This book provides important information about the development of psychology as a discipline in Asia. Several research papers related to organizational psychology and the influence of psychology on quality of life in countries throughout Asia are included. The papers which appear herein were originally presented at the 3rd Convention of the Asian Psychological Association in Darwin, Australia during July, 2010; the 4th Convention of the Asian Psychological Association in Jakarta, Indonesia during July, 2012; and the International Conference on Industrial and Organizational Psychology at the National Institute of Psychology in Islamabad, Pakistan during April, 2012. The information presented here provides a valuable window into how psychology is taught and practiced throughout Asia, especially in the work place. Indigenous trends in research, theory and

application are provided by authors who are native to, live and teach in the countries represented in the studies reported here. It is a must-read, not only for those in academic psychology and higher education, but also for those in business who are affected by changes in globalization of business practices. Psychologists, counselors, educators, and those with research interests in social sciences and cross-cultural research will find a wealth of current information.

This landmark volume introduces the new series of proceedings from the Viktor Frankl Institute, dedicated to preserving the past, disseminating the present, and anticipating the future of Franklian existential psychology and psychotherapy, i.e. logotherapy and existentialanalysis . Wide-ranging contents keep readers abreast of current

ideas, findings, and developments in the field while also presenting rarely-seen selections from Frankl's work. Established contributors report on new applications of existential therapies in specific (OCD, cancer, end-of-life issues) and universal (the search for meaning) contexts as well as intriguing possibilities for opening up dialogue with other schools of psychology. And this initial offering establishes the tenor of the series by presenting varied materials across the field, including: Archival and unpublished articles and lectures by Frankl. Peer-reviewed studies on logotherapy process, measures, and research. New case studies using logotherapy and existential analysis in diverse settings. Papers advocating cross-disciplinary collaboration. Philosophical applications of existential psychology. Critical reviews of logotherapy-related books. Volume 1 of *Logotherapy and Existential Analysis* will attract a wide audience, including psychologists (clinical, social, personality, positive), psychotherapists of different schools, psychiatrists in private

practice, and researchers in these fields. Practitioners in counseling, pastoral psychology, coaching, and medical care will also welcome this new source of ideas and inspiration. [ICIE 2016 Proceedings of the 4th International Conference on Innovation and Entrepreneurship](#) Psychology Press Perhaps the defining feature of humanity is the social condition -- how we think about others, identify ourselves with others, and interact with groups of others. The advances of evolutionary theory, social cognition, social identity, and intergroup relations, respectively, as major fields of inquiry have been among the crowning theoretical developments in social psychology over the past three decades. Marilyn Brewer has been a leading intellectual figure in the advancement of each of them. Her theory and research have had international impact on the way we think about the self and its relation to others. This festschrift celebrates Marilyn's numerous contributions to social psychology, and includes original contributions from both leading and rising social psychologists from around

the world. The volume will be of interest to social psychologists, industrial/organizational psychologists, clinical psychologists, and sociologists. The delivery of quality education to students relies heavily on the actions of an institution's administrative staff. Effective leadership strategies allow for the continued progress of modern educational initiatives. It is crucial to investigate how effective administrators lead their organizations in challenging and difficult times and promote the accomplishments of their organization. Research Anthology on Preparing School Administrators to Lead Quality Education Programs is a vital reference source that offers theoretical and pedagogical research concerning the management of educational systems on both the national and international scale. It also explores academic

administration as well as administrative effectiveness in achieving organizational goals. Highlighting a range of topics such as strategic planning, human resources, and school culture, this multi-volume book is ideally designed for educators, administrators, principals, superintendents, board members, researchers, academicians, policymakers, and students.

The proliferation of entrepreneurship, technological and business innovations, emerging social trends and lifestyles, employment patterns, and other developments in the global context involve creative destruction that transcends geographic and political boundaries and economic sectors and industries. This creates a need for an interdisciplinary exploration of disruptive technologies, their impacts, and their implications for various stakeholders widely ranging from government agencies to major corporations to consumer groups and individuals.

Disruptive Technology: Concepts, Methodologies, Tools, and Applications is a vital reference source that examines innovation, imitation, and creative destruction as critical factors and agents of socio-economic growth and progress in the context of emerging challenges and opportunities for business development and strategic advantage. Highlighting a range of topics such as IT innovation, business strategy, and sustainability, this multi-volume book is ideally designed for entrepreneurs, business executives, business professionals, academicians, and researchers interested in strategic decision making using innovations and competitiveness.

'This is a very business-like book in its approach. It has an impressive global reach in its authorship, focal areas and use of evidence; it hits all the major practical challenges of family firms in a spirit that is fresh and

current; and it deals with the cutting-edge themes and issues that are uppermost in the minds of owners, executives, advisors and researchers in the field.' - Nigel Nicholson, London Business School, author, *Managing the Human Animal, Family Wars and The 'I' of Leadership* Acclaim for the first edition: 'The authors have taken a lot of pain in putting this handbook together. As the name indicates, this is an excellent handbook for researchers.' - Global Business Review 'The Handbook of Research on Family Business has collected and synthesized a broad variety of topics by notable researchers who share a common dedication to family business research. This Handbook provides a comprehensive treatment that advances the frontiers of knowledge in family business, provoking valuable thoughts and discussion. The Handbook will serve as both an authoritative and comprehensive reference work for researchers investigating family enterprises.' - A. Bakr Ibrahim, Concordia University, Montreal, Canada 'Although family business research is a

young discipline it is both necessary and important. For the wellbeing and future development of our society the survival of prosperous and passionate family business entrepreneurs is indispensable. In order to help the families in business to better understand how to succeed with their enterprises we need qualified and updated research. This book is the answer!' - Hans-Jacob Bonnier, Bonnier Business Press Group, Sweden and 6th Generation Chairman of the Family Business Network - International 'This Handbook is a unique compilation of the most important and the best recent family business research. The field has grown so rapidly that this effort will be a mark for the research to follow. The Handbook of Research on Family Business will be the reference for scholars in family business for many years to come. It will also stimulate new ideas in research.' - John L. Ward, IMD, Switzerland and Northwestern University, US During the previous decade, the multi-disciplinary field of family business has advanced significantly in terms of advances in theory,

development of sophisticated empirical instruments, systematic measurement of family business activity, use of alternative research methodologies and deployment of robust tools of analysis. This second edition of the Handbook of Research on Family Business presents important research and conceptual developments across a broad range of topics. The contributors - notable researchers in the field - explore the frontiers of knowledge in family business entrepreneurship and stimulate critical thinking, enriching the repository of theoretical frameworks and methodologies. The Handbook takes a systematic and rigorous approach by providing in-depth insights into the dynamics of family business, its context and the significant role of stakeholders. Ultimately, this scholarly compendium of extant family business papers is an invaluable resource for researchers, educators, family business consultants, family business owner-managers and students. builds on the tenets of mindfulness-based cognitive therapy (MBCT) to answer some of life's basic questions, such as "How do I create a meaningful, purposeful life?" and "Is the life I am living one that brings me fulfillment, purpose, and a sense of inner peace?" Using a variety of techniques, including journaling, grounding exercises, cognitive self-talk restructuring, and more, chapters invite counseling professionals and students to explore their inner landscape, better understand themselves and find communion with others.

This volume integrates and makes sense of the growing body of theoretical and empirical research conducted on purpose across the lifespan. It opens with a comprehensive yet detailed discussion of the definitions of purpose most commonly used in studies on the topic. In addition to defining the construct, the author also discusses its philosophical roots and distinguishes it from related concepts, including meaning, goals, and ultimate concerns. This volume discusses the disparate perspectives on the construct and addresses the tendency to position purpose in the broader frame of positive psychology. It synthesizes distinct strands of research on purpose across the lifespan, it explores studies on the daily and longer-term

experience of a purposeful existence, and it delves deeply into the wide range of measurement tools that have been used to assess the purpose construct. Further, it examines the prevalence and forms of purpose among diverse groups of youth and discusses the developmental trajectory of the construct. Other topics discussed include the central role of purpose in supporting optimal well-being and positive youth development. The book closes with empirically-supported steps adults, educators, and mentors can take to effectively and intentionally foster purpose among young people and makes recommendations for future research on the topic.

Emotion management is an important source of social capital and synergy for organizations.

Managers have a great role in the creation of this synergy. A manager who can cope with their emotions indirectly contributes to organizational effectiveness. This situation is especially important in human-oriented organizations providing services rather than goods, such as educational institutions. Leadership is a process of social influence, which maximizes the efforts of others towards the achievement of a goal. Leadership stems from social influence rather than authority or power. In terms of system approach, the input, output, process, and feedback of educational organizations are always related to human behaviors. Therefore, organizations must address the nature of human beings in all of their managerial processes. Although organizations, in which people are at the foreground, try to

continue their functioning on a rational and formal basis throughout the managerial process, they sometimes have to manage emotional and informal phenomena. In this case, there is a need for managers and school leaders who can shape the rationale in line with the requirements of human nature. What is expected from this administrator is that they do not ignore human needs and emotions while providing the management of educational institutions. For this reason, these managers should be "leaders" rather than "executives" who only work in a formal framework of organization management. Moreover, principals and teachers should also be leaders in all educational processes. Emotions are the main catalyst of positive organizational culture. Leaders can create an effective organizational culture with the main source of positive emotions between employers. Positive emotions also motivate employees for organizational purposes. If a leader wishes to create and maintain an effective organizational culture, it is essential to support

positive behavior and emotional climate in their institutes and schools. Leaders-school-managers and teachers, therefore, need to develop emotion management abilities. Educational organizations need to shape their organizational culture, climate, and psychology to support their leaders in efficiently managing their employees' emotions. Up to now, this topic has been usually addressed as the main catalyst and a sub-dimension of emotional intelligence. Moreover, current evidence classifies social and empathy skills as other sub-dimensions of emotional intelligence. For this reason, this collection of peer-reviewed articles will draw attention to the contemporary term "emotional management" and contribute to educational fields by means of exploring the relationship between emotions and leadership.

Understanding the 'lost decade' of the 1990s is central to explaining Japan today. Following a period of record high

growth, the chronic downturn after 1990 raised fundamental questions about the course of the world's third largest economy. This crisis also presented Japan with the opportunity for transformative change. Changes have followed, some of them less than might be expected, and some of them far more sweeping than is generally realized. This volume presents a wide range of international perspectives on post-bubble Japan, exploring the effects of the long downturn on the views of the Japanese business community, management practices, and national policies. To what degree has Japan's traumatic experience prompted basic reforms in terms of legal changes, corporate governance, business strategy, and the longterm national vision for the economy? This book was originally published as a special issue of *Asia Pacific Business Review*. [Leadership, Diversity and Inclusion in Organizations](#) Emerald Group Publishing The only text to feature examples of 30 key concept analyses supporting nursing research and practice This DNP and PhD doctoral-

level nursing text delivers analyses of 30 core concepts that define nursing theory, research, education, and professional practice. Grounded in the concept analysis framework developed by Walker and Avant, the book clearly demonstrates how concepts are used to build theory, support research, and improve education and professional practice. Designed to facilitate practical applications of concept analysis methodology, all chapters provide an explicit description of each concept and a consistent framework for its analysis. Additionally, a diagrammatic representation of characteristics across concepts allows readers to make comparisons and ultimately to build on the text's knowledge base. Expert authors from clinical and research disciplines focus on the core of nursing-- the nurse-patient relationship--grouping concepts into the categories of patient/client-focused concepts, career-focused concepts, and organizational/systems-focused concepts. Within these groups the book addresses such contemporary themes as

hope, postpartum depression, resilience, self-care, cultural competence, and many others. With its expansive descriptions and analyses of key nursing concepts within a consistent framework, the book will help nurse scholars to develop a sophisticated analytic ability and provide graduate nursing students with a foundation for developing a DNP capstone or PhD research project. Key Features: Offers in-depth description and analyses of 30 core concepts relevant to nursing and related disciplines Provides a consistent analytic framework throughout Demonstrates a highly practical application of concept analysis methodology Includes diagrams of characteristics across concepts for comparison Authored by renowned scholars and practitioners *Embracing Well-Being in Diverse African Contexts: Research Perspectives* John Wiley & Sons Heroism is a rich, elusive phenomenon. Any adequate understanding of heroic behavior requires a new type of scholarly imagination, one that taps into human artistic sensibilities as much as it does the rigors

of scientific inquiry. In an important sense, we invoke a meta-version of the call to heroic imagination by Franco, Blau, and Zimbardo (2011), who describe such imagination “as a mind-set” and “a collection of attitudes” (p. 13) that can

steer everyday people toward heroic achievement. This eBook also merges our understanding of heroism with heroic leadership, demonstrating that heroic leadership applies the principles of heroism in

moving groups toward noble collective goals. This eBook represents an effort by a distinguished group of authors to unleash their own creative mindsets, attitudes, and imaginations in their scholarship on heroism and heroic leadership.
