ALISSON WELCH

The Canadian Parliamentary Guide IGI Global

The increased focus on raising standards in education requires leaders to engage in complex decision making about teacher assessment, mandated accountability measures, and the collection and use of large amounts of data. Showcasing exemplary practices of school and district administrators, *Decision Making in Educational Leadership* covers issues concerning the role of emotion, ethical and legal ramifications, the use of data, and complexity in decision making. Chapter authors in this research-based volume explore what administrators and school leaders actually know about educational problems, how they draw upon and revise theories of action for responding to problems, and which theories are tenable in educational decision making. This important resource provides a broad and international perspective on effective models and methods of educational decision making and shares valuable knowledge about how theory can be translated into practice in a variety of school settings.

A five-day conference to explore contemporary issues in urban goods movement (UGM) was organized by representatives of the Transportation Research Board, American Society of Civil Engineers, Institute of Transportation Engineers, and the Federal Highway Administration. The Third Conference on "Goods Transportation in Urban Areas," reported in this volume, was held at The Cloister, Sea Island, Georgia, December 4-9, 1977, under the auspices of the Engineering Foundation. Five special topics were probed and reported upon by workteams, namely: 1) traffic engineering and design to facilitate UGM; 2) impact of local government regulations; 3) interface between Federal regulations and UGM; 4) UGM in regional system planning; and 5) locating and servicing major urban freight generators. In addition to Probe Group reports and recommendations, there are presented 40 keynote, summary and resource papers covering such topics as data requirements, time value of cargo, service trucks, terminal design and location, transportation system management, planning methodology and case studies, intermodal transfer, freight regulation and economics.

The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities (ARC3.2) is the second in a series of global, science-based reports to examine climate risk, adaptation, and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3.2 is to inform the development and implementation of effective urban climate change policies, leveraging ongoing and planned investments for populations in cities of developing, emerging, and developed countries. This volume, like its predecessor, will be invaluable for a range of audiences involved with climate change and cities: mayors, city officials and policymakers; urban planners; policymakers charged with developing climate change mitigation and adaptation programs; and a broad spectrum of researchers and advanced students in the environmental sciences.

Aviation Week & Space Technology Berkeley : University of California Press

More trees. Hydrogen-fuelled cabs. Urbiology. A new model of taxation. Solar panels on big-box stores. The art of salvage. Composters for dog poo in city parks. Retrofitting our urban slabs. Gardening the Gardiner. Ravine City. What would make Toronto a greener place? In the third volume of the uTOpia series, dozens of imaginative Torontonians think big and small about sustainability. From suggestions for changes to our transit system and more mixed-use neighbourhoods to a tongue-in-cheek proposal for a painted line around the city and a short comic book about Toronto in the year 2057, GreenTOpia challenges the city and its residents to rethink what it means to be green in a metropolis, and how to take their love of the city one green step further. Other pieces include an interview with Mayor David Miller and a breakdown of the ecological impact of our morning coffee. GreenTOpia features photos, maps and a 56 page green directory of resources, organizations, incentives and programs promoting sustainability in the GTA.

Computerized Geographic Coding Routledge

"Generally, a school district must provide transportation students in grades K-8 who live more than two miles from school, whether they attend district schools; public community schools; science, technology, engineering, and mathematics (STEM) schools; or private schools that hold a state charter."--page 1.
