There are few creative acts more mysterious and magical than writing a song. But what if the goal wasn't so mysterious and was actually achievable for anyone who wants to experience more magic and creativity in their life? That's something that anyone will be inspired to do after reading Jeff Tweedy's *How to Write One Song*. Why one song? Because the difference between one song and many songs isn't a cute semantic trick—it's an important distinction that can simplify a notoriously confusing art form. The idea of becoming a capital-S songwriter can seem daunting, but approached as a focused, self-contained event, the mystery and fear subsides, and songwriting becomes an exciting pursuit. And then there is the energizing, nourishing creativity that can open up. *How to Write One Song* brings readers into the intimate process of writing one song—lyrics, music, and putting it all together—and accesses the deep sense of wonder that remains at the

heart of this curious, yet incredibly fulfilling, artistic act. But it's equally about the importance of making creativity part of your life every day, and of experiencing the hope, inspiration, and joy available to anyone who's willing to get started.

A Publishers Weekly Best Book of 2018 “An important contribution to our understanding of how ordinary people found the strength to fight for equality for schoolchildren and their teachers.” —Wall Street Journal In the epic tradition of *Eyes on the Prize* and with the cultural significance of John Lewis's March trilogy, an ambitious and harrowing account of the devoted black educators who battled southern school segregation and inequality For two years an aging Dr. Horace Tate—a former teacher, principal, and state senator—told Emory University professor Vanessa Siddle Walker about his clandestine travels on unpaved roads under the cover of night, meeting with other educators and with Dr. King, Georgia politicians, and even U.S. presidents. Sometimes he and Walker spoke by phone, sometimes in his office, sometimes in his home; always Tate shared fascinating stories of the times leading up to and following *Brown v. Board of Education*. Dramatically, on his deathbed, he asked Walker to return to his office in Atlanta, in a building that was once the headquarters of another kind of southern strategy, one driven by integrity and equality. Just days after Dr. Tate's passing in 2002, Walker honored his wish. Up a dusty, rickety staircase, locked in a concealed attic, she found the collection: a massive archive documenting the underground actors and covert strategies behind the most significant era of the fight for educational justice. Thus began Walker's sixteen-year project to uncover the network of educators behind countless battles—in courtrooms, schools, and communities—for the education of black children. Until now, the courageous story of how black Americans in the South won so much and subsequently fell so far has been incomplete. *The Lost Education of Horace Tate* is a monumental work that offers fresh insight into the southern struggle for human rights, revealing little-known accounts of leaders such as W.E.B. Du Bois and James Weldon Johnson, as well as hidden provocateurs like Horace Tate.

A comprehensive history of the Georgians, comparing past views of these exciting, turbulent, and controversial times with our attitudes today. The Georgian era is often seen as a time of innovations. It saw the end of monarchical absolutism, global exploration and settlements overseas, the world's first industrial revolution, deep transformations in religious and cultural life, and Britain's role in the international trade in enslaved Africans. But how were these changes perceived by people at the time? And how do their viewpoints compare with attitudes today? In this wide-ranging history, Penelope J. Corfield explores every aspect of Georgian life—politics and empire, culture and society, love and violence, religion and science, industry and towns. People's responses at the time were often divided. Pessimists saw loss and decline, while optimists saw improvements and light. Out of such tensions came the Georgian culture of both experiment and resistance. Corfield emphasizes those elements of deep continuity that persisted even within major changes, and shows how new developments were challenged if their human consequences proved dire.

From the incomparable New York Times and New Yorker illustrator Tamara Shopsin, a debut novel about a NYC printer repair technician who comes of age alongside the Apple computer—featuring original artistic designs by the author. *LaserWriter II* is a coming-of-age tale set in the legendary 90s indie NYC Mac repair shop TekServe—a voyage back in time to when the internet was new, when New York City was gritty, and when Apple made quirky computers for weirdos. Our guide is Claire, a 19-year-old who barely speaks to her bohemian co-workers, but knows when it's time to strap on an antistatic bracelet. Tamara Shopsin brings us a classically New York novel, an ode to the city that once was, that couldn't feel more timely. Interweaving the history of digital technology with a tale both touchingly human and delightfully technical, Shopsin brings an idiosyncratic cast of characters to life with a light touch, a sharp eye, and an unmistakable voice. Filled with pixelated philosophy and lots of printers, *LaserWriter II* is, at its heart, a parable about an apple.

The bloodiest battle in the history of the British Army. In 1916 the Great War seemed caught in a stalemate. The British were determined to break it with a huge summer push. By the time the campaign wound down in November, it proved to be the most destructive ever encounter for the Army, seeing thousands of casualties for every day of the conflict. It wasn't meant to have been like this: the British had a massive artillery superiority, and were primed to crush their enemy. In the end, despite fierce fighting, the Germans lost far fewer men. The Somme has come to be an emblem for the horrors of war, for the pounding of shells and the hunkering down in rain-sodden trenches. What happened? How did it go so wrong for the British? Here in sharp detail, the bestselling writer John Harris tells the story of one the key battles of world history, describing in gripping terms how a series of events soon spiralled wildly, and hopelessly, out of control. This is an unforgettable history of assault and bitter defence that takes the reader into the ferocious heart of a conflict whose scars remain today.

"An inspiring and informative page-turner." —Walter Isaacson Longlisted for the FT/McKinsey Business Book of the Year Award The authoritative account of the race to produce the vaccines that are saving us all, from the #1 New York Times bestselling author of *The Man Who Solved the Market* Few were ready when a mysterious respiratory illness emerged in Wuhan, China in January 2020. Politicians, government officials, business leaders, and public-health professionals were unprepared for the most devastating pandemic in a century. Many of the world's biggest drug and vaccine makers were slow to react or couldn't muster an effective response. It was up to a small group of unlikely and untested scientists and executives to save civilization. A French businessman dismissed by many as a fabulist. A Turkish immigrant with little virus experience. A quirky Midwesterner obsessed with insect cells. A Boston scientist employing questionable techniques. A British scientist despised by his peers. Far from the limelight, each had spent years developing innovative vaccine approaches. Their work was met with skepticism and scorn. By 2020, these individuals had little proof of progress. Yet they and their colleagues wanted to be the ones to stop the virus holding the world hostage. They scrambled to turn their life's work into life-saving vaccines in a matter of months, each gunning to make the big breakthrough—and to beat each other for the glory that a vaccine guaranteed. A #1 New York Times bestselling author and award-winning Wall Street Journal investigative journalist lauded for his “bravura storytelling” (Gary Shteyngart) and “first-rate” reporting (The New York Times), Zuckerman takes us inside the top-secret laboratories, corporate clashes, and high-stakes government negotiations that led to effective shots. Deeply reported and endlessly gripping, this is a dazzling, blow-by-blow chronicle of the most consequential scientific breakthrough of our time. It's a story of courage, genius, and heroism. It's also a tale of heated rivalries, unbridled ambitions, crippling insecurities, and unexpected drama. *A Shot to Save the World* is the story of how science saved the world.

The shocking, definitive account of the 2020 election and the first year of the Biden presidency by two New York Times reporters, exposing the deep fissures within both parties as the country approaches a political breaking point. This is the authoritative account of an eighteen-month crisis in American democracy that will be seared into the country's political memory for decades to come. With stunning, in-the-room detail, New York Times reporters Jonathan Martin and Alexander Burns show how both our political parties confronted a series of national traumas, including the coronavirus pandemic, the January 6 attack on the Capitol, and the political brinkmanship of President Biden's first year in the White House. From Donald Trump's assault on the 2020 election and his ongoing campaign of vengeance against his fellow Republicans, to the behind-the-scenes story of Biden's selection of Kamala Harris as his running mate and his bitter struggles to unite the Democratic Party, this book exposes the degree to which the two-party system has been strained to the point of disintegration. More than at any time in recent history, the long-established traditions and institutions of American politics are under siege as a set of aging political leaders struggle to hold together a changing country. Martin and Burns break news on most every page, drawing on hundreds of interviews and never-before-seen documents and recordings from the

highest levels of government. The book asks the vitally important (and disturbing) question: can American democracy, as we know it, ever work again?

Kellie Jones traces how the artists in L.A.'s black communities during the 1960s and 70s created a vibrant, productive, and engaged activist arts scene in the face of structural racism through the production of art works that spoke to African American migration and L.A.'s racial politics.

Excerpt from Record of the Harris Family Descended From John Harris, Born in 1680 in Wiltshire, England IN 1898, when I did not know that I should ever have the leisure requisite to put into shape the genealogical material that has been accumulating in my hands during the last thirty years, I printed some notes on the ancestry of my children, thinking that they would at least furnish a clue to anyone who might hereafter become interested in the subject of the history of any of the families whose career is therein sketched, and might desire to make it the subject of a further study. The leisure which I then lacked has since come to me, and has enabled me to prepare a more complete account than is contained in the earlier book, of that branch of the Harris family which is descended from John Harris, born about 1680, in Wiltshire, England, through his two sons, John and Thomas, born, respectively, in 1717 and 1722. No record such as this can justly claim completeness or perfect accuracy. In the course of two hundred years some branches of a family stray away beyond recognition, and there are other branches, the members of which, who, though known, do not sympathize with the undertaking of making a family record, and will not, therefore, contribute their quota of information. And in many cases no accurate records have been kept, and the several accounts obtainable do not entirely harmonize. I have been most fortunate in finding many members of the family who have each been willing to take great pains to furnish full information as to that portion of the record which specially concerns each of them, and to the labors of these persons it is largely due that it has been possible to make so much of a history of the family as is contained in the following pages. The record is fairly complete down to the generation of the great - great grandchildren of the John Harris above named, which generation is called in the following pages the nineteenth; and as many persons of this generation are still living there should be no difficulty in each branch of the family carrying on for itself the record if it shall so desire. A swarm of enemy aircraft. A hopeless task. A brilliant commander. Kubaiyah, an RAF airstrip squeezed between a razor-like ridge and a harsh desert plain, must be defended. Armed with forty planes, all of which are training machines and biplanes, Boumphrey leads a brilliant squadron of men against the noxious might of Hitler's Luftwaffe. **Photographer and best-selling author Joe McNally shares stories and lessons from a life in photography.**

When Joe McNally moved to New York City in 1976, his first job was at the *Daily News* as a copy-boy, “the wretched dog of the newsroom.” He was earning the lowest pay grade possible and living in a cheap hotel in Manhattan. Life was not glamorous. But with a fierce drive, an eye for a picture,

and a willingness to take (almost) any assignment that came his way, Joe stepped out onto the always precarious tightrope of the freelance photographer—and never looked back. Fast forward 40 years, and his work has included assignments and stories for *National Geographic*, *Time*, *LIFE*, *Sports Illustrated*, and more. He has traveled for assignments to nearly 70 countries and received dozens of awards for his photography.

In *The Real Deal*, Joe tells us how it all started, and candidly shares stories, lessons, and insights he has collected along the way. This is not a dedicated how-to book about “where to put the light,” though there is certainly instructional information to be gleaned here. This is also not a navel-gazing look back at “the good old days,” because those never really existed anyway. Instead, *The Real Deal* is simply a collection of candid “field notes”—some short, some quite long—gathered over time that, together, become an intimate look behind the scenes at a photographer who has pretty much seen and done it all.

Though the photography industry bears little resemblance to the industry just 10 years ago (much less 40 years ago), what it really takes to become a successful photographer—the character traits, the fundamental lessons, the ability to adapt, and then adapt again—remains the same. Joe writes about everything from the crucial ability to know how to use (and make!) window light to the impor-

tance of creating long-term relationships built on trust; from lessons learned after a day in the field to the need to follow your imagination wherever it takes you; from the “random” and “lucky” moments that propel one’s career to the wonders and pitfalls of today’s camera technology. For every mention of f-stops and shutter speeds, there is equal discussion about the importance of access, the occasional moment of hubris, and the idea of becoming iconic.

Before Joe was a celebrated and award-winning photographer, before he was a well-respected educator and author of multiple bestselling books, he was just...Joe, hustling every day, from one assignment to the next, piecing together a portfolio, a skill set, a reputation, a career. He imagined a life—and then took pictures of it. Here are a few frames.
