### **Handbook of Research on Pedagogical Models for Next- Generation Teaching and Learning**

Springer  
Nature  
Technology is rapidly changing the way we think about money. Digital payment has

been slow to take off in the United States but is displacing cash in countries as diverse as China, Kenya, and Sweden. In Reimagining Money, Sibel Kusimba describes the rise of M-Pesa, and offers a rich portrait of how this technology changes the economic and

social landscape, allowing users to create webs of relationships as they exchange, pool, borrow, lend, and share digital money in user-built networks. These networks, Kusimba argues, will shape the future of financial technologies

and their impact on poverty, inclusion, and empowerment . She describes how urban and transnational migrants maintain a presence in rural areas through money gifts; how families use crowdfunding software to assemble donations for emergency medical care; and how new financial groups invest in real estate and fund weddings. The author presents fascinating

accounts that challenge accepted wisdom by examining the notion of money as wealth-in-people—an idea long-cultivated in sub-Saharan Africa and now brought to bear on the digital age with homegrown financial technologies such as digital money transfer, digital microloans, and crowdfunding. The book concludes by proposing a new theory of money that

can be applied to designing better financial technologies in the future. Reimagining Money World Scientific There are 17 comprehensive and detailed Sustainable Development Goals, which are all interlinked. Although access to water, sanitation, and hygiene is a human right, billions of people in developing countries are still faced with daily challenges accessing even the most

basic of services, specifically the poor and vulnerable in communities. Hygiene is an important aspect for women/girls to access the economic, educational, and social opportunities they deserve. Proper hygiene removes disease as a barrier for equality, economic growth, and more. The role of hygiene in water, sanitation, and infections must be addressed from both

scientific and social perspectives. This book provides the reader with an analysis of hygiene behaviors and practices and provides evidence-based examples in a number of developing countries. The United States and Kenya Intl Food Policy Res Inst This paper reports on an ex-post assessment of IFPRI's research on High-Value Agriculture (HVA) over 1994–2010.

HVA is defined to include perishable agricultural commodities produced for the market that yield high returns to land, labor, or both. IFPRI's research on HVA has been housed mainly in GRP27 (Participation in high value agricultural markets). Questions for the study included whether IFPRI had the right research strategy for this topic; was focused on the right issues; was a leader in the field; used the most

relevant approaches and methods; and was successful in sensitizing/influencing the policies of governments, agribusiness, academia, civil society, and the international donor community. Finally, what has been the impact of the HVA policies that IFPRI influenced?

**The Relevance of Hygiene to Health in Developing Countries**

World Bank Publications  
Takes an in-depth look at

twenty-six economic and social development successes in Sub-Saharan African countries, and addresses how these countries have overcome major developmental challenges.

Global Bioethics: The Impact of the UNESCO International Bioethics Committee  
Springer

The recent COVID-19 pandemic has emphasized the importance of safety and ergonomics in the workplace.

From work-life balance and mental health to risk prevention, maintaining a healthy and happy workforce has become essential for the progress of every company. Moreover, ensuring inclusive spaces has become a pillar of business with some worrying that the diversity agenda will be overshadowed by the recent pandemic. It is imperative that current research is compiled that

sheds light on the advancements being made in promoting diversity and wellbeing in the modern workforce. The Research Anthology on Changing Dynamics of Diversity and Safety in the Workforce is a comprehensive reference source that provides the latest emerging research on diversity management and initiatives as well as occupational health and safety practices in the workplace.

These concepts are necessary for global workplaces to remain safe, efficient, and inclusive. Covering topics such as employee equity, human resources practices, and worker wellbeing, this anthology provides an excellent resource for researchers, human resources personnel, managers, safety officers, policymakers, CEOs, students, professors, and academicians.

### **Business and Government Relations in Africa**

Intl Food Policy Res Inst

This book analyses the diffusion and implementation of Aid Effectiveness Principles in Kenya's agricultural sector.

Although Aid Effectiveness Principles represent a significant step in aid and development discourse, studies on its implementation remain inadequate, especially in the African context. This book

combines the perspectives of the Kenyan government, donor representative s and small-scale farmers. The discussion on Kenya brings in comparative perspectives and, therefore, would have broader relevance to the African region, in general. It highlights a disconnect between the government and farmers concerning the ownership concept, where farmers lack a voice in important

policy matters. The book shows that donors have exploited the weaknesses in government responses to interpret The Principles in ways that suit their strategic interests. Consequently, the book argues that the diffusion of Aid Effectiveness Principles has taken the form of symbolic imitation – a form of policy diffusion where the policymakers choose policies for their symbolic

value rather than their effectiveness. *Handbook of Research on Transformative Digital Content and Learning Technologies* Stanford University Press This book explores how integrated management of environmental resources via a nexus approach can help in achieving the respective Sustainable Development Goals (SDGs). It provides conceptual considerations but mainly

practical examples on how to implement a nexus approach in cities and multifunctional land-use systems to increase resource use efficiency and develop a low carbon economy. After sketching out the background and conceptual outline, contributions to the book explore key aspects of the nexus implementation. Specifically, they • Demonstrate

how to sustainably use organic waste and wastewater for agriculture, • Explore examples on how to manage multifunctional land-use systems including multipurpose reservoirs, • Highlight the importance of economic incentives for successful nexus implementation, and • Provide a comprehensive perspective on challenges and opportunities of

implementation, considering peer-to-peer learning, indigenous knowledge, and stakeholder participation. The chapters in this book shed a new light on key aspects of the interrelation between SDGs and the nexus approach in resilient cities and multifunctional land-use systems, and provide specific examples on how to advance sustainable resources management. **Judicial**

**Review of  
Administrative Action  
Across the  
Common  
Law World**

Springer

This book conducts a holistic analysis of climate change perceptions, vulnerabilities, impacts, and adaptation, based on the primary household-data collected from the Chepang community residing in the rural Mid-Hills of Nepal.

Socio-economic and demographic data from the household

survey is integrated with meteorological and spatial data to conduct an integrated analysis. Quantitative analysis is also supplemented by qualitative information. Given the context of ongoing climate change, the livelihoods issues of a highly marginalized Chepang community form the center-point of analysis. The book demonstrates that balanced

assets possession is a prerequisite to strengthen the adaptive capacity of the households. Furthermore, the ability of translating adaptive capacity into adaptation actions is determined by the households' ability to correctly perceive the changes and their access to various assets. The book recommends to ensure the availability of non-farm livelihood opportunities

along with access to formal/vocational education and skill development training as these are the key factors contributing to reduce the vulnerability. The book concludes that mainstreaming of climate change into development efforts is a must for sustainable development. *China's Outward-Oriented Higher Education Internationalization* Springer Nature Engineering Design and

Mathematical Modelling: Concepts and Applications consists of chapters that span the Engineering design and mathematical modelling domains. Engineering design and mathematical modelling are key tools/techniques in the Science, Technology and Innovation spheres. Whilst engineering design is concerned with the creation of functional innovative

products and processes, mathematical modelling seeks to utilize mathematical principles and concepts to describe and control real world phenomena. Both of these can be useful tools for spurring and hastening progress in developing countries. They are also areas where Africa needs to 'skill-up' in order to build a technological base. The chapters in this book cover the

<p>relevant research trends in the fields of both engineering design and mathematical modelling. This book was originally published as a special issue of the African Journal of Science, Technology, Innovation and Development. <i>Capital Penetration and the Peasantry in Southern and Eastern Africa</i> Routledge APPEAR – »Austrian Partnership Programme in Higher Education and</p>	<p>Research for Development« – wird von der Österreichischen Entwicklungszusammenarbeit finanziert und fördert Kooperationen in den Bereichen Lehre, Forschung und Management zwischen österreichischen Hochschulen und Universitäten, bzw. wissenschaftlichen Einrichtungen in insgesamt 13 Partnerländern. APPEAR ist nicht an einseitigem Wissenstransf</p>	<p>er interessiert, sondern schafft transdisziplinäre und transnationale Räume des Lernens und gemeinsamen Forschens. Im Rahmen des seit 2009 laufenden Programmes wurden bislang 17 akademische Partnerschaften in lateinamerikanischen und afrikanischen Ländern; bzw. in Nepal realisiert, die in dem Reader vorgestellt werden. Dabei zeigen sich spannende Möglichkeiten partizipativer</p>

und transkulturelle r Wissensproduktion, die insbesondere auch für nachhaltige Entwicklungsw ege in den betroffenen Ländern von hoher Relevanz ist. The Development of Tertiary Education in the Eastern African Region Springer Nature Large quantities of water are appropriated to produce the feed annually consumed in global livestock production.

Rising concerns about increasing competition for water resources and projected increase in demand for livestock products make it imperative to look for strategies to sustainably increase livestock production, with water being one key natural resource to consider. Using a combination of different datasets, a mechanistic livestock model, and a

dynamic vegetation model, we estimate the annual consumptive water use (CWU) in the global livestock sector associated with crops and fodder cultivated on cropland and grazed biomass from pastures.

**IAENG Transactions on Engineering Sciences**  
Frontiers Media SA  
This book endeavors to take the conceptualization of the relationship

between business, government and development in African countries to a new level. In the twenty-first century, the interests and operations of government and business inevitably intersect all over the African continent. No government, federal or state, can afford to ignore the needs of business. But what are these needs, how does business express its

needs to government and what institutions organize government-business relations in African countries? How should government regulate business, or should it choose to let the markets rule? Government and Business Relations in Africa brings together many of sub-Saharan African leading scholars to address these critical questions. Business and

Government Relations in Africa examines the key players in the game—federal and state governments and business groups—and the processes that govern the relationships between them. It looks at the regulatory regimes that have an impact on business and provides a number of case studies of the relationships between government and economic development

around the African continent, highlighting different processes and practices. It shows the latest state of knowledge on the topic and will be of interest both to students at an advanced level, academics and reflective practitioners. It addresses the topics with regard to business-government relations and will be of interest to researchers, academics, policymakers, and students in the fields of

African politics, comparative politics, public policy, business and politics, sustainable development and sustainability, economic development, and managerial economics.  
Factors Affecting Strategy Implementation in State Corporations in Kenya  
 Springer  
 "The United States and Kenya: How Similar or Different are the Two Nations?" is relevant to

and suitable for business people, missionaries, educators, students, tourists, politicians and people of other professions interested in having a better understanding of the United States and Kenya.  
**A Nexus Approach for Sustainable Development**  
 IGI Global  
 Enormous changes are affecting African production agriculture, urbanization, and food consumption

patterns, requiring new approaches to training and knowledge generation and dissemination to achieve food security. Many agricultural universities and other tertiary agricultural education (TAE) organizations have been slow to respond, hindered by inadequate staffing and facilities and growing competition for funds. However, some African agricultural

universities are transforming themselves and are achieving remarkable success. This book documents successful approaches to remaking TAE in Africa to inspire leaders, both formal and informal, of other TAE organizations. It emphasises adaptive strategies and processes creating an internal culture driven by stakeholder needs and where organizational

transformation improves the quality and relevance of teaching, research, and outreach. The chapters cover the role of TAE in agricultural transformation, trends in TAE in Africa, solutions to the rigour-versus-relevance dilemma, curriculum design informed by actual and emerging labour market conditions, innovation and entrepreneurship, TAE quality assurance,

and networking among TAE institutions.

**The Palgrave Handbook of Contemporary Kenya**  
Springer  
Nature

A changing climate is likely to have a drastic impact on crop yields in Africa. The purpose of this book is to document the effects of climate change on agriculture in Africa and to discuss strategies for adaptation to hotter weather and less predictable

rainfall. These strategies include promoting opportunities for farmers to adopt technologies that produce optimal results in terms of crop yield and income under local agro-ecological and socioeconomic conditions. The focus is on sub-Saharan Africa, an area that is already affected by changing patterns of heat and rainfall. Because of the high prevalence of subsistence

farming, food insecurity, and extreme poverty in this region, there is a great need for practical adaptation strategies. The book includes empirical research in Ethiopia, Kenya, South Africa, Tanzania, and other Sub-Saharan countries, and the conclusion summarizes policy-relevant findings from the chapters. It is aimed at advanced students, researchers, extension and

development practitioners, and officials of government agencies, NGOs, and funding agencies. It also will provide supplementary reading for courses in environment and development and in agricultural economics. Ex-post evaluation study of IFPRI's research on high-value agriculture, 1994-2010 World Scientific This book gives a riveting

account of the higher education advancements made in five East African countries, each presenting unique characteristics . While some of the counties enjoyed relative calm throughout their years of growth and development, others have endured a turbulent past marked by civil war, coups and other forms of unrest, including one of the most atrocious genocide

events ever recorded in the history of mankind. It is a known fact that the past defines the present and describes the future. The book specifically tracks the historical development of teacher education, technical and vocational education and training, and university education in Kenya, Uganda, Tanzania, Rwanda and Burundi. The extensive research and up-to-date accounts

provide a rich overview of tertiary education in the five countries, with candid reviews of the past, the current situation and perspectives on the future. The book is a refreshing addition to the books of history and education, and a must-read for students, professionals, and policy makers in the field of higher education, as well as scholars of history.

**Corporate  
Social**

**Responsibility in Rising Economies**

Springer  
Nature  
The emotive discourses on the subject of university rankings are directly linked to the effect of such rankings on the performance of universities throughout the world. It has been observed that the top-ranked universities attract major financial commitments from the industry, the best students, quality researchers, and a wide range of other

quality endowments such as equipment, libraries, and laboratories. It is not surprising that the ranking of universities has gained popularity and become a significant factor shaping not only the reputation of universities but also the performance of said institutions around the world, including the developing countries. Impact of Global University Ranking Systems on

Developing Countries presents a collection of perspectives from scholars and other stakeholders on the impact of the global ranking systems on developing countries. The book is an additional resource for discussion and discourse as far as the global university ranking systems are concerned and opens new frontiers for further research. Covering key topics such as assessment,

ethics, and academic freedom, this premier reference source is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.

**Open Citizen Science Data and Methods**

CRC Press Strategy implementation in state corporations in Kenya is influenced by several factors. First, political interference can hinder effective

implementation. Second, limited financial resources pose a challenge. Insufficient funding can restrict the implementation of strategic initiatives, hampering progress and hindering the achievement of desired outcomes. Third, bureaucratic structures and processes within state corporations often impede implementation. Complex hierarchies, excessive red tape and slow decision

making can delay the execution of strategic plans. Finally, external factors such as economic instability, legal and regulatory change and market dynamics can also impact strategy implementation in state corporations in Kenya.

Research Anthology on Changing Dynamics of Diversity and Safety in the Workforce

**Keywords:** Engineering; Mathematics; Computer Science; Electrical Engineering; Manufacturing Engineering; Industrial Engineering; Industrial Applications; Nanofillers; Cari Journals USA LLC Research on comparative administrative law, in contrast to comparative constitutional law, remains largely underdeveloped. This book plugs that gap. It considers how a wide range of common law systems have received and adapted English common law to the needs of their own socio-political context. Readers will be given complex insights into a wide range of common law systems of administrative law, which they may not otherwise have access to given how difficult it would be to research all of the systems covered in the volume single-handedly. The book covers Scotland, Ireland, the USA, Canada, Israel, South Africa, Kenya, Malaysia, Singapore,

Hong Kong SAR, India, Bangladesh, Australia and New Zealand. Comparative public lawyers will have a much greater	range of common law models of administrative law - either to pursue conversations about their own common	law system or to sophisticate their comparison of their system (civil law or otherwise) with common law systems.
