SWANSON CORINNE

Cat Wars Random House Books for
Young Readers

This guide provides a single-source, comprehensive listing of a fascinating and helpful group of books-picture books for older readers. A multitude of ideas about how to use them in the classroom supplements this list of carefully selected quality fiction and nonfiction books that focuses on universal themes,

appeals to all ages, addresses important issues, and is accessible to multiple learning styles. Picture books aren't just for the very young. Innovative educators and parents have used them for years with readers of all ages and reading levels, knowing that students comprehend more from the visual-verbal connections these books offer. They are great tools for teaching visual literacy and writing skills; are effective with reluctant readers, ESL students, and those reading below grade level; and can easily be used to support various

curriculum. This guide provides a single-source, comprehensive listing of a fascinating and helpful group of books and a multitude of ideas about how to use them in the classroom. The authors have carefully selected quality fiction and nonfiction that focus on universal themes, appeal to all ages, treat important issues, and are accessible to multiple learning styles.

Keepers of Life Macmillan

Choose kindness with Horton the elephant and the Whos of Who-ville in Dr. Seuss's classic picture book about caring for others that makes it a perfect gift! A person's a person, no matter how small. Everyone's favorite elephant stars in this heartwarming and timeless story for readers of all ages. In the colorful Jungle of Nool, Horton discovers

something that at first seems impossible: a tiny speck of dust contains an entire miniature world--Who-ville--complete with houses and grocery stores and even a mayor! But when no one will stand up for the Whos of Who-ville, Horton uses his elephant-sized heart to save the day. This tale of compassion and determination proves that any person, big or small, can choose to speak out for what is right. This story showcases the very best of Dr. Seuss, from the moving message to the charming rhymes and imaginative illustrations. No bookshelf is complete without Horton and the Whos! Do you see what I mean? . . . They've proved they ARE persons, no matter how small. And their whole world was saved by the Smallest of All!

The Council of Animals Henry Holt and Company

Following real people and real science, *Environmental Science for a Changing World* provides a unique context for showing students how science works and how to think critically about environmental issues. Chapters don't merely include interesting stories they are examples of science journalism at its best, combining *Scientific American*-style writing, layout, and graphics to tell compelling stories that exemplify important concepts and issues. This approach has proven so effective that instructors using the book report a dramatic increase in the number of students who read the assignments and come to class ready to participate. This updated new edition features new

stories, updated scientific coverage, and enhanced Infographics—the book's signature visual study tool that combines memorable images, step-by-step callouts, and questions that foster scientific literacy. The book is organized into 11 chapters, each consisting of multiple modules focused on different aspects of environmental science, from ecology and evolution, to human interactions with the environment, to land, water, and energy resources. Although each module tells a compelling and relatable story, it is built on a core pedagogy of Guiding Questions that help students extract the scientific concepts that form the basis for the story. This edition also has its own dedicated version of Macmillan's online course space, LaunchPad, which is filled with

Video exercises, animations, graphing exercises, and assessments, including LearningCurve adaptive quizzing that help students apply the science, debunk misconceptions, and prepare for exams. *Biological Extinction* Ashland Creek Press Scientific American Environmental Science for a Changing World 4e Digital Update features engaging, real world stories and rich infographics that provide context for scientific processes and concepts, as well as events and decisions in your own life.

Wild Horse Country: The History, Myth, and Future of the Mustang, America's Horse New York : R.R. Bowker

Michelle Ann Abate examines a variety of texts that offer information, ideology, and even instructions on how to raise

kids right, not just figuratively, but politically. Highlighting the works of William Bennett, Lynne Cheney, Bill O'Reilly, and others, she brings together such diverse fields as cultural studies, literary criticism, political science, childhood studies, brand marketing, and the cult of celebrity. --from publisher description.

Scientific American Environmental Science for a Changing World Food & Agriculture Org.

“What a wonderful idea for an adventure! Absolutely inspired, timely, and important.” —Alistair Humphreys, National Geographic Adventurer of the Year and author of *The Doorstep Mile* and *Around the World by Bike* Outdoor educator and field researcher Sara Dykman made history when she became

the first person to bicycle alongside monarch butterflies on their storied annual migration—a round-trip adventure that included three countries and more than 10,000 miles. Equally remarkable, she did it solo, on a bike cobbled together from used parts. Her panniers were recycled buckets. In *Bicycling with Butterflies*, Dykman recounts her incredible journey and the dramatic ups and downs of the nearly nine-month odyssey. We're beside her as she navigates unmapped roads in foreign countries, checks roadside milkweed for monarch eggs, and shares her passion with eager schoolchildren, skeptical bar patrons, and unimpressed border officials. We also meet some of the ardent monarch stewards who supported her efforts, from citizen

scientists and researchers to farmers and high-rise city dwellers. With both humor and humility, Dykman offers a compelling story, confirming the urgency of saving the threatened monarch migration—and the other threatened systems of nature that affect the survival of us all.

Culture and Media Houghton Mifflin Harcourt

"Dog lovers and neuroscientists should both read this important book." -- Dr. Temple Grandin
What is it like to be a dog? A bat? Or a dolphin? To find out, neuroscientist and bestselling author Gregory Berns and his team did something nobody had ever attempted: they trained dogs to go into an MRI scanner -- completely awake -- so they could figure out what they think and feel.

And dogs were just the beginning. In *What It's Like to Be a Dog*, Berns takes us into the minds of wild animals: sea lions who can learn to dance, dolphins who can see with sound, and even the now extinct Tasmanian tiger. Berns's latest scientific breakthroughs prove definitively that animals have feelings very much like we do -- a revelation that forces us to reconsider how we think about and treat animals. Written with insight, empathy, and humor, *What It's Like to Be a Dog* is the new manifesto for animal liberation of the twenty-first century.

Children's Book-a-Day Almanac

Cambridge University Press

The many different animals that live in a great Kapok tree in the Brazilian rainforest try to convince a man with an

ax of the importance of not cutting down their home.

Conservation Catalysts Macmillan

Explores the significance of the Anthropocene for environmental politics, analysing political concepts in view of contemporary environmental challenges.

Endangered Species, Grades 2-6

Cambridge Scholars Publishing

A clever parable built on the subject of pollution and the waste of natural resources.

The Great Kapok Tree Macmillan Higher Education

One of the bestselling Big Bright and Early Board Book by Dr. Seuss, now in a larger trim size! This super-simple, super-sturdy board book edition of *The Foot Book*—Dr. Seuss's classic book about opposites—is now available in a

bigger trim size! An abridged version of the original Bright and Early Book by Dr. Seuss, it's the perfect way for babies and toddlers to step into the world of Dr. Seuss!

The End of Ice Da Capo Press

Celebrate Earth Day with Dr. Seuss and the Lorax in this classic picture book about protecting the environment! I am the Lorax. I speak for the trees. Dr. Seuss's beloved story teaches kids to speak up and stand up for those who can't. With a recycling-friendly "Go Green" message, *The Lorax* allows young readers to experience the beauty of the Truffula Trees and the danger of taking our earth for granted, all in a story that is timely, playful and hopeful. The book's final pages teach us that just one small seed, or one small child, can

make a difference. This book is the perfect gift for Earth Day and for any child—or child at heart—who is interested in recycling, advocacy and the environment, or just loves nature and playing outside. Unless someone like you cares a whole awful lot, nothing is going to get better. It's not.

The Little Hummingbird Princeton University Press

Describes the work of a man who tracks trash as it travels great distances by way of ocean currents.

Bicycling with Butterflies Greystone Books

Finalist for the 2020 PEN / E.O. Wilson Literary Science Writing Award

Acclaimed on its hardcover publication, a global journey that reminds us "of how magical the planet we're about to lose

really is" (Bill McKibben) With a new epilogue by the author After nearly a decade overseas as a war reporter, the acclaimed journalist Dahr Jamail returned to America to renew his passion for mountaineering, only to find that the slopes he had once climbed have been irrevocably changed by climate disruption. In response, Jamail embarks on a journey to the geographical front lines of this crisis—from Alaska to Australia's Great Barrier Reef, via the Amazon rainforest—in order to discover the consequences to nature and to humans of the loss of ice. In *The End of Ice*, we follow Jamail as he scales Denali, the highest peak in North America, dives in the warm crystal waters of the Pacific only to find ghostly coral reefs, and explores the tundra of St. Paul Island

where he meets the last subsistence seal hunters of the Bering Sea and witnesses its melting glaciers. Accompanied by climate scientists and people whose families have fished, farmed, and lived in the areas he visits for centuries, Jamail begins to accept the fact that Earth, most likely, is in a hospice situation. Ironically, this allows him to renew his passion for the planet's wild places, cherishing Earth in a way he has never been able to before. Like no other book, *The End of Ice* offers a firsthand chronicle—including photographs throughout of Jamail on his journey across the world—of the catastrophic reality of our situation and the incalculable necessity of relishing this vulnerable, fragile planet while we still can.

Scientific American Environmental Science For A Changing World Perfection Learning

Questions why species are becoming extinct, and how we can protect the natural world on which we all depend.

Dr. Seuss and Mr. Geisel Rutgers University Press

THE ENVIRONMENTAL SCIENCES MCQ (MULTIPLE CHOICE QUESTIONS) SERVES AS A VALUABLE RESOURCE FOR INDIVIDUALS AIMING TO DEEPEN THEIR UNDERSTANDING OF VARIOUS COMPETITIVE EXAMS, CLASS TESTS, QUIZ COMPETITIONS, AND SIMILAR ASSESSMENTS. WITH ITS EXTENSIVE COLLECTION OF MCQS, THIS BOOK EMPOWERS YOU TO ASSESS YOUR GRASP OF THE SUBJECT MATTER AND YOUR PROFICIENCY LEVEL. BY

ENGAGING WITH THESE MULTIPLE-CHOICE QUESTIONS, YOU CAN IMPROVE YOUR KNOWLEDGE OF THE SUBJECT, IDENTIFY AREAS FOR IMPROVEMENT, AND LAY A SOLID FOUNDATION. DIVE INTO THE ENVIRONMENTAL SCIENCES MCQ TO EXPAND YOUR ENVIRONMENTAL SCIENCES KNOWLEDGE AND EXCEL IN QUIZ COMPETITIONS, ACADEMIC STUDIES, OR PROFESSIONAL ENDEAVORS. THE ANSWERS TO THE QUESTIONS ARE PROVIDED AT THE END OF EACH PAGE, MAKING IT EASY FOR PARTICIPANTS TO VERIFY THEIR ANSWERS AND PREPARE EFFECTIVELY.

Raising Your Kids Right W. W. Norton & Company

We live in a world increasingly governed by technology—but to what end? Technology rules us as much as laws do.

It shapes the legal, social, and ethical environments in which we act. Every time we cross a street, drive a car, or go to the doctor, we submit to the silent power of technology. Yet, much of the time, the influence of technology on our lives goes unchallenged by citizens and our elected representatives. In *The Ethics of Invention*, renowned scholar Sheila Jasanoff dissects the ways in which we delegate power to technological systems and asks how we might regain control. Our embrace of novel technological pathways, Jasanoff shows, leads to a complex interplay among technology, ethics, and human rights. Inventions like pesticides or GMOs can reduce hunger but can also cause unexpected harm to people and the environment. Often, as in the case of

CFCs creating a hole in the ozone layer, it takes decades before we even realize that any damage has been done. Advances in biotechnology, from GMOs to gene editing, have given us tools to tinker with life itself, leading some to worry that human dignity and even human nature are under threat. But despite many reasons for caution, we continue to march heedlessly into ethically troubled waters. As Jasanoff ranges across these and other themes, she challenges the common assumption that technology is an apolitical and amoral force. Technology, she masterfully demonstrates, can warp the meaning of democracy and citizenship unless we carefully consider how to direct its power rather than let ourselves be shaped by it. *The Ethics of Invention*

makes a bold argument for a future in which societies work together—in open, democratic dialogue—to debate not only the perils but even more the promises of technology.

What It's Like to Be a Dog A&C Black Indian ecocriticism has not yet adequately demonstrated the applicability of ecological/deep ecological/tinai principles to visual texts. *Culture and Media: Ecocritical Explorations* closes this gap at the most opportune moment. Though this volume accommodates ecologically oriented interpretations from several cultures across the world, it reserves the centre stage for Indian ecocriticism and ecotheory quite appropriately. The volume effectively challenges the major documents on ecocriticism and theory

(published by international presses), which have been reluctant to give space to tinai criticism and theory that transcend Dravidian or Tamil boundaries. The day is not far when cinema of the world, shaped by tinai theory, will employ tinai hermeneutics to gain fresh insight, which, in turn, will feed into the processes of creation and production of relevant and great movies. *The Dragon Keeper* RH Childrens Books Horton, *Thidwick*, *Yertle*, the Lorax, the Grinch, *Sneetches*, and the *Cat in the Hat* are just a handful of the bizarre and beloved characters Theodor S. Geisel (1904–1991), alias Dr. Seuss, created in his forty-seven children's books, from 1937's *And to Think That I Saw It on Mulberry Street* to 1990's *Oh, the Places You'll Go!* During his lifetime Dr. Seuss

was honored with numerous degrees, three Academy Awards, and a Pulitzer, but the man himself remained a reclusive enigma. In this first and only biography of the good doctor, the authors, his close friends for almost thirty years, have drawn on their firsthand insights as well as his voluminous papers; the result is an illuminating, intimate portrait of a dreamer who saw the world "through the wrong end of a telescope," and invited us to enjoy the view.

The Foot Book Macmillan Higher Education

Why our cats are a danger to species diversity and human health In 1894, a lighthouse keeper named David Lyall arrived on Stephens Island off New Zealand with a cat named Tibbles. In just

over a year, the Stephens Island Wren, a rare bird endemic to the island, was rendered extinct. Mounting scientific evidence confirms what many conservationists have suspected for some time—that in the United States alone, free-ranging cats are killing birds and other animals by the billions. Equally alarming are the little-known but potentially devastating public health consequences of rabies and parasitic *Toxoplasma* passing from cats to humans at rising rates. *Cat Wars* tells the story of the threats free-ranging cats pose to biodiversity and public health throughout the world, and sheds new light on the controversies surrounding the management of the explosion of these cat populations. This compelling book traces the historical and cultural

ties between humans and cats from early domestication to the current boom in pet ownership, along the way accessibly explaining the science of extinction, population modeling, and feline diseases. It charts the developments that have led to our present impasse—from Stan Temple's breakthrough studies on cat predation in Wisconsin to cat-eradication programs underway in Australia today. It describes

how a small but vocal minority of cat advocates has campaigned successfully for no action in much the same way that special interest groups have stymied attempts to curtail smoking and climate change. *Cat Wars* paints a revealing picture of a complex global problem—and proposes solutions that foresee a time when wildlife and humans are no longer vulnerable to the impacts of free-ranging cats.
