Greatest Science Fiction Classics of H. G. Wells Gateway
For the beautiful young woman Ash, life has always been arquebuses and artillery, swords and armour and the true horrors of hand-to-hand combat. War is her job. She has fought her way to the command of a mercenary company, and on her unlikely shoulders lies the destiny of a Europe threatened by the depredations of an Infidel army more terrible than any nightmare. Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically

interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

H. G. Wells' 'Greatest Science Fiction Classics of H. G. Wells' is a compelling collection of groundbreaking science fiction works. From the thrilling adventures in 'The War of the Worlds' to the prophetic vision of a dystopian future in 'The Time Machine,' Wells' literary style combines vivid imagination with social commentary. Set in the late 19th and early 20th centuries, these works reflect the author's fascination with scientific advancements and their potential consequences on society. In this collection, readers will explore themes of alien invasion, time travel, and social evolution, all presented with Wells' signature blend of suspense and intellect. This anthology serves as a testament to Wells' enduring impact on the science fiction genre and his ability to provoke thought and inspire awe through his storytelling. It is a must-read for those interested in the origins of speculative fiction and the enduring legacy of one of its pioneers. *The Century Dictionary: The Century dictionary* The New Press Considers how dangerous beasts in horror films illuminate the human-animal relationship. It's always been a wild world, with

humans telling stories of killer animals as soon as they could tell stories at all. Movies are an especially popular vehicle for our fascination with fierce creatures. In *Brute Force*, Dominic Lennard takes a close look at a range of cinematic animal attackers, including killer gorillas, sharks, snakes, bears, wolves, spiders, and even a few dinosaurs. Lennard argues that animal horror is not so much a focused genre as it is an impulse, tapping into age-old fears of becoming prey. At the same time, these films expose conflicts and uncertainties in our current relationship with animals. Movies considered include *King Kong*, *Jaws*, *The Grey*, *Them!*, *Arachnophobia*, *Jurassic Park*, *Snakes on a Plane*, *An American Werewolf in London*, and many more. Drawing on insights from film studies, art history, cognitive science, and evolutionary psychology, *Brute Force* is an engaging critical exploration—and appreciation—of cinema’s many bad beasts. “The brilliance of Dominic Lennard’s *Brute Force* is not only that it is long overdue, but one didn’t realize it was due in the first place! Yet upon reflection and, of course, through Lennard’s engaging book, one realizes not only the ubiquity of animals in horror, but their utter centrality to so many classic horror films. In reading this, we can hear the distant rumble of footsteps of a genetically reborn *Tyrannosaurus* or the hurried pounding of our beloved Rover who has decided that he wants more than kibbles and bits for dinner—and we look mighty appetizing. ‘Groundbreaking’ is often overused, but in this case it truly fits.” — David Desser, coeditor of *Tough Ain’t Enough: New Perspectives on the Films of Clint Eastwood* *SCIENCE FICTION Ultimate Collection: 140+ Intergalactic Adventures, Dystopian Novels, Lost World Classics & Post-*

Apocalyptic Stories Del Rey

During the Silent Era, when most films dealt with dramatic or comedic takes on the "boy meets girl, boy loses girl" theme, other motion pictures dared to tackle such topics as rejuvenation, revivication, mesmerism, the supernatural and the grotesque. *A Daughter of the Gods* (1916), *The Phantom of the Opera* (1925), *The Magician* (1926) and *Seven Footprints to Satan* (1929) were among the unusual and startling films containing story elements that went far beyond the realm of "highly unlikely." Using surviving documentation and their combined expertise, the authors catalog and discuss these departures from the norm in this encyclopedic guide to American horror, science fiction and fantasy in the years from 1913 through 1929.

In a technologically suppressed future, information demands to be free in the debut novel from Hugo Award-winning author Charlie Stross. In the twenty-first century, life as we know it changed. Faster-than-light travel was perfected, and the Eschaton, a superhuman artificial intelligence, was born. Four hundred years later, the far-flung colonies that arose as a result of these events—scattered over three thousand years of time and

It has existed for centuries in self-imposed isolation, rejecting all but the most basic technology. Now, under attack by a devastating information plague, the colony must reach out to Earth for help. A battle fleet is dispatched, streaking across the stars to the rescue. But things are not what they seem—secret agendas and ulterior motives abound, both aboard the ship and on the ground. At the dawn of the twenty-fourth century, with colonies spanning fifty star systems, mankind has created the Confederation of Allied Worlds. When trouble erupts, the Confed's solution is swift, savage, and supremely effective: dispatch small teams of elite warriors. Deadly fighters like Tex. . . . As one of the most decorated soldiers in the Confederation's arsenal, Tex has survived covert operations in every steaming hellhole. As a result, he knows more than enough about the Confed's most brutal and amoral activities, which makes him wonder: Is it mere coincidence that all missions assigned to veteran teams seem to be suicide missions? Fortunately, the new assignment doesn't have the markings of a lethal affair. Tex is dispatched to the Ulysses star system, a backwater group of inconsequential planets populated with misfits and malcontents. What he doesn't know is that this lowly cluster secretly harbors perhaps the greatest threat ever faced by the Confederation. Worse yet, the shadowy Protectorate behind the mission intends to make certain Tex does not survive. But Tex hasn't earned his reputation as a well-honed killing machine for nothing. . . .
