The age-old question for every leader—how do we bring out the best in those we lead? Anyone who has run a company, raised a family, lead an army, or coached a team struggles to find the key to help others excel and realize their potential. It is surprising how often we resort to criticism vs. an approach that actually results in a better worker and a better person. What if we could speak Words of Life that transform those under our influence and ignite fires of intrinsic motivation? What if those we lead found great purpose in what they do and worked at their jobs with all their heart? Isn't that what leaders, parents and teachers really want? Ultimately, don't we hope to foster intrinsic motivation so that the individuals we lead become better employees, better students or better athletes? Recent discoveries of brain science and the wisdom of top CEO's that Dr. Tim Irwin interviewed for this book give us the answers we've long sought. In most organizations, the methods used to provide feedback to employees such as performance appraisal or multi-rater feedback systems, in fact, accomplish the exact opposite of what we intend. We inadvertently speak Words of Death. Brain science tells us that these methods tend to engage a natural "negativity bias" that is hardwired in us all. Science in recent years discovered that affirmation sets in motion huge positive changes in the brain. It releases certain neuro chemicals associated with well-being and higher performance. Amazingly, criticism creates just the opposite neural reaction. The most primitive part of the brain goes into hyper defense mode, compromising our

performance, torpedoing our motivation and limiting access to our higher-order strengths. How do we redirect employees who are out-of-line without engaging our natural "negativity bias?" Leaders must forever ban the term, "Constructive Criticism." Brain science tells us that we can establish a connection between the employee's work and his or her aspirations. This book calls for a new approach to align workers with an organization's mission, strategy and goals, called Alliance Feedback.

Jennifer Nedelsky claims that we must rethink our notion of autonomy, rejecting the usual vocabulary of control, boundaries and individual rights. If we understand that we are fundamentally in relation to others, she argues, we will recognize that we become autonomous with others.

For some unknown reason, Peter Altschul was born totally blind. He grew up in a working-class town where, with the help of his persistent mother, he broke through barrier after barrier, determined to live a full life. After attending a private school that initially turned him away simply because he was blind-Peter details how he discovered his gift for music, eventually playing percussion in the orchestra, marching band, and jazz ensemble at Princeton University. But it was only after Peter graduated from college that it became evident he would need a guide dog. Heidi, a Weimaraner with a large repertoire of barks, howls, and grunts, would assist Peter for the next eight years through the halls of New England Conservatory, where he eventually obtained a master's degree in music composition. Peter relays how he blazed a unique professional trail while simultaneously overcoming obstacles; managed his uneasy relationship with music; and embraced his unexpected entrance into an unfamiliar and romantic world. He also provides an unforgettable glimpse into the wonderful ways his five guide dogs supported him on his journey from urban bachelorhood to the light of love. Breaking Barriers shares a compelling account of one man's journey through life as he and each of his specially trained dogs learned to trust each other, ultimately melding into a smooth working team that tackled the world together.

If you want to accomplish what's important to you, discipline and willpower won't get you where you need to go. In this iconoclastic new book, Susan Fowler reveals compelling insights and actions to help you master and maintain your motivation. Motivation is at the heart of everything you do and everything you want to do but don't. Unfortunately, the ways we typically motivate ourselves don't work. Relying on sheer determination eventually becomes exhausting—it's not sustainable. And even setting goals can backfire—if you're not setting them for the right reasons. Susan Fowler says motivation is energy, and what matters is the quality, not the quantity. Traditional “motivators” such as fear, guilt, or the promise of a reward provide low-quality, short-term energy. Drawing on the latest empirical research, she proves that high-quality, optimal motivation is a skill that you can learn and apply. Science tells us that satisfying three basic needs—for choice, connection, and competence—is essential to optimal motivation. You need to feel like you've picked your path, not that you're being driven down it. Your goal should be linked to people or a purpose meaningful to you. And you want to continually learn and grow. Through practical exercises and eye-opening stories, Fowler shows you how to identify and shift the quality of your motivation. The skill to master your motivation is important—it may be your greatest opportunity to evolve, grow in wisdom, and be the light the world so desperately needs.

Only 43 per cent of U.S. construction firms remain in business after four years. Why? Inadequate management, according to the U.S. Small Business Administration. This is surprising because most construction firms are formed by ambitious construction project managers, executives and tradesmen who have excelled at what they have been doing. But as experienced as these entrepreneurs may be, they are not likely prepared to take on the full range of responsibilities forced on them in managing the business of construction in its entirety. While this business failure rate and its causes are based on U.S. experience, available data from a number of other industrialized countries shows they are similar. This book describes in detail what the business side of the construction equation requires of the construction firm owner. The contractor who quickly learns these requirements can identify and avoid or manage around the pitfalls that cause the high failure rate in our industry and put his or her construction firm on a level playing field with the best-run companies in the business. The detailed duties of the owner, whether in the U.S., U.K., Australia or Canada, are a common theme throughout the book. The author, Nick Ganaway, speaks peer-to-peer, and the book is sprinkled with supporting examples from his own experience. He is immersed in the industry and this book is "based on the things I've learned, used, and refined as a light-commercial general contractor in the course of starting and operating my own construction firm for 25 years." The contractor doing \$5 million or \$50 million or more in annual sales or the equivalent amount in other countries, or the entrepreneur who is just starting up, can use the tried and proven material in this book to build a business that is profitable, enjoyable, and enduring. Additionally, the book devotes a chapter to specializing in chain-store construction.

This open access book aims to set an agenda for research and action in the field of Digital Humanism through short essays written by selected thinkers from a variety of disciplines, including computer science, philosophy, education, law, economics, history, anthropology, political science, and sociology. This initiative emerged from the Vienna Manifesto on Digital Humanism and the associated lecture series. Digital Humanism deals with the complex relationships between people and machines in digital times. It acknowledges the potential of information technology. At the same time, it points to societal threats such as privacy violations and ethical concerns around artificial intelligence, automation and loss of jobs, ongoing monopolization on the Web, and sovereignty. Digital Humanism aims to address these topics with a sense of urgency but with a constructive mindset.

The book argues for a Digital Humanism that analyses and, most importantly, influences the complex interplay of technology and humankind toward a better society and life while fully respecting universal human rights. It is a call to shaping technologies in accordance with human values and needs.

"A new perspective on servant leadership—challenging us to bring both courage and humility to the table—for the sake of the people and the enterprise." —John C. Maxwell, New York Times-bestselling author In this updated edition of Dare to Serve, former Popeyes CEO Cheryl Bachelder shows that leading by serving is a rigorous and tough-minded approach that yields the best results. When she was named CEO of Popeyes in 2007, the stock price had slipped from \$34 in 2002 to \$13. The brand was stagnant, the team was discouraged, and the franchisees were just plain angry. Nine years later, restaurant sales were up 45 percent, restaurant profits had doubled, and the stock price was over \$61. Servant leadership is sometimes derided as soft or ineffective, but this book confirms that challenging people to reach a daring destination, while treating them with dignity, creates the conditions for superior performance. The second edition of this bestselling book includes Bachelder's post-Popeyes observations and new examples of how you can switch your leadership from self to serve. Ever engaging and inspirational, Bachelder takes you firsthand through the transformation of Popeyes and shows how anyone, at any level can become a Dare-to-Serve leader. "Extraordinary! Dare to Serve describes the kind of leadership so desperately needed in the 21st century. A powerful blend of courage and humility, Cheryl Bachelder's engaging story offers a clear path for leaders to follow, and what makes her message so compelling is the tremendous results she's produced. I highly recommend this book." —Stephen M. R. Covey, New York Times-bestselling author of The Speed of Trust
