## **BARRERA KENZIE**

---

Germany 1916-23 Routledge  
 In this groundbreaking book, a range of internationally renowned and emerging academics, writers, artists, curators, activists and filmmakers critically reflect on the ways in which visual culture has appropriated and developed new media across North Africa and the Middle East. Examining the opportunities presented by the real-time generation of new, relatively unregulated content online, *Uncommon Grounds* evaluates the prominent role that new media has come to play in artistic practices - and social movements - in the Arab world today. Analysing alternative forms of creating, broadcasting, publishing, distributing and consuming

digital images, this book also enquires into a broader global concern: does new media offer a 'democratisation' of - and a productive engagement with - visual culture, or merely capitalise upon the effect of immediacy at the expense of depth? Featuring full-colour artists' inserts, this is the first book to extensively explore the degree to which the grassroots popularity of Twitter and Facebook has been co-opted into mainstream media, institutional and curatorial characterisations of 'revolution' - and whether artists should be wary of perpetuating the rhetoric and spectacle surrounding political events. In the process, *Uncommon Grounds* reveals how contemporary art practices actively negotiate present-day notions of community-based activism, artistic agency and political engagement.

In Praise of the Minor Character Wm. B.

Eerdmans Publishing

In this counterintuitive study of digital democracy, Jen Schradie shows how the web has become another weapon in the arsenal of the powerful, and a potent weapon for conservative activists. Rather than leveling the playing field, the internet has tilted it in favor of the Right, where only the most sophisticated and well-funded players can compete.

**The Art of World-Making** Bloomsbury Publishing

The Islamic Republic of Iran has entered its fourth decade, and the values and legacy of the Revolution it was founded upon continue to have profound and contradictory consequences for Iranian life. Despite the repressive power of the current regime the immense creativity of popular cultural practices, that negotiate and resist a repressive system, is a potent and dynamic force. This book draws on the

expertise and experience of Iranian and international academics and activists to address diverse areas of social and cultural innovation that are driving change and progress. While religious conservatism remains the creed of the establishment, this volume uncovers an underground world of new technology, media and entertainment that speaks to women seeking a greater public role and a restless younger generation that organises and engages with global trends online. [Dissertation Abstracts](#) Black Inc. The Internet revolution has come. Some say it has gone. In *The Future of Ideas*, Lawrence Lessig explains how the revolution has produced a counterrevolution of potentially devastating power and effect. Creativity once flourished because the Net protected a commons on which widest range of innovators could experiment. But now, manipulating the law for their own purposes, corporations have established themselves as virtual gatekeepers of the Net while Congress, in the pockets of media magnates, has rewritten copyright and patent laws to stifle creativity and progress. Lessig weaves the history of technology and its relevant laws to make a lucid and accessible case to protect the sanctity of intellectual freedom. He shows how the door to a future of ideas is being shut just as technology is creating extraordinary possibilities that have implications for all of us. Vital, eloquent, judicious and forthright, *The Future of Ideas* is a call to arms that we can ill afford to ignore.

*Luce Irigaray and Premodern Culture*  
Simon and Schuster

This book constitutes the refereed proceedings of the First International Conference on Soft-Ware 2002, held in Belfast, North Ireland in April 2002. The 24 revised full papers presented together with seven abstracts of invited presentations and the summary of a panel were carefully reviewed and selected for inclusion in the book. All presentations are devoted to the effective handling of soft issues in the design, development, and operation of computing systems, from an academic research point of view as well as from the point of view of industrial practice. The papers aim at integrating an interdisciplinary range of disciplines including artificial intelligence, information systems, software engineering, and systems engineering.

*Cultural Revolution in Iran* Kogan Page Publishers

A challenging look at today's most hotly debated issues in bioethics. Within the high-paced, highly controverted field of

bioethics, the most hotly debated issues center on sexuality, reproductive technology, and the family. This new volume from the Center for Bioethics and Human Dignity provides a thought-provoking appraisal of the ethical dimension of the reproductive revolution from a Christian perspective. Thirty scholars and medical practitioners discuss some of the most pressing topics related to human reproduction, including: the moral status of embryos; the use of donor eggs and sperm; surrogate motherhood and human cloning; the abortifacient effect of birth control pills.

A Reader

[Advances in Artificial Intelligence and Security](#) Simon and Schuster

In the aftermath of the May Fourth movement, a growing expectation of revolution raised important intellectual issues about the position of the individual within a society in turmoil and the shifting boundaries of political and sexual identities. The theme of "revolution plus love," a literary response to the widespread insurrections and upheaval, was first popularized in the late 1920s. In her examination of this popular but understudied literary formula, Liu Jianmei argues that revolution and love are culturally variable entities, their interplay a complex and constantly changing literary practice that is socially and historically determined. Liu looks at the formulary writing of "revolution plus love" from the 1930s to the 1970s as a case study of literary politics. Favored by leftist writers during the early period of revolutionary literature, it continued to influence mainstream Chinese literature up to the 1970s. By drawing a historical picture of the articulation and rearticulation of this theme, Liu shows how changes in revolutionary discourse force unpredictable representations of gender rules and power relations, and how women's bodies reveal the complex interactions between political representation and gender roles. *Revolution Plus Love* is a nuanced and carefully considered work on gender and modernity in China, unmatched in its broad use of literary resources. It will be of considerable interest to scholars and students of modern Chinese literature, women's studies, cultural studies, and comparative literature.

Science & Business Media

On its face, *The Art of World-Making* focuses on honouring the career of Nicholas Greenwood Onuf and his contributions to the study of international relations; of equal importance, however, while using Onuf's work as their touchstone, the contributions to this volume range widely across IR theory, making important interventions in some of the most important topics in the field today. The volume considers the place of Constructivism and Republicanism in the field of international relations, and the contestation that accompanies the question of their place in the field, asking:

- What explains the dominance of some forms of Constructivism and the relative lack of influence of other forms?
- What can rule-oriented Constructivism, the focus here, provide our field that other forms of Constructivism have been unable to?
- Into what new and productive directions can Constructivism be taken?
- What are its gaps and what are the resources to remedy those gaps?
- What can Republicanism tell us about ongoing issues in international law, global governance, liberalism, and crisis?

Drawing together essays from some of the leading scholars in the field, space is given after each chapter for a detailed and highly personal response piece to each contribution, written by Onuf. This unique volume will be essential reading for students and scholars of international relations. [The Stressless Revolution](#) Allied Publishers

The world of cryptocurrencies and blockchains was initially viewed as a niche space of little interest to mainstream business and finance sectors. With major banks now licensed to provide cryptocurrency custody solutions, and everyone from Facebook to governments using the underlying technology to create their own digital currencies, this has undoubtedly changed. *The Cryptocurrency Revolution* explains the most important takeaways from the continued growth of digital currencies and blockchain technology and explores the transformative possibilities of borderless payments, decentralized finance ('DeFi') and machine-to-machine transactions. Written in jargon-free and accessible language, this book examines the key value proposition of Bitcoin and other cryptocurrencies and how decentralized technologies could enable banks and financial institutions to become more efficient. It looks at the potential impact of company-backed virtual currencies (such as Facebook's Libra) and how governments and regulators around the world are reacting to these innovations.

With discussion of the principles of tokenomics and the difference between public and private blockchains, *The Cryptocurrency Revolution* is the essential guide for those wishing to understand the threats and opportunities of the changing world of payments and finance.

*Soft-Ware 2002: Computing in an Imperfect World* Balboa Press

This provocative anthology brings together a diverse group of well-known feminist and gay writers, historians, and activists. They are concerned not only with current sexual issues-abortion, pornography, reproductive and gay rights-but they also raise a host of new issues and questions: How, and in what ways, is sexuality political? Is the struggle for sexual freedom a complement to other struggles for liberation, or will it detract from them? Has the sexual revolution diminished or enriched the lives of women?

*The Chambers Dictionary* MSU Press

Where were you when America elected Barack Obama? Kate Jennings was in New York, eyes wide open, completing her take on an amazing time: "the run-up to the election ... a time when every day felt like a year and we became slightly crazed from worry but also mesmerised, unable to switch off the cable news stations, obsessively tracking the DOW, VIX, LIBOR spreads, polls in red states. So much at stake." *American Revolution* is a dazzling and perceptive look at the United States between hope and despair: an election-year kaleidoscope. Jennings describes how and why the US economy fell off a cliff and how an apparently endless run of primaries and an increasingly rancorous campaign culminated in a world-changing victory. She surveys the characters - Obama, Palin, McCain and the Clintons - and conveys the concepts - derivatives, bailouts and moral hazard. This is an essay that shows America in fascinating flux: it is witty and poetic, acute and evocative.

'The television networks are justifiably in raptures about the historic election of an African-American as the president. All the same ... to reduce Obama to a label, to 'African-American,' does him - and us - a disservice. He wasn't elected for the colour of his skin; he was elected because he offered the hope of a wise, steady and healing leadership to a country bullied and battered in the name of patriotism, plundered and pillaged in the name of free markets, neglected and abandoned in the name of small government.' —Kate Jennings, *American Revolution* 'Kate Jennings captures perfectly the intensity of the past months, the terrible anxiety we felt, the almost pathological conviction that the Republicans would do anything,

say anything, pull out all the stops, and that the Democrats would just stand there like numbskulls while the election was stolen from them once again.' —Christina Thompson, editor of *Harvard Review* Kate Jennings is a poet, essayist, short-story writer and novelist. Both her novels, *Snake* and *Moral Hazard*, were *New York Times* Notable Books of the Year. Her work has been in contention for the Booker, IMPAC, and *Los Angeles Times* literary prizes. She has won the prestigious Christina Stead and Adelaide Festival prizes and been honored with the Australian Literary Society's gold medal. Born in rural New South Wales, she has lived in New York since 1979.

We live in a behavior economy, an environment in which people no longer engage with companies just by purchasing things, but they seek engagement with services that allow them to behave, to leave a mark, and to participate in the community of others. The economic model promoted by the behavior economy is a model where behavior is the only goal of our actions, and where intrinsic motivation is the key to participation, engagement, and the satisfaction of multiple dimensions of value. *Value Creation and the Internet of Things* describes value delivery and consumption, and the mechanisms by which new value is captured and created, in enterprises dedicated to competing and prospering in this new environment. This book is significant in the context of the Internet of Things becoming mainstream, forcing organizations to re-examine their value creation methodologies in light of new consumer behavior and expectations. The Internet of Things will reframe the

existence of the ones enriched by it. It will do so not because it can, but because our motivation will demand it. This is a book about reframing reality for new and incumbent organizations. The reality to reframe is not an imaginary one, but the immediate reality in which one operates: the behavior economy.

*Uncommon Grounds* Springer

We live in a 24/7, fast-paced rat race and its not working. Many people are struggling with the stresses and pressure of modern life, and they know intuitively there must be a better way. In *The StressLess Revolution*, author Karina Joy Stephens, award-winning entrepreneur, author, and transformational speaker, shares her story of being burnt out, stressed out, and maxed out, before she checked out, surviving but not thriving. She narrates how chronic stress robs us of our personal power, how fatigue enervates our life force, and how struggle depletes us. Stephens showcases the strategies to live a less stressful life. In *The StressLess Revolution*, she discusses how to: create a stress defense shield so stress can never have the same effect again; discover how easy it is to make stress your new best friend; step into the stress-less kitchen and learn how to eat intuitively and magnify your life force; to shed weight permanently by doing less; slow down physically, ramp up energetically, and achieve more; remove the physical and energetic blocks to affluence, ease, and joy; and receive guided visualizations, meditations, energy medicine, and healing techniques designed to break through stress, struggle, and fatigue forever. *The StressLess Revolution* teaches that you don't have to struggle to know affluence and joy. Stephens tells how to let go of the struggle, stress, and burnout and begin to live a life of ease and abundance.

*What is Situationism?* Routledge

This book examines the Internet of Things (IoT) and Data Analytics from a technical, application, and business point of view. *Internet of Things and Data Analytics Handbook* describes essential technical knowledge, building blocks, processes, design principles, implementation, and marketing for IoT projects. It provides readers with knowledge in planning, designing, and implementing IoT projects. The book is written by experts on the subject matter, including international experts from nine countries in the consumer and enterprise fields of IoT. The text starts with an overview and anatomy of IoT, ecosystem of IoT, communication protocols, networking, and available hardware, both present and future applications and transformations, and

business models. The text also addresses big data analytics, machine learning, cloud computing, and consideration of sustainability that are essential to be both socially responsible and successful. Design and implementation processes are illustrated with best practices and case studies in action. In addition, the book: Examines cloud computing, data analytics, and sustainability and how they relate to IoT over the scope of consumer, government, and enterprise applications Includes best practices, business model, and real-world case studies Hwaiyu Geng, P.E., is a consultant with Amica Research ([www.AmicaResearch.org](http://www.AmicaResearch.org), Palo Alto,

California), promoting green planning, design, and construction projects. He has had over 40 years of manufacturing and management experience, working with Westinghouse, Applied Materials, Hewlett Packard, and Intel on multi-million high-tech projects. He has written and presented numerous technical papers at international conferences. Mr. Geng, a patent holder, is also the editor/author of Data Center Handbook (Wiley, 2015).

**Internet of Things and Data Analytics Handbook** Springer Science & Business Media

The 3-volume set CCIS 1422, CCIS 1423

and CCIS 1424 constitutes the refereed proceedings of the 7th International Conference on Artificial Intelligence and Security, ICAIS 2021, which was held in Dublin, Ireland, in July 2021. The total of 131 full papers and 52 short papers presented in this 3-volume proceedings was carefully reviewed and selected from 1013 submissions. The papers were organized in topical sections as follows: Part I: artificial intelligence; Part II: artificial intelligence; big data; cloud computing and security; Part III: cloud computing and security; encryption and cybersecurity; information hiding; IoT security.
