Thank You Mercury! - Children's Book Trailer by Carmen Gloria Pérez **Planets in Profile: Mercury in Libra** Comment Video For the Mercury Dime Book Giveaway Stream! **Jim Hutton: Freddie Mercury and Me** Mercury is a chemical element with the symbol Hg and atomic number 80. It is commonly known as quicksilver and was formerly named hydrargyrum (/hɑːˈdrɑːrdʒərəm / hy-DRAR-jər-əm). Mercury (element) - Wikipedia Mercury is the smallest and innermost planet in the Solar System. Its orbit around the Sun takes 87.97 days, the shortest of all the planets in the Solar System. It is named after

the Greek god Hermes (Ερμής), translated into Latin Mercurius Mercury, god of commerce, messenger of the gods, mediator between gods and mortals. Mercury (planet) - Wikipedia Mercury, the innermost planet of the solar system and the eighth in size and mass. Its closeness to the Sun and its smallness make it the most elusive of the planets visible to the unaided eye. Because its rising or setting is always within about two hours of the Sun's, it is never observable when the sky is fully dark. Mercury | Facts, Color, Size, & Symbol | Britannica The smallest planet in our solar system and nearest to the Sun, Mercury is only slightly larger than Earth's Moon. From the surface of Mercury, the Sun would appear more than three times as large as it does when viewed from Earth, and the sunlight would be as much as seven times brighter. Overview | Mercury - NASA Solar System Exploration Mercury is slightly larger than our Moon - 15,329 kilometres around its equator. Its radius, the distance from the core's centre to the surface, is 2,440 kilometres. Mercury is about 2.6 times smaller than Earth. How hot is Mercury? Planet Mercury | Natural History Museum Mercury is the closest planet to the Sun, at a distance of 57.91 million kilometers / 35.98 miles or 0.4 AU away. It takes sunlight 3.2 minutes to travel from the Sun to Mercury. Mercury has a radius of 2.439 km or 1516 mi, and a diameter of 4.879 km or 3.032 mi. It is about the size of the continental United States, slightly bigger. Mercury Facts | Information, History, Location, Size ... Mercury is leading the industry with boating innovations from Zeus joystick technology to VesselView displays, Joystick Piloting for Outboards, Active Trim, and Skyhook GPS digital anchoring. In 2016, Mercury introduced the VesselView Mobile app for iOS and Android, and an updated joystick and skyhook feature to its portfolio of technologies.
