Up to 1988, the December issue contained a cumulative list of decisions reported for the year, by act, docket numbers arranged in consecutive order, and cumulative subject-index, by act.

Board of Contract Appeals Decisions Government Printing Office

"A must-read for anyone interested in the history of civil rights, the roles and varied motivations of southern Jews in the movement, the interaction of blacks and Jews, the role of hate-groups and the anti-communist hysteria in silencing or harassing the forces of positive change, and the specific place of Miami, Miami Beach, and Florida in the struggle. Raymond Mohl's writing style is dynamic and fully accessible for the lay as well as scholarly audience that I expect this work will attract."--Mark K. Bauman, Atlanta Metropolitan College Using unusual and revealing primary materials from the careers of two remarkable Jewish women, Raymond Mohl offers an original interpretation of the role of Jewish civil rights activists in promoting racial change in post-World War II Miami. He describes the city's political climate after the war as characterized by segregation, aggressive anti-Semitism, and a powerful strain of cold war McCarthyism. In this hostile environment the dynamic leadership of two northern newcomers, Matilda "Bobbi" Graff and Shirley M. Zoloth, played a critical role in the city's campaign for racial reform. Working with the Miami chapter of the Civil Rights Congress,

established in 1948, Graff was instrumental in the organization's stand against the Ku Klux Klan, its protests against lynchings and police brutality, and its work with Florida's black civil rights leaders such as Harry T. Moore. With the Miami Congress of Racial Equality, Zoloth helped to launch a lunch counter sit-in campaign (a year before the more famous student sit-ins of 1960) that ultimately resulted in the desegregation of downtown public accommodations. This analysis of the movement between 1945 and 1960 substantiates a new but now dominant interpretation of civil rights history that sees grassroots action as the powerful engine that drove racial change. It emphasizes the major role played by women in the cause and documents the variety of civil rights experiences of Jews who migrated to Miami in large numbers during the mid-century decades. Committed to social justice, they built activist organizations, challenged segregationists and anti-Semites, and worked with black activists to break down Jim Crow barriers. Original documents written by both women, including Graff's autobiographical memoir, demonstrate a level of Jewish activism, especially by women, that was unique for the time and place--the postwar American South. Their own words vividly describe fear, harassment, family and community pressures, government intrigue, and individual betrayal. As Mohl's groundbreaking history illustrates, the perseverance of these women and their small band of supporters is a testament to their strength and an inspiration for continued reform in America. Raymond A. Mohl, professor of history at the University of Alabama, Birmingham, is the editor of *Searching for the Sunbelt: Historical Perspectives on a Region* and the coeditor of *The New African-American Urban History and Urban Policy in Twentieth-Century America*. *State Routes 78/111 Brawley Bypass, Imperial County* University Press of Florida  
 In 2004, an ad hoc committee was charged with preparing this third report examining the most senior S&T appointments to federal government

positions and updating the accompanying list of the most urgent S&T presidential appointments. Sufficient changes have occurred since the National Academies 2000 report on presidential appointmentsâ€”including the 2001 terrorist attacks, the anthrax deaths, the reorganization of homeland-security activities in the federal government, new developments in S&T, and concerns about the politicization of S&T decision making and adviceâ€”to warrant this new edition. In contrast with previous reports on the subject, this one covers not only presidential appointments to top S&T leadership positions but also the appointment of scientists, engineers, and health professionals to serve on federal advisory committees that focus on science-based policy or on the review of research proposals. The committee recognizes that other areas of federal responsibility are as important as S&T, but S&T appointments are the only ones within its purview.

Forrest and Gross expose the scientific failure, the religious essence, and the political ambitions of "intelligent design" creationism. They examine the movement's "Wedge Strategy," which has advanced and is succeeding through public relations rather than through scientific research. Analyzing the content and character of "intelligent design theory," they highlight its threat to public education and to the separation of church and state.

[Biological Threats and Terrorism](#) Oxford University Press

In the wake of September 11th and recent anthrax events, our nation's bioterrorism response capability has become an imminent priority for policymakers, researchers, public health officials, academia, and the private sector. In a three-day workshop, convened by the Institute of Medicine's Forum on Emerging Infections, experts from each of these communities came together to identify, clarify, and prioritize the next steps that need to be taken in order to prepare and strengthen bioterrorism response capabilities. From the discussions, it became clear that of utmost urgency is the need to cast the issue of a response in an appropriate framework in order to attract the attention of Congress and the public in order to garner sufficient and sustainable support for such initiatives. No matter how the issue is cast, numerous workshop participants agreed that there are many gaps in the public health infrastructure and countermeasure capabilities that must be prioritized and addressed in order to assure a rapid and effective response to another bioterrorist attack.

The global threat of nuclear weapons is one of today's key policy issues. Using a wide variety of sources, including recently declassified information, Nathan E. Busch offers detailed examinations of the nuclear programs in the United States, Russia, China, Iraq, India, and Pakistan, as well as the

emerging programs in Iran and North Korea. He also assesses the current debates in international relations over the risks associated with the proliferation of nuclear weapons in the post--Cold War world. Busch explores how our understanding of nuclear proliferation centers on theoretical disagreements about how best to explain and predict the behavior of states. His study bridges the gap between theory and empirical evidence by determining whether countries with nuclear weapons have adequate controls over their nuclear arsenals and fissile material stockpiles (such as highly enriched uranium and plutonium). Analyzing the strengths and weaknesses of various systems of nuclear weapons regulation, Busch projects what types of controls proliferating states are likely to employ and assesses the threat posed by the possible theft of fissile materials by aspiring nuclear states or by terrorists. No End in Sight provides the most comprehensive and up-to-date analysis of issues at the forefront of contemporary international affairs. With the resurgence of the threat of nuclear terrorism, Busch's insights and conclusions will prove critical to understanding the implications of nuclear proliferation.
