Absolute Power: Unlock Potential. Fulfill Your Destiny. Hay House, Inc

Dr. Joseph Murphy's classic book *The Power of Your Subconscious Mind* was first published in 1963 and became an immediate bestseller; it was acclaimed as one of the best self-help guides ever written. Following the success of this work, Dr. Murphy lectured to thousands of people around the world, and millions tuned in to his daily radio program. In his lectures, he pointed out how real people have radically improved their lives by applying specific aspects of his concepts. Now, these lectures have been combined, edited, and updated in six books that bring Dr.

Murphy's teachings into the 21st century and provide readers with his proven tools on how to program their subconscious minds so that they can radically improve their lives. This is Book 1 of the series. Within these pages, Dr. Murphy reminds us that we all worry—mostly about things that will never happen. Worry robs us of vitality, enthusiasm, and energy; and often causes ulcers, high blood pressure, and other debilitating diseases. Dr. Murphy teaches us how to replace fear and worry with harmony, peace, and love, and recommends prayers and meditations that will cleanse the mind of irrational concerns and implant uplifting ideas into the subconscious.

"I know that I'll be evaluated in Seattle with wins and losses, as that is the nature of my profession for the last thirty-five years. But our record will not be what motivates me. Years ago I was asked, 'Pete, which is better: winning or competing?' My response was instantaneous: 'Competing. . . because it lasts longer.'" Pete Carroll is one of the most successful coaches in football today. As the head coach at USC, he brought the Trojans back to national prominence, amassing a 97-19 record over nine seasons. Now he shares the championship-winning philosophy that led USC to seven straight Pac-10 titles. This same mind-set and culture will shape his program as he returns to the NFL to coach the Seattle Seahawks. Carroll developed his unique coaching style by trial and error over his career. He learned that you get better results by teaching instead of screaming, and by helping players grow as people, not just on the field. He learned that an upbeat, energetic atmosphere in the locker room can coexist with an unstoppable

competitive drive. He learned why you should stop worrying about your opponents, why you should always act as if the whole world is watching, and many other contrarian insights. Carroll shows us how the Win Forever philosophy really works, both in NCAA Division I competition and in the NFL. He reveals how his recruiting strategies, training routines, and game-day rituals preserve a team's culture year after year, during championship seasons and disappointing seasons alike. Win Forever is about more than winning football games; it's about maximizing your potential in every aspect of your life. Carroll has taught business leaders facing tough challenges. He has helped troubled kids on the streets of Los Angeles through his foundation A Better LA. His words are true in any situation: "If you want to win forever, always compete."

"With cutting-edge research, penetrating insights, and practical examples, Shawn Achor describes a new conception of 'success,' and in doing so, reveals exciting new strategies we can use to meet our highest potential."—Gretchen Rubin, bestselling author of *The Happiness Project* "A vibrant book on how to bring out the best in others—and how they can bring out the best in us."—Adam Grant, #1 New York Times bestselling author of *Think Again* and host of the podcast *WorkLife* In a world that thrives on competition and individual achievement, we're measuring and pursuing potential incorrectly. Pursuing success in isolation—pushing others away as we push ourselves too hard—not only limits our potential but makes us more stressed and disconnected than ever. Harvard-trained researcher Shawn Achor reveals a better approach. With exciting new research combining neuroscience and psychology with Big Data, Achor shows that our potential is not limited by what we alone can achieve. Instead, it is determined by how we complement, contribute to, and benefit from the abilities and achievements of people around us. When we—as individuals, leaders, and parents—chase only individual achievement, we leave vast sources of potential untapped. But once we put "others" back into the equation, and work to make others better, we ignite a Virtuous Cycle of cascading successes that amplify our own. The

dramatic shifts in how we approach work today demand an equally dramatic shift in our approach to success. In *Big Potential*, Achor draws on cutting-edge original research as well as his work with nearly half of the Fortune 100 and with places like NASA, the NFL and the NBA, and offers a new path to thriving in the modern world.

There is an enormous amount of wasted potential within organizations today because most do not adequately tap in to the wealth of human capital available to them. Most organizations believe that they are meritocracies, but that is a myth that masks the real situation of unequal opportunity that exists in most firms. Exclusionary tendencies are built into leadership, management, and human resources practices that perpetuate unequal opportunity. Most companies “sort and select,” hiring others most like themselves, and focus training and development on those who are identified as high potential. This book makes a business case for a new inclusive model of human resource development, driven by the demands of increasingly diverse workplaces and

continuing expansion of the global economy. It demonstrates that people who succeed often acquire their talent because of the development attention they have received, and it shows how to create a culture of inclusion and development to unlock employee potential and productivity. The authors’ approach — developing talent in all employees and aligning human resource systems and senior leadership commitment with that goal — is a response to a business challenge facing corporate North America today. The patterns of exclusion and preference that limit human potential are universal; this book offers management insights for any corporate audience serious about maximizing productivity in the competitive global economy.
