the mid thirteenth century, a century or more before exerting its influence on the rest of Europe. Covering a period of over four and a half centuries, this study offers the first integrated analysis of Latin writings produced in the area, examining not only religious, literary, and legal texts. Ronald G. Witt characterizes the changes reflected in these Latin writings as products of the interaction of thought with economic, political, and religious tendencies in Italian society as well as with intellectual influences coming from abroad. His research ultimately traces the early emergence of humanism in northern Italy in the mid thirteenth century to the precocious development of a lay intelligentsia in the region, whose participation in the culture of Latin writing fostered the beginnings of the intellectual movement which would eventually revolutionize all of Europe.

This book is related to the development of intraregional commercial exchanges in the region of the Indian Ocean. This issue is addressed from an economic as well as from a legal point of view. The

contributions, in English and French, aim to present an overview of the economic, customs-related, technical, legal and cultural restraints that hinder the creation of a free trading area. Cet ouvrage est consacré au développement des échanges commerciaux intrarégionaux dans la région de l'Océan Indien. Cette question est examinée sous un angle politique, économique et juridique. Les différentes contributions, en anglais et en français, visent à établir un état des lieux des freins économiques, douaniers, techniques, juridiques et culturels à la création d'un espace de libre échange.

Procedural law is of vital importance in Europe. Nowadays, people and companies that intend to settle in Europe still are being confronted with a huge amount of different national procedures and a hallucinating number of regulations in the procedural field. Just consider the different procedural costs, strict time limits, prescription periods, notices of appeal, . Unlike other branches of law, historical or cultural impediments to the harmonisation of European procedural laws play a far more inferior role than technical aspects, Eventually, all comes down to the question: How can one lead a case to a result on a fast way and without high costs? In this publication, Europe's leading proceduralists share their views on the approximation of procedural laws. A specific in-depth analysis is made concerning enforcement, summary proceedings, fast-track proceedings and complex litigation. In 4 languages: English, Dutch, French and German.

**Althusser and Law** Taylor & Francis

This book provides an unparalleled comparative analysis of two "hot topics" in the field of antitrust and unfair competition laws with regard to a number of key countries. The first part of the book examines the consistency and compatibility of transactional resolutions of antitrust proceedings (such as settlement procedures, leniency programmes and commitments) with due process and the fundamental rights of the parties. This is a particularly important topic, given the widespread adoption of these procedures by anti-

trust authorities worldwide. The individual chapters consider how the leniency, settlement and commitments procedures have developed across a range of jurisdictions, and discuss the extent to which checks and balances have been applied in those national procedures in order to safeguard the fundamental rights of the parties involved. A detailed international report identifies general trends and highlights the differences between and most interesting features of national regulations. The second part of the book gathers contributions from various jurisdictions on the unfair competition-related question of the online exhaustion of IP rights. As commerce is increasingly moving online, the respective chapters consider the extent to which exhaustion and similar concepts have adapted to these rapid changes. The comprehensive and insightful international report brings together these reflections by comparing various national positions. The book also includes the resolutions passed by the General Assembly of the LIDC following a debate on each of these topics, which include proposed solutions and recommendations. The international League of Competition Law (LIDC) is a long-standing international association that focuses on the interface between competition law and intellectual property law, including unfair competition issues.

**Droit Uniforme International Dans la Pratique** Springer

This volume of essays addresses some of the most significant issues of contemporary international law. It particularly focuses on questions relating to international humanitarian law, the law of the sea, human rights, the use of force, international environmental law, and the settlement of international disputes. Recent developments in some

other issues of international law such as State immunity and State responsibility are also dealt with. The Work contains a number of articles in French and is offered as a tribute to the prominent Iranian Professor of International Law, Djamchid Momtaz, on the occasion of his 75th birthday.

This third volume by André Gouron brings together a widely scattered set of articles on Roman law in medieval France and its influence. The first group of papers is concerned with the medieval history of Roman law itself, while the two following sections look at how it contributed to the (perfectionnement) of canon law, on the one hand, and to the emergence of customary law on the other. As the author would see it, there are the three aspects of the inexorable advance, if not of a science, at least of a clear effort towards logical clarification, which revolutionised law in the 12th and 13th centuries, first in southern Europe, but soon in the west and north too. At the same time, these studies help reveal some of the complex network of intellectual links that underlay these developments.

This fourth collection by Professor André Gouron presents a set of twenty studies on jurisprudence, jurists and legal practice in the 12th and 13th centuries. The focus is on the schools and traditions of Bologna and in France, but the coverage includes canon, Roman and customary law. The first part deals with theories diffused by the jurists of Bologna and France and the literary

genres in which they expressed these theories, particularly on questions of presumptions, proof, and illicit conditions. In the second section the author looks at some of the persons involved in the juridical renaissance of this period, and at some of the effects of the legal doctrines being taught on royal legislation, procedure, the fiscal system, and urban autonomy. Ce volume - le quatrième de l'auteur dans cette collection - réunit vingt articles du professeur Gouron. Onze de ces articles forment une première partie, consacrée aux théories diffusées par les juristes de Bologne ou de France et aux genres littéraires à travers lesquels s'expriment ces théories, notamment en matière de présomptions, de preuve par témoins ou de conditions illicites. La seconde partie du volume rassemble neuf articles qui traitent de divers acteurs, célèbres ou obscurs, de la renaissance juridique, ainsi que des effets des doctrines enseignées par les romanistes et les canonistes sur la législation royale, la procédure, le système fiscal et l'autonomie urbaine.

*The History and Power of Writing*  
Bruylant

Continuing on to the electronic revolution, Martin's account takes in the changes wrought on writing by computers and electronic systems of storage and communication, and offers surprising insights into the influence these new technologies have had on children born into the computer age. The power of writing to influence and dominate is, indeed, a central theme in this history, as Martin explores the processes by which the written word has gradually imposed its logic on society over four thousand years. The summation of decades of study by one of the world's great scholars on the

subject, this fascinating account of writing explains much about the world we inhabit, where we uneasily confer, accept, and resist the power of the written word.

The Academy is an institution for the study and teaching of public and private international law and related subjects. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. *Juristes et droits savants: Bologne et la France Médiéval* Martinus Nijhoff Publishers

Le droit de la famille, dans sa dimension civiliste, fortement ancré dans les cultures nationales des États membres, est une matière qui ne relève pas, en principe, du droit de l'Union européenne. Pourtant, il n'est plus possible d'affirmer que la matière échappe dans son entier au droit de l'Union. De nombreux aspects de la famille sont sous influence européenne, au point que l'on voit se dessiner les contours d'une « famille européenne ». L'ouvrage propose de mettre en lumière l'acquis européen en matière de droit de la famille, au prisme du droit matériel (citoyenneté européenne, politique sociale de l'Union, fonction publique européenne...), comme du droit international privé. Le droit de la famille de l'Union s'identifie alors

comme un «droit spécial» complétant la diversité des droits nationaux de la famille. Sa signification théorique et politique dans l'Union est débattue par les auteurs, autant que son devenir. Loin de demeurer fragmentaire à côté des droits nationaux des États membres, il a probablement vocation à se densifier pour offrir aux citoyens et résidents européens un droit commun de la famille au sein de l'Union. Family law, with its civil law tradition, and strong roots in the national cultures of the Member States, does not normally fall within the scope of European law. However, it is no longer possible to argue that family law is outside European law entirely. There are many aspects of the family which are subject to European influence, to the point that the outlines of a «European family» are starting to emerge. This book is intended to highlight the European experience of family law and its substantive (i.e. European citizenship, EU social policy, EU civil service...) and private international law aspects. Union law therefore contains a form of «special» family law which is shared between the Member States and supplements their national family laws. Its theoretical and political importance in the Union, as well as its future, are discussed by the authors. Far from remaining fragmented alongside the national laws of Member States, it will likely develop to offer European citizens and residents a common family law within the EU.

The contributions to this volume are concerned with the Roman law of antiquity in its broadest sense, covering both private and public law from the Roman Republic to the Byzantine era, including legal papyrology. They also

examine the reception of Roman law in Western Europe and its colonies (specifically the Dutch East Indies) from the Middle Ages to the promulgation of the German Bürgerliche Gesetzbuch in 1900. They reflect the wide interests of Professor Boudewijn Sirks, whom the volume honours on the occasion of his retirement and whose work and career have transcended frontiers and nations.

Les étudiants en droit fréquenteront- ils toujours les amphithéâtres, ou apprendront ils bientôt exclusivement par des vidéos et par des MOOCs ? Les avocats, les notaires, les juristes d'entreprise rédigeront-ils encore des contrats eux-mêmes, ou seront-ils remplacés par des robots ? La justice telle que nous la connaissons va-t-elle devenir entièrement automatisée, les justiciables saisissant non plus un avocat mais une plate-forme proposée par une start-up du droit ? Le Parlement votera-t-il encore la loi, ou celle-ci sera-t-elle rédigée par la voie du crowdsourcing ? La loi Macron participe-t-elle à l'uberisation du droit ? Et quelle peut être l'influence de la France et du français dans la bataille internationale du droit ? Plus qu'une évolution, le droit vit une révolution, et elle n'est pas seulement due aux innovations technologiques. Le développement du numérique et de l'internet joue bien sûr un rôle important, mais la manière dont fonctionne aujourd'hui l'enseignement supérieur et la complexification du droit, sans oublier les nouvelles exigences des clients des professionnels du droit, sont autant de phénomènes qui transforment

profondément la manière dont nous apprenons le droit, la manière dont nous le pratiquons, et plus largement la manière dont nous le vivons. Ce droit moderne, c'est le droit 2.0, auquel est consacré ce livre.

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

The Collection of Procedural Decisions in ICC Arbitration 1993-1996 contains the procedural decisions rendered by ICC arbitrators, published in a single volume for the first time. In addition to providing

procedural decisions in their original language, this book includes commentaries on the decisions, key words in both English and French, and explanatory notes of interest in English. Two useful indexes guide the reader to points of specific interest. The analytical index, provided in both English and French, is based on terminology used in decisions and case notes, while the table of cross-referenced cases provides citations to the *Journal du Droit International*. A bibliography and tables containing the judicial and arbitral authorities cited provide useful reference information. The collection also includes the ICC and UNCITRAL Arbitration Rules, as well as the IBA Rules on Evidence, providing the reader with the full range of materials regarding the conduct of international arbitration. This collection is an indispensable reference work for anyone seeking to be informed about the conduct of international arbitration. Invaluable for all international arbitration practitioners, this book offers the reader solutions to pitfalls in arbitration proceedings by the most talented international arbitrators.

Fifty years after the conclusion of the Treaties of Rome (25 March 1957) and the foundation of the European Economic Community, Brussels has become a political world city and international capital with global influence. The acts of the interuniversity and international colloquium, held in Brussels on 18 and 19 December 2006, present a general outline of the research results and 26 contributions, based on original research and divided into three parts. The first part focuses on Brussels' position in the 'world city network'. How has Brussels grown into the European

and international 'capital' we know today? What exactly is its legal status as the European 'Capital'? Of course, other aspects such as the relationship between the Brussels-Capital Region and the Europe of Regions and the role of Brussels as the place for lobbying the European Union are also examined. The second part focuses on the interaction between the European institutions and Brussels. What are the socioeconomic, demographic, political and linguistic effects of their presence? Finally, a number of pressure points and areas of tension are analysed. How is Brussels 'imagined' or represented as the capital of Europe? And what is the impact of the European presence on urban planning and security policy? -- Back cover.

**Egitto oggi** Cambridge University Press  
En 1848, l'abolition de l'esclavage, par la Seconde République, a libéré des chaînes plus de 250 000 esclaves. Par l'application du suffrage universel, ceux

des Antilles, de la Guyane et de la Réunion ont, en théorie, été dotés des mêmes droits civils et électoraux que tous les citoyens (masculins) de la métropole. La réalité a été fort différente. Ces citoyens colonisés sont longtemps restés soumis à un régime d'exception. Au Parlement, à Paris, leurs députés votaient des lois qui ne leur étaient pas applicables ! Le pouvoir exécutif et les gouverneurs locaux s'occupaient de leur sort. Comment, dans un pays construit sur une citoyenneté que l'on prétend universaliste et abstraite – et qui ne cesse de le répéter – a-t-on pu s'accommoder d'une telle contradiction ? L'histoire que nous raconte ce livre est celle de luttes et de rapports de forces. Une histoire de violences dont les anciens esclaves sont les protagonistes anonymes. Dans une société française dite « postcoloniale », l'auteur invite à méditer les fondements complexes de l'articulation entre citoyenneté, question sociale, histoire et « race ».

*Le droit autrement* Presses Université Laval

Il convient d'appeler au développement de l'épistémologie juridique. Nous défendons le besoin d'une épistémologie juridique forte pour clarifier autant que possible notre façon d'envisager et d'écrire la science du droit, la théorie du droit, la doctrine du droit ou encore une quelconque écriture se rapportant à notre attachement au droit moderne. Il s'agit d'une tâche d'autant plus

importante que toute théorisation est nulle et malvenue sans un ancrage concret dans la réalité des individus qui acceptent de s'en servir en tant que moyen de droit pour résoudre leurs différends, leurs hostilités et leurs désaccords. Le problème aujourd'hui ce sont les pseudosciences avec leurs avancements, leurs séductions et leurs aveuglements ! Pendant longtemps le monde juridique a pu contempler à distance le malheur des autres. Avec une fausse assurance, nous avons cru que cela n'arriverait jamais dans les facultés de droit, ni dans le domaine de la recherche juridique ni dans la science du droit. Désarmés par cette sérénité, nous avons, hélas, baissé la garde, abaissé notre vigilance pour un jour nous retrouver dans la même obscurité que les sciences humaines et sociales, face à l'obscurantisme, aux faux-fuyants théoriques, aux pseudosciences prétendant parler « au nom du droit ». En ce qui nous concerne, nous émettons un « no pasarán », nous réaffirmons notre aversion profonde à l'égard de toutes les pseudosciences. C'est une insulte à l'intelligence juridique — d'où le titre de notre livre — de s'engager dans toute entreprise pseudoscientifique, dans toute activité qui n'a guère d'autre aboutissement que d'égarer l'esprit et d'affaiblir et de nullifier « le juridique » pour le peuple, pour ceux qui ont le plus besoin que le système juridique et judiciaire fonctionne adéquatement et en toute « justice ».
