Marvel at the majesty of Ospreys, navigate the ocean with storm-petrels, and nest with Mourning Doves, all while learning about the richness of the birds' lives, the complexities of their habits, and how we can help keep their populations vibrant and aloft for generations to come.

Celtic Cosmology and the Otherworld Rowman & Littlefield

The early medieval manuscripts of Ireland and Britain contain tantalizing clues about the cosmology, religion and mythology of native Celtic cultures, despite censorship and revision by Christian redactors. Focusing on the latest research and translations, the author provides fresh insight into the beliefs and practices of the Iron Age inhabitants of Ireland, Britain and Gaul. Chapters cover creation and cosmogony, the deities of the Gaels, feminine power in narrative sources, druidic belief, priestesses and magical rites.

The Johns Hopkins University Circular Oxford University Press

By evaluating the Internet's impact on key cultural issues of the day, this book provides a comprehensive overview of the seismic technological and cultural shifts the Internet has created in contemporary society. Books about Internet culture usually focus on the people, places, sites, and memes that constitute the "cutting-edge" at the time the book is written. That approach, alas, renders such volumes quickly obsolete. This provocative work, on the other hand, focuses on overarching themes that will remain relevant for the long term. The insights it shares will highlight the tremendous impact of the Internet on modern civilization—and individual lives—well after specific players and sites have fallen out of favor. Content is presented in two volumes. The first emphasizes the positive impact of Internet culture—for example, 24-hour access to information, music, books, merchandise, employment opportunities, and even romance. The second discusses the Internet's darker consequences, such as a demand for instant news that often pushes journalists to prioritize being first over being right, online scams, and invasions of privacy that can affect anyone who banks, shops, pays bills, or posts online. Readers of the set will clearly understand how the Internet has revolutionized communications and redefined human interaction, coming away with a unique appreciation of the realities of today's digital world—for better and for worse.

Debates for the Digital Age [2 volumes] Taylor & Francis

When you want only one source of information about your city or county, turn to County and City Extra. This trusted reference compiles information from many sources to provide all the key demographic and economic data for every state, county, metropolitan area, congressional district, and for all cities in the United States with a 2010 population of 25,000 or more. In one volume, you can conveniently find data from 1990 to 2015 in easy-to-read tables. No other resource compiles

this amount of detailed information into one place. Subjects covered in County and City Extra include: • Population by age and race • Government finances • Income and poverty • Manufacturing, trade, and services • Crime • Housing • Education • Immigration and migration • Labor force and employment • Agriculture, land, and water • Residential construction • Health resources • Voting and elections The main body of this volume contains five basic parts and covers the following areas: Part A-States Part B-Counties Part C-Metropolitan areas Part D-Cities with a 2010 census population of 25,000 or more Part E-Congressional districts In addition, this publication includes: • Figures and text in each section that highlight pertinent data and provide analysis • Ranking tables which present each geography type by various subjects including population, land area, population density, educational attainment, housing values, race, unemployment, and crime • Multiple color maps of the United States on various topics including median household income, poverty, voting, and race Furthermore, this volume contains several appendixes which include: • Notes and explanations for further reference • Definitions of geographic concepts • A listing of metropolitan and micropolitan areas and their component counties • A list of cities by county • Maps showing congressional districts, counties, and selected places within each state New in the 24th edition: This edition includes data from the 2012 Economic Census, recently released for states, counties, metropolitan areas, and cities. Table E has been expanded to include newly available County Business Patterns data for Congressional Districts. Table E includes a wide selection of 2014 American Community Survey data, Social Security data, and data from the 2012 Census of Agriculture for the congressional districts of the 114th Congress, along with the 114th Congressional representatives.

Governments of the Northeast 2019 Oxford University Press, USA

A call to redefine mobility so that it is connected, heterogeneous, intelligent, and personalized, as well as sustainable, adaptable, and city-friendly. The twentieth century was the century of the automobile; the twenty-first will see mobility dramatically re-envisioned. Automobiles altered cityscapes, boosted economies, and made personal mobility efficient and convenient for many. We had a century-long love affair with the car. But today, people are more attached to their smartphones than their cars. Cars are not always the quickest mode of travel in cities; and emissions from the rapidly growing number of cars threaten the planet. This book, by three experts from industry and academia, envisions a new world of mobility that is connected, heterogeneous, intelligent, and personalized (the CHIP architecture). The authors describe the changes that are coming. City administrators are shifting from designing cities for cars to designing cities for people. Nations and cities will increasingly employ targeted user fees and offer subsidies to nudge consumers toward more sustainable modes. The sharing economy is coaxing many consumers to shift from being owners of assets to being users of services. The auto industry is responding with connected cars that double as virtual travel assistants and by introducing autonomous driving. The CHIP architecture embodies an integrated, multimode mobility system that builds on ubiquitous connectivity, electrified and autonomous vehicles, and a marketplace open to innovation and entrepreneurship. Consumers will exercise choice on the basis of user experience and efficiency, aided by "intelligent advisors," accessible through their mobile devices. An innovative mobility architecture reconfigured for this century is a social and economic necessity; this book charts a

course for achieving it.

This book explores the discrepancies among what protections Title IX provides to pregnant and parenting students, what colleges communicate, and what pregnant and parenting students actually experience. To actually protect pregnant and parenting students, the authors argue that a school must provide multifaceted support that is effectively communicated to an entire campus community, including students who are parenting, who are pregnant, and who may become pregnant. The first part of the book portrays the realities of pregnancy and parenting in college. The chapters illuminate related Title IX applications, population demographics, how unplanned pregnancies in college occur, and physical and mental health challenges that these students often experience. The authors then discuss what compliance with Title IX legally entails and why meeting it is often an afterthought. In the second half of the book, the authors use mixed-methods research to map the compliance landscapes of three schools in the southeast as examples: a large state school, a mid-size private university, and a small private college. Offering eye-opening interviews with pregnant and parenting students, interdisciplinary research, and proposals for multifaceted support and communication on college campuses, this volume will engage students, scholars, and activists with an interest in higher education administration, educational policy, reproductive health, bioethics, gender studies, and rhetoric.

National Journal Reports McFarland

Nearly 900 African Americans fought in the Battle of Iwo Jima, but accounts of their service have gone largely unrecorded. This book seeks to correct that omission for the sake of the brave Americans who served and for the sake of a more inclusive American history. Eleven veterans contribute their memories and experiences, starting with their youth in the Depression, their enlistment, the battle itself, and their experience of returning to a nation that continued to treat them as second-class citizens. Appendices include a history of the Montford Point Marines, a history of the Army's 476th Amphibian Truck Company, a chronology of the Battle of Iwo Jima and a task organization chart for the participating U.S. forces.

Looking Back While Living Forward: an Autobiography Christian Faith Publishing, Inc.

After Sir Isaac Newton revealed his discovery that white light was compounded of more basic colored rays, he was hailed as a genius and became an instant international celebrity. An interdisciplinary enthusiast and intellectual giant in a number of disciplines, Newton published revolutionary, field-defining works that reached across the scientific spectrum, including the

Principia Mathematica and Opticks. His renown opened doors for him throughout his career, ushering him into prestigious positions at Cambridge, the Royal Mint, and the Royal Society. And yet, alongside his public success, Newton harbored religious beliefs that set him at odds with law and society, and, if revealed, threatened not just his livelihood but his life. Religion and faith dominated much of Newton's life and work. His papers, never made available to the public, were filled with biblical speculation and timelines along with passages that excoriated the early Church fathers. Indeed, his radical theological leanings rendered him a heretic, according to the doctrines of the Anglican Church. Newton believed that the central concept of the Trinity was a diabolical fraud and loathed the idolatry, cruelty, and persecution that had come to define religion in his time. Instead, he proposed a "simple Christianity"--a faith that would center on a few core beliefs and celebrate diversity in religious thinking and practice. An utterly original but obsessively private religious thinker, Newton composed several of the most daring works of any writer of the early modern period, works which he and his inheritors suppressed and which have been largely inaccessible for centuries. In *Priest of Nature*, historian Rob Iliffe introduces readers to Newton the religious animal, deepening our understanding of the relationship between faith and science at a formative moment in history and thought. Previous scholars and biographers have generally underestimated the range and complexity of Newton's religious writings, but Iliffe shows how wide-ranging his observations and interests were, spanning the entirety of Christian history from Creation to the Apocalypse. Iliffe's book allows readers to fully engage in the theological discussion that dominated Newton's age. A vibrant biography of one of history's towering scientific figures, *Priest of Nature* is the definitive work on the spiritual views of the man who fundamentally changed how we look at the universe.

Beyond Wiping Noses AuthorHouse

Many studies of teacher motivation have been conducted in different contexts over time. However, until fairly recently there has not been a reliable measure available to allow comparisons across samples and settings. This has resulted in an abundance of findings which cannot be directly compared or synthesised. The FIT-Choice instrument offers the opportunity to examine motivations across settings. The various studies in this book suggest that people who choose teaching as a career are motivated by a complex interaction of factors embedded within communities and cultural expectations, but seem generally to embrace a desire to undertake meaningful work that makes for a better society. Unlike some careers, where rewards are in the form of salary and status, by and large these factors are not strong drivers for people who want to become teachers. They want to work with children and adolescents, and believe they have the ability to teach.

New Life for Archaeological Collections explores solutions to what archaeologists are calling the "curation crisis," that is, too much stuff with too little research, analysis, and public interpretation. This volume demonstrates how archaeologists are taking both large and small steps toward not only solving the dilemma of storage but recognizing the value of these collections through inventorying and cataloging, curation, rehousing, artifact conservation, volunteer and student efforts, and public exhibits. Essays in this volume highlight new questions and innovative uses for existing archaeological collections. Rebecca Allen and Ben Ford advance ways to make the evaluation and documentation of these collections more accessible to those inside and outside of the scholarly discipline of archaeology. Contributors to *New Life for Archaeological Collections* introduce readers to their research while opening new perspectives for scientists and students alike to explore the world of archaeology. These essays illuminate new connections between cultural studies and the general availability of archaeological research and information. Drawing from the experience of university professors, government agency professionals, and cultural resource managers, this volume represents a unique commentary on education, research, and the archaeological community.

Annual Report of the Comptroller of the Treasury Department for the Fiscal Year Ended ... to the General Assembly of Maryland Crown House Publishing Ltd

Middle and high school students must become proficient readers and writers to successfully meet the requirements of the secondary curricula and be adequately prepared for college, employment, and citizenship. 'Literacy Across the Curriculum' is a guide for educators who are concerned with how students experience literacy instruction across the secondary school curriculum and need strategies for raising student performance levels.

Birds of Maryland, Delaware, and the District of Columbia Lulu.com

For fifty years, the Camp Cadet program provides young people positive experiences with law enforcement for the primary purpose of improved community relations. It is only fitting that the Pennsylvania State Police receive recognition for creating Camp Cadet. Unique for its time, Camp Cadet was conceived to reach young people differently than previously done by law enforcement. This unique program continues within Butler County where it originated and expanded elsewhere throughout Pennsylvania as well as other states. Camp Cadet brings youth together with law enforcement for the primary purpose of improved community relations. The goal was for youth to gain a better understanding of law enforcement through building a better relationship with youth. Such a successful program which expanded to other states deserves to be documented. For 50 years, Camp Cadet provided youth positive experiences with law enforcement. The reader will learn about the societal challenges that prompted creating Camp Cadet. Never previously reported insights are provided, as can only occur by those who began and sustained the program. The ups

and downs and recollections are envisioned to encourage continuation of this program with a sincere outreach to the youth of America.
