Cuba Betrayed, first published in 1962, is an autobiographical work of former Cuban dictator Fulgencio Batista, in which he expresses his viewpoint regarding his two terms as dictator, his defeat, and his successors—Cuba's "Betrayers." "The book is not meant to be a literary masterpiece. Still less has there been any attempt at stylistic elegance. It is, rather, an exposition of facts, a narration based on memory and notes."—Introduction
Exile, the Writer's Experience Building Research Establishment
 When A.E. van Vogt wove several of his classic stories of *The Rull* into a novel, he created a work of enduring popularity in the science fiction field. Now back in print for the first time in the 1990s, this Tor edition includes "The First Rull," a story that postdates the novel and makes this book the first complete edition of the saga of the war between humanity and the alien shapechangers.
Travels Through France and Italy Cambridge University Press
 "This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries. Its starting point is the striking variation in African economic performance. Unevenness and inequalities form a central fact of African economic experiences. The authors highlight not only differences between countries, but also variations within countries, differences often organized around distinctions of gender, class, and ethnic identity. For example, neo-natal mortality and school dropout have been reduced, particularly for some classes of women in some areas of Africa. Horticultural and agribusiness exports have grown far more rapidly in some countries than in others. These variations (and many others) point to opportunities for changing performance, reducing inequalities, learning from other policy experiences, and escaping the ties of structure, and the legacies of a colonial past. The book rejects teleological illusions and Eurocentric prejudice, but it does pay close attention to the results of policy in more industrialized parts of the world. Seeing the contradictions of capitalism for what they are - fundamental and enduring - may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth, linear process, or that it would be were certain impediments suddenly removed. The authors criticize a wide range of orthodox and heterodox economists, especially for their cavalier attitude to evidence. Drawing on their own decades of research and policy experience, they combine careful use of available evidence from a range of African countries with political economy insights (mainly derived from Kalecki, Kaldor and Hirschman) to make the

policy case for specific types of public sector investment"--

President Carthew was in his office when the monster appeared - a giant, hunched creature, bizarrely hideous...The President gaped as a guard appeared in the doorway and pointed his weapon at the fanged being. "Don't shoot!" Carthew cried, but too late. The beast lay dead on the floor. Carthew sighed deeply as he confirmed his fears. The corpse on the floor was Sperling, his best secret agent, transformed into this hairy brute by the dread peril that threatened to destroy them all. Only one man left alive might be able to ward off total doom. The President flashed an emergency call for Captain Future...

Selected Writings of Girolamo Savonarola Rand Corporation
 Distilled from Donald Palmer's more than 30 years of teaching experiences, this approachable text, historically organized text exemplifies Dr. Palmer's very successful light-hearted approach to teaching introduction to philosophy. Through the use of humor, drawings, charts, and diagrams, serious philosophical topics come alive for the readers--without compromising the seriousness of the subject matter. The text can be used as a core text or as a supplement to any reader.

The ideas of information as an autonomous variable and of the primacy of theoretical knowledge have been recurrent themes in discussions of the information society. In this series of eight essays, Julian Warner provides a contrasting perspective on: Developing a manifesto for the study of information technologies in human history, Ways in which information technology is differentiated from standard economic concept of productive technology, Historical perspective to copyright, electronic communication and information retrieval, The meta-object distinction as manifested in information retrieval research and system development, Various forms and instruments of labor as related to the design and maintenance of information systems, Past and future developments in the evolution of a discipline. Together, they put a humanistic face on our often-unconscious notions of information technology

This new book by the well-known anthropologists Jean and John L. Comaroff explores the global preoccupation with criminality in the early twenty-first century, a preoccupation strikingly disproportionate, in most places and for most people, to the risks posed by lawlessness to the conduct of everyday life. Ours in an epoch in which law-making, law-breaking, and law-enforcement are ever more critical registers in which societies construct, contest, and confront truths about themselves, an epoch in which criminology, broadly defined, has displaced sociology as the privileged means by which the social world knows itself. They also

argue that as the result of a tectonic shift in the triangulation of capital, the state, and governance, the meanings attached to crime and, with it, the nature of policing, have undergone significant change; also, that there has been a palpable muddying of the lines between legality and illegality, between corruption and conventional business; even between crime-and-policing, which exist, nowadays, in ever greater, hyphenated complicity. Thinking through Crime and Policing is, therefore, an excursion into the contemporary Order of Things; or, rather, into the metaphysic of disorder that saturates the late modern world, indeed, has become its leitmotif. It is also a meditation on sovereignty and citizenship, on civility, class, and race, on the law and its transgression, on the political economy of representation.

Clive James has been close to death for several years, and he has written about the experience in a series of deeply moving poems. In *Sentenced to Life*, he was clear-sighted as he faced the end, honest about his regrets. In *Injury Time*, he wrote about living well in the time remaining, focusing our attention on the joys of family and art, and celebrating the immediate beauty of the world. When *The River in the Sky* opens, we find James in ill health but high spirits. Although his body traps him at home, his mind is free to roam, and this long poem is animated by his recollection of what life was and never will be again; as it resolves into a flowing stream of vivid images, his memories are emotionally supercharged 'by the force of their own fading'. In this form, the poet can transmit the felt experience of his exceptional life to the reader. As ever with James, his enthusiasm is contagious; he shares his wide interests with enormous generosity, making brilliant and original connections, sparking passion in the reader so that you can explore the world's treasures yourself. Because this is not just a reminiscence, it's a wise and moving preparation for and acceptance of death. As James realizes that he is only one bright spot in a galaxy of stars, he passes the torch to the poets of the future, to his young granddaughter, and to you, his reader. A book that could not have been written by anyone else, this is Clive James at the height of his considerable powers: funny, wise, deeply felt, and always expressed with an unmatched power for clarity of expression and phrase-making that has been his hallmark.

Five hundred years after his death at the stake, Girolamo Savonarola remains one of the most fascinating figures of the Italian Renaissance. This wide-ranging collection, with an introduction by historian Alison Brown, includes translations of his sermons and treatises on pastoral ministry, prophecy, politics, and moral reform, as well as the correspondence with Alexander VI that led to Savonarola's silencing and excommunication. Also included are first-hand accounts of religio-civic festivities instigated by Savonarola and of his last moments. This collection demonstrates the remarkable extent of Savonarola's contributions to the religious, political, and aesthetic debates of the late fifteenth century.

According to Roger Caillois, play is an occasion of pure waste. In spite of this - or because of it - play constitutes an essential element of human social and spiritual development. In this study, the author defines play as a free and voluntary activity that occurs in a pure space, isolated and protected from the rest of life.

The first collection to address the collective transformation

happening in response to the rise of social media With the rise of web 2.0 and social media platforms taking over vast tracts of territory on the internet, the media landscape has shifted drastically in the past 20 years, transforming previously stable relationships between media creators and consumers. The Social Media Reader is the first collection to address the collective transformation with pieces on social media, peer production, copyright politics, and other aspects of contemporary internet culture from all the major thinkers in the field. Culling a broad range and incorporating different styles of scholarship from foundational pieces and published articles to unpublished pieces, journalistic accounts, personal narratives from blogs, and whitepapers, The Social Media Reader promises to be an essential text, with contributions from Lawrence Lessig, Henry Jenkins, Clay Shirky, Tim O'Reilly, Chris Anderson, Yochai Benkler, danah boyd, and Fred von Loehmann, to name a few. It covers a wide-ranging topical terrain, much like the internet itself, with particular emphasis on collaboration and sharing, the politics of social media and social networking, Free Culture and copyright politics, and labor and ownership. Theorizing new models of collaboration, identity, commerce, copyright, ownership, and labor, these essays outline possibilities for cultural democracy that arise when the formerly passive audience becomes active cultural creators, while warning of the dystopian potential of new forms of surveillance and control.

Netwar-like cyberwar-describes a new spectrum of conflict that is emerging in the wake of the information revolution. Netwar includes conflicts waged, on the one hand, by terrorists, criminals, gangs, and ethnic extremists; and by civil-society activists (such as cyber activists or WTO protestors) on the other. What distinguishes netwar is the networked organizational structure of

its practitioners-with many groups actually being leaderless-and their quickness in coming together in swarming attacks. To confront this new type of conflict, it is crucial for governments, military, and law enforcement to begin networking themselves.
