The 13 papers in this collection examine the coastal regions, the Gulf of Maine, and the continental shelf off of Atlantic Canada in context with new radiocarbon age analyses, providing a detailed history of climate changes, marine transgression, emergence, and relative sea-level history.

Specific topics include deglaciation of the Gulf of Maine, Late Quaternary morphogenesis of a marine-limit delta plain in southwest Maine, morainal banks and the deglaciation of coastal Maine, and glacial dynamics, deglaciation, and marine invasion in southern Quebec. Material originated at a March 1998 symposium held in Maine at the 33rd Annual Meeting of the Northeastern Section of the Geological Society of America. Weddle is affiliated with the Maine Geological Survey. Retelle teaches geology at Bates College. Annotation copyrighted by Book News Inc., Portland, OR.

Current Population Survey Interviewing Manual U OF M MUSEUM ANTHRO ARCHAEOLOGY

In this key title, Lester Telser, the world's core theorist, explores several distinct areas to skilfully bring the ideas of core theory to bear on a range of issues within economics - with particular emphasis on supply and demand and the way markets function.

World War II Soviet Armed Forces (3) C&T Publishing Inc

Multi-objective programming (MOP) can simultaneously optimize multi-objectives in mathematical programming models, but the optimization of multi-objectives triggers the issue of Pareto solutions and complicates the derived answers. To address these problems, researchers often incorporate the concepts of fuzzy sets and evolutionary algorithms into MOP models. Focusing on the methodologies and applications of this field, Fuzzy Multiple Objective Decision Making presents mathematical tools for complex decision making. The first part of the book introduces the most popular methods used to calculate the solution of MOP in the field of multiple objective decision making (MODM). The authors describe multi-objective evolutionary algorithms; expand de novo programming to changeable spaces, such as decision and objective spaces; and cover network data envelopment analysis. The second part focuses on various applications, giving readers a practical, in-depth understanding of MODM. A follow-up to the authors' Multiple Attribute Decision Making: Methods and Applications, this book guides practitioners in using MODM methods to make effective decisions. It also extends students' knowledge of the methods and provides researchers with the foundation to publish papers in operations research and management science journals.

The Core Theory in Economics Geological Society of America

Bored with sewing the same old blocks? Get a bonanza of 75 modern quilt blocks from a bestselling modern designer! You'll love these fresh angular designs inspired by city life, and the mix-and-match possibilities are endless! Elizabeth Hartman gets you started with six complete sampler quilts to sew. Each block is shown in three different fabric palettes. The book includes easy-to-follow cutting charts and instructions for every block. Some have links to full-size freezer-paper templates. Change up blocks, sizes, or fabrics to embark on a limitless exploration of modern style. "The instructions are straightforward . . . an excellent choice for quilting collections." —Library Journal

U.S. Geological Survey Professional Paper Yellowreef Limited

Why are American cities, suburbs, and towns so distinct? Compared to European cities, those in the United States are characterized by lower densities and greater distances; neat, geometric layouts; an abundance of green space; a greater level of social segregation reflected in space; and—perhaps most noticeably—a greater share of individual, single-family detached housing. In *Zoned in the USA*, Sonia A. Hirt argues that zoning laws are among the important but understudied reasons for the cross-continental differences. Hirt shows that rather than being imported from Europe, U.S. municipal zoning law was in fact an institution that quickly developed its own, distinctly American profile. A distinct spatial culture of individualism—founded on an ideal of separate, single-family residences apart from the dirt and turmoil of industrial and agricultural production—has driven much of municipal regulation, defined land-use, and, ultimately, shaped American life. Hirt explores municipal zoning from a comparative and international perspective, drawing on archival resources and contemporary land-use laws from England, Germany, France, Australia, Russia, Canada, and Japan to challenge assumptions about American cities and the laws that guide them.

GCSE Maths Edexcel Student Book - Higher Taylor & Francis

- actual GCE exam question-types
- must-have critical resource for students and tutors
- all trick question-types since 1996 covered
- full and complete step by step solutions
- Complete edition eBook only

Advances in Information Retrieval Yellowreef Limited

This superb CGP in-depth Student Book covers everything you need to succeed in Edexcel 9-1 GCSE Maths. It's packed with detailed, accessible notes, backed up with fully worked examples. Practice questions and exam-style questions are included throughout, complete with worked solutions. Each section is rounded off with a review exercise - perfect for recapping all of the content pupils have learnt. We've even included handy references to the Edexcel specification and learning objectives so you know exactly which bits of the spec are covered by each part of the book.

The site of Olszanica, in southeastern Poland, contains remains of a large Early Neolithic settlement of the Linear Pottery culture. This monograph presents the results of the archaeological excavations conducted from 1967 to 1973.

Zoned in the USA Springer

This textbook on Environmental Biotechnology not only presents an unbiased overview of the practical biological approaches currently employed to address environmental problems, but also equips readers with a working knowledge of the science that underpins them. Starting with the fundamentals of biotechnology, it subsequently provides detailed discussions of global environmental problems including microbes and their interaction with the environment, xenobiotics and their remediation, solid waste management, waste water treatment, bioreactors, biosensors, biomining and biopesticides. This book also covers renewable and non-renewable bioenergy resources, biodiversity and its conservation, and approaches to monitoring biotechnological industries, genetically modified microorganism and foods so as to increase awareness. All chapters are written in a highly accessible style, and each also includes a short bibliography for further research. In summary this textbook offers a valuable asset, allowing students, young researchers and professionals in the biotechnology industry to grasp the basics of environmental biotechnology.

Winds-aloft Observations, Effective September 1, 1972 CGP Ltd

- completely covers all question-types since 2000
- exposes all "trick" questions
- provides step-by-step solutions
- most efficient method of learning, hence saves time
- examples arrange from easy-to-hard to facilitate easy absorption
- advanced trade book
- Complete edition and concise edition eBooks available

Bulletin Museum Tusculanum Press

This book addresses the question of variability in backed bladelet-based technologies. It also

examines the role of LSA microlithic industries as adaptive strategies for coping with paleoenvironmental changes in North Africa. The multidisciplinary research activities conducted in caves and open-air sites in North Africa over the past two decades have highlighted the importance of this region for understanding the development of LSA microlithic technologies in Africa. This book, therefore, enriches the debate of origin and the spread of Late Pleistocene microlithic technologies in North Africa and beyond. Previously published in *African Archaeological Review* Volume 37, issue 3, September 2020

An important tenet of game theory, core theory has nonetheless been all but ignored by the mainstream. Its basic premise is that individuals band together in order to promote their interests as much as possible. The return to an individual depends on competition among various coalitions for its membership, and a group of people can obtain a joint maximum by suitable coordinated actions. In this key title, Lester Telser investigates the following issues: Markets Multiproduct Industry Total Cost Functions with Avoidable Costs Critical Analyses of Noncooperative Equilibria. Through these distinct sections, Telser skilfully brings the ideas of core theory to bear on a range of issues within economics - with particular emphasis on supply and demand and the way markets function.

Quilters learn something new each month and improve their skills with this joyful tribute to the seasons. Twenty-four projects-two for each month of the year-introduce a variety of techniques, one step at a time. Quilters begin with a simple project that teaches a new technique, and then build their proficiency with a larger quilt project. These projects include wall hangings, table runners, door hangers, mantel toppers, pillows, and pillowcases. Quilt the Seasons teaches piecing, appliqué, trapunto, and embellishments.

Welcome to Santiago de Compostela! We are pleased to host the 27th Annual European Conference on Information Retrieval Research (ECIR2005) on its first visit to Spain. These

proceedings contain the refereed full papers and poster abstracts presented at ECIR 2005. This conference was initially established by the Information Retrieval Specialist Group of the British Computer Society (BCS-IRSG) under the name "Annual Colloquium on Information Retrieval Research." The colloquium was held in the United Kingdom each year until 1998, when the event was organized in Grenoble, France. Since then the conference venue has alternated between the United Kingdom and Continental Europe, reflecting the growing European orientation of ECIR. For the same reason, in 2001 the event was renamed "European Conference on Information Retrieval Research." In recent years, ECIR has continued to grow and has become the major European forum for the discussion of research in the field of information retrieval. ECIR 2005 was held at the Technical School of Engineering of the University of Santiago de Compostela, Spain. In terms of submissions, ECIR 2005 was a record-breaking success, since 124 full papers were submitted in response to the call for papers. This was a sharp increase from the 101 submissions received for ECIR 2003, which was the most successful ECIR in terms of submissions. ECIR 2005 established also a call for posters, and 41 posters were submitted. Paper and poster submissions were received from across Europe and further afield, including North America, South America, Asia and Australia, which is a clear indication of the growing popularity and reputation of the conference.

This book presents a detailed analysis of the Soviet armed forces during the final days of the war, covering the soldiers that successfully turned the tide against the Nazi onslaught and pushed it back into Germany itself. This final part of the series documents the Red Army's push through Germany to Berlin, which eventually culminated in the surrender of the German forces to the Allies in 1945. It also offers a detailed breakdown of all the armed forces that conducted the offensive campaigns on the Eastern Front, including the army, air force, paratroopers, navy and NKVD troops. Its colourful illustrations also include the uniforms and organizations of the Russian forces serving against Japan until the eventual surrender of all Japanese Imperial forces in August 1945.
