“When something is bothering you—a person is bugging you, a situation is irritating you, or physical pain is troubling you—you must work with your mind, and that is done through meditation. Working with our mind is the only means through which we'll actually begin to feel happy and contented with the world that we live in.” —Pema Chödrön Pema Chödrön is treasured around the world for her unique ability to transmit teachings and practices that bring peace, understanding, and compassion into our lives. With *How to Meditate*, the American-born Tibetan Buddhist nun presents her first book exploring in depth what she considers the essentials for a lifelong practice. More and more people are beginning to recognize a profound inner longing for authenticity, connection, and aliveness. Meditation, Pema explains, gives us a golden key to address this yearning. This step-by-step guide shows readers how to honestly meet and openly relate with the mind, embrace the fullness of our experience, and live in a wholehearted way as we discover: - The basics of meditation, from getting settled and the six points of posture to working with your breath and cultivating an attitude of unconditional friendliness - The Seven Delights—how moments of difficulty can become doorways to awakening and love - Shamatha (or calm abiding), the art of stabilizing the mind to remain present with whatever arises - Thoughts and emotions as “sheer delight”—instead of obstacles—in meditation “I think ultimately why we practice is so that we can become completely loving people, and this is what the world needs,” writes Pema Chödrön. *How to Meditate* is an essential book from this wise teacher to assist each one of us in this virtuous goal.

Essential Oils for Mindfulness and Meditation Elements

Immediate, illuminating, and hopeful: this is the key set of talks given by leading Zen Buddhist teacher Larry Ward, PhD, on breaking America's cycle of racial trauma. As an 11-year-old child, Zen Buddhist teacher Larry Ward was shot at by the police for playing baseball in the wrong spot. As an adult, he experienced the trauma of having his home firebombed by racists. At Plum Village Monastery in France—the home in exile of his teacher, Vietnamese peace activist and Zen teacher Thich Nhat Hanh—Dr. Ward found a way to heal. In these short reflective essays, he offers his insights on the effects of racial constructs and answers the question: How do we free ourselves from our repeated cycles of anger, denial, bitterness, pain, fear, violence? “I am a drop in the ocean, but I'm also the ocean,” he says. “I'm a drop in America, but I'm also America. Every pain, every confusion, every good and every bad and ugly of America is in me. And as I transform myself and heal and take care of myself, I'm very conscious that I'm healing and transforming and taking care of America. I say this for American cynics, but this is also true globally. It's for real.” Here, Ward looks at the causes and conditions that have led us to our current state and finds, hidden in the crisis, a profound opportunity to reinvent what it means to be a human being. This is an invitation to transform America's racial karma.

“Followers and newcomers to Nhat Hanh's teaching alike will find this collection inspiring for everyday practice and for social engagement in the world.”—Publishers Weekly This collection of autobiographical and teaching stories from peace activist and Zen Master Thich Nhat Hanh is thought provoking, inspiring, and enjoyable to read. Collected here for the first time, these stories span the author's life. There are stories from Thich Nhat Hanh's childhood and the traditions of rural Vietnam. There are stories from his years as a teenaged novice, as a young teacher and writer in war torn Vietnam, and of his travels around the world to teach mindfulness, make pilgrimages to sacred sites, and influence world leaders. The tradition of teaching the Dharma through stories goes back at least to the time of the Buddha. Like the Buddha, Thich Nhat Hanh uses story-telling to engage people's interest so he can share important teachings, insights, and life lessons.

The Essential Guidebook to Mindfulness in Recovery Penguin

From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life.”—Bill Gates, GatesNotes “It's not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own. *Present Moment Wonderful Moment (Easyread Edition)* Parallax Press

[How to Relax](#) Orbis Books

In this time of quarantine and global uncertainty, it can be difficult to deal with the increased stress and anxiety. Using ancient self-care techniques rediscovered by Herbert Benson, M.D., a pioneer in mind/body medicine for health and wellness, you can relieve your stress, anxiety, and depression at home with just ten minutes a day. Herbert Benson, M.D., first wrote about a simple, effective mind/body approach to lowering blood pressure in *The Relaxation Response*. When Dr. Benson introduced this approach to relieving stress over forty years ago, his book became an instant national bestseller, which has sold over six million copies. Since that time, millions of people have learned the secret—without high-priced lectures or prescription medicines. The *Relaxation Response* has become the classic reference recommended by most health care professionals and authorities to treat the harmful effects of stress, anxiety, depression, and high blood pressure. Rediscovered by Dr. Benson and his colleagues in the laboratories of Harvard Medical School and its teaching hospitals, this revitalizing, therapeutic tack is now routinely recommended to treat patients suffering from stress and anxiety, including heart conditions, high blood pressure, chronic pain, insomnia, and many other physical and psychological ailments. It requires only minutes to learn, and just ten minutes of practice a day.

The ability to pay attention is a key component of effective learning. Just think of all the times in your life when parents, teachers, bosses, and coaches have told you to pay attention to what you are doing. You would think that with all of the attention paid to paying attention, we would be pretty good at it. The problem is we're not, because most of us have never been taught how. Commonly adopted methods like forced concentration are actually counterproductive to learning and achieving our goals. In addition, too much focus on future goals and rewards takes our attention away from what we need to be doing in order to achieve them. Luckily, there is another way, a better way: the mindful way. *The Mindful Way To Study: Dancing With Your Books* is a guide to help students, professionals, and other lifelong learners develop a better approach to their educational and career pursuits. By using mindfulness, or the practice of bringing full awareness to the present moment, the authors blend the latest research with entertaining stories and specific techniques to teach readers how to truly pay attention, and even learn to enjoy it.
