**Criminal Law** Oxford University Press, USA  
 'This volume of essays addresses the law relating to the formation of legally binding contracts and relationships between contracting parties and third parties and is based on papers delivered at the eighth Oxford-Norton Rose Colloquium at St Hugh's College, Oxford in September 2009.' - Foreword.  
*A Casebook on Contract* Oxford University Press

*Commonwealth Caribbean Property Law* Oxford University Press  
 As well as setting out the law itself, the authors examine the principles behind criminal law, and discuss some of the issues and debates arising from it.

*Permanent Sovereignty over Natural Resources* Oxford University Press, USA

This 12th edition provides a wide-ranging and straightforward exposition of contract law. The text opens with an overview of the main issues surrounding contract law which places the subject in its wider context, then goes on to give a clear explanation of all the major areas of contract law encountered on undergraduate courses.

**Poole's Casebook on Contract Law** Oxford University Press, USA

Property law is concerned with a wider variety of rights, obligations and interests than most other areas of law, and can prove daunting to those studying the subject for the first time. *Commonwealth Caribbean Property Law* sets out in a clear and concise manner the central principles of the law of real property in the region, in order to guide students through this often

complex core subject area. In this new edition, the book has been fully revised and updated to include important new case law from the various Caribbean jurisdictions and an expanded appendix of working documents. With comprehensive coverage of the main topics studied by undergraduates, such as Leases, Co-Ownership, Restrictive Covenants, Easements, Mortgages, and Land Sale, this textbook is essential reading for LLB students in Caribbean universities and students on CAPE Law courses. The extensive coverage of land law from a Caribbean perspective and analysis of the substantive laws of several jurisdictions will also make this text an invaluable reference tool for practitioners.

### Electronic Contracting in Europe OUP Oxford

Research Paper (undergraduate) from the year 2015 in the subject Law - Civil / Private, Trade, Anti Trust Law, Business Law, grade: 1,0, University of Applied Sciences Osnabrück (Fakultät Wirtschafts- und Sozialwissenschaften), course: Contract Law, language: English, abstract: "What can be more palpably absurd than the prospect held out of locomotives travelling twice as fast as stagecoaches? Just as well, people could fire themselves with a firework." In the early 19th century people believed the technological progress has arrived its maximum, but their predictions were wrong. Locomotives became high-speed trains and the stagecoaches disappeared from the post system. The post, which used to take several weeks, arrives after a few days and modern communication systems like fax, telephone and email were established. Yet the contract laws of this times and a rule such as the postal rule are still legally binding and therefore the modern systems and especially email have to be integrated into the legal system. The purpose of this term paper is to critically discuss the arguments for and against the question, does the postal rule apply to email? In the first chapter the general formation of a contract is noted as well as the history and application of the postal rule are explained. Accordingly in the second chapter the process of communication by email is described and the different arguments for and against the main question are critically discussed. Finally the conclusion of the term paper is collectively assessed. Because there exist modern communication systems like fax, telephone and email, the connection between the postal rule and these modern communication systems is frequently discussed in many scientific publications. The textbooks from Mindy Chen-Wishart (2012), Contract Law, and Richard Stone (2008), The modern Law of Contract, give a good overview of the topic. For the discussion i.a. the articles from Valerie Watnick (2004), The Electronic Formation of Contracts and the Common Law "Mailbox Rule", and Sharon Christensen (2001), Formation of Contracts by Email - Is it Just the Same as the Post?, are significant.

Fifty years after the adoption of the Declaration on Permanent Sovereignty over Natural Resources by the General Assembly of the United Nations in December 1962, this volume assesses the evolution of the principle of permanent sovereignty over natural resources into a principle of customary international law as well as related developments. International environmental and human rights law leave unresolved questions regarding the limitations of this principle, e.g. extraterritorial and international influences such as the applicable criminal and tort law, as well as the extraterritorial and international promotion of good governance, including transparency obligations.

This first volume to analyze the science of meetings offers a unique perspective on an integral part of contemporary work life. More than just a tool for improving individual and organizational effectiveness and well-being, meetings provide a window into the very essence of organizations and employees' experiences with the organization. The average employee attends at least three meetings per week and managers spend the majority of their time in meetings. Meetings can raise individuals, teams, and organizations to tremendous levels of achievement. However, they can also undermine effectiveness and well-being. The Cambridge Handbook of Meeting Science assembles leading authors in industrial and organizational psychology, management, marketing, organizational behavior, anthropology, sociology, and communication to explore the meeting itself, including pre-meeting activities and post-meeting activities. It provides a comprehensive overview of research in the field and will serve as an invaluable starting point for scholars who seek to understand and improve meetings.
