This directory lists education institutions world-wide where professional education and training programmes in the field of library, archive and information science are carried out at a tertiary level of education or higher. More than ten years after the publication of the last edition, this up-to-date reference source includes more than 900 universities and other institutions, and more than 1,500 relevant programmes. Entries provide contact information as well as details such as statistical information, tuition fees, admission requirements, programmes' contents.

World Guide to Special Libraries: Libraries M-Z. Index Springer

The Encyclopedia of Library and Information Sciences, comprising of seven volumes, now in its fourth edition, compiles the contributions of major researchers and practitioners and explores the cultural institutions of more than 30 countries. This major reference presents over 550 entries extensively reviewed for accuracy in seven print volumes or online. The new fourth edition, which includes 55 new entries and 60 revised entries, continues to reflect the growing convergence among the disciplines that influence information and the cultural record, with coverage of the latest topics as well as classic articles of historical and theoretical importance.

Leadership Formation in the African Context Firenze University Press

In the ever-evolving landscape of information technology within library and information science, scholars often find themselves navigating a complex web of diverse research areas. The broad spectrum of topics, ranging from digital libraries to artificial intelligence, poses a significant challenge for academic scholars seeking a comprehensive understanding of the field's intricacies. The absence of a consolidated resource tailored to the specific needs of graduate students, professors, and practitioners further exacerbates this issue. *Multidisciplinary Approach to Information Technology in Library and Information Science* addresses the pressing challenges faced by scholars in the realm of library and information science. This reference handbook serves as a beacon, illuminating the multifaceted interactions and impacts of technologies on information resources. This book delves into the ethical, legal, and social implications of information technology across diverse contexts - libraries, information centers, archives, museums, education, business, government, and healthcare.

Pichi Sermolli's work with his more than 2750 collections of plants from nearly 150 localities on the Lake Tana expedition in Ethiopia in 1937 was interrupted by World War II, but completed in 1947 at the Royal Botanic Gardens, Kew, and the British Museum (Natural History), UK. It resulted in preliminary accounts of the vegetation published 1938-40 and a taxonomically arranged account in 1951, all in Italian. Pichi Sermolli's observations are difficult to locate due to the imperfect maps of the time, but in this book the authors have reconstructed the sequence of the collections, georeferenced the localities, and updated the identifications of the species. By reconstructing Pichi Sermolli's observations, it is possible to draw conclusions about the vegetation and compare with a recent model of the vegetation of Ethiopia. According to this, the vegetation of the Lake Tana Basin was a complex mosaic of woodland, scrub, forest, farmland and lake shore vegetation now difficult to interpret in detail. Pichi Sermolli's study of the vegetation in the Semien Mountains demonstrated for the first time the zonation of Ericaceous woodland and Afroalpine vegetation, within which he distinguished *Carex monostachya* bogs, Afroalpine grasslands with *Lobelia rhynchopetalum*, and stony and rocky Afroalpine vegetation. This book interprets Pichi Sermolli's observations in English and compares them with modern knowledge of the region, partly obtained by the present authors'

own field work. It demonstrates how Pichi Sermolli's studies form a valuable contribution to the understanding of the Ethiopian flora and vegetation.

As the academic and scholarly landscape are continuously enhanced by the advent of new technology, librarians must be aware and informed to develop and implement best practices. Effective administration of libraries is a crucial part of delivering library services to patrons and ensuring that information resources are disseminated efficiently. *Advanced Methodologies and Technologies in Library Science, Information Management, and Scholarly Inquiry* provides emerging information on modern knowledge management and effective means of sharing research through libraries. While highlighting the importance of digital literacy and information resources, readers will also learn new methods in information retrieval and research methods in quality scholarly inquiry. This book is an important resource for librarians, administrators, information science professionals, information technology specialists, students, and researchers seeking current information on the importance of effective library science technology.

The teachings of Christian leadership have been dominated by a focus on the influence of a leader on its followers. Samuel Deressa's new book, *Leadership Formation in the African Context*, highlights how an African concept of community and holistic approach to ministry provides a biblically sound approach to understanding leadership formation and practice in this new age. This book links the issue of missional leadership with the life of the congregation. It provides theological and practical insights into how we can understand leadership formation in contexts where churches are engaged in the *Missio Dei* as a community of believers.

Technology has revolutionized the ways in which libraries store, share, and access information, as well as librarian roles as knowledge managers. As digital resources and tools continue to advance, so too do the opportunities for libraries to become more efficient and house more information. Effective administration of libraries is a crucial part of delivering library services to patrons and ensuring that information resources are disseminated efficiently. *Digital Libraries and Institutional Repositories: Breakthroughs in Research and Practice* addresses new methods, practices, concepts, and techniques, as well as contemporary challenges and issues for libraries and university repositories that can be accessed electronically. It also addresses the problems of usability and search optimization in digital libraries. Highlighting a range of topics such as content management, resource sharing, and library technologies, this publication is an ideal reference source for librarians, IT technicians, academicians, researchers, and students in fields that include library science, knowledge management, and information retrieval.

While web-based accessible materials have offered academic libraries an effective approach to managing electronic records and resources for its service population, a cross-discipline approach has not yet been executed. Cases on Electronic Records and Resource Management Implementation in Diverse Environments brings together real-life examples of how electronic records and resource management have been implemented across disciplines. Offering theories amid legal and ethical concerns of electronic records and resource management, this publication is essential for professionals involved in the education of library and information science and the training of individuals responsible for electronic records management in various disciplines.

The Borana Plateau of Southern Ethiopia IGI Global

The original forests of the central and northern highlands of Ethiopia are almost entirely confined to the "sacred groves" surrounding the churches and monasteries of the Ethiopian Orthodox Tewahido Church. In Ethiopian tradition sanctity starts from the Tabot on the altar of the church and extends to the outer periphery of the compound. Church forests serve as shade and shelter for the sacred, and are seen as integral parts of the churchyard. The Act of Gebre Menfes Qiddus (GGMQ) is an original Ethiopic hagiographic text. It depicts the life and struggle of the saint in the wilderness of forests and mountains. Hagiographic texts like GGMQ are in Ethiopia not mere historical records, but texts linked to the daily liturgical services that shape and mould the perceptions and actions of their readers and listeners. The aim of the thesis is to analyse how GGMQ presents the relation between the saint and the natural environment in order to see if there is a correlation with how the Ethiopian tradition has preserved the church forests and has considered these to be sacred spaces representing the wilderness. The aim is achieved through a close reading of the text and its intertexts using four selected themes as analytical instruments: ascetic estrangement, coexistence with non-human creation, identification with the angels and reconciliation of opposites. The analysis, and the fact that the GGMQ is one of the most venerated texts, read and heard with great liturgical solemnity, show that there are good reasons to believe that the constant reading of GGMQ has made and makes a significant impact upon the readers' views on the mutual co-habitation of human and non-human creation and the development of an awareness of the need to preserve the wilderness and non-human creation.

Erstmals wird hier die Fülle der englischsprachigen Äthiopienliteratur geordnet dargeboten. In 100 Sections führt der Autor alle für die wissenschaftliche Beschäftigung mit Äthiopien wichtigen Buch- und Zeitschriftenbeiträge zum Beispiel zur "History of Research", "Archaeology", "Religion", aber auch Fragen der "Sociology", "Agriculture", "Zoology" und "Medical Sciences" auf. Wie im Falle der deutschsprachigen Literatur ("Bibliographia Aethiopica: Die äthiopienkundliche Literatur des deutschsprachigen Raumes" = Äthiopiologische Forschungen 9 [1982]) berücksichtigt der Autor auch alle ihm zugänglichen Besprechungen, womit bei einer Aufnahme von mehr als 24.000 Titeln eine Art "Bibliographic Encyclopedia" entstanden ist.

This book examines the process and events surrounding the migration of African scholars, as well as their lives and lived experiences within and outside of their colleges and universities. The chapters chronicle the lived-experiences and observations of African scholars in North America and examine a range of issues, ideas, and phenomena within North American colleges and universities. The contributors examine the political, ethnic, or religious upheavals that informed their migration or banishment; contrast the teaching-learning-research environment in Africa and North America; and discuss on and off-campus experience with segregation and racial inequality. This book will be of interest to students and scholars of the African Diaspora, migration, and African Studies.

As the world moves further into urbanization, there is a greater need for construction materials to

meet society's needs. As natural resources become scarce, the use of recycled materials for construction purposes has become increasingly common. Over the past decade, there has been a significant increase in the utilization of recycled materials in the construction industry. This will result in substantial advantages in structure and infrastructure construction coupled with a reduction in the construction cost, as well as improving sustainability. However, significant development limitations and many relevant considerations must be addressed when using recycled materials in construction. This book introduces innovative and alternative construction materials used in civil engineering.

This book advances an in-depth, comprehensive analysis of flagship universities in Africa - the largest, most selective, and most prestigious universities on the continent. The book draws on a range of country-specific case-studies, including Botswana, Egypt, Ethiopia, Ghana, Kenya, Mauritius, Nigeria, Senegal, Tanzania and Zambia, to explore a range of issues associated with flagship universities and their role in higher education in Africa. Newly-established institutions in new nation states, and states emerging from conflict, often rely on these flagship universities to train their academics, and build their intelligentsia; flagship universities are thus capacity-builders and trend-setters in their respective countries and sub-regions. This volume brings together a range of scholars to celebrate the impact, influence and contributions of African universities, not only within Africa, but across the globe. The book will be of great significance to students and researchers in the field of education, particularly those with an interest in sociology and politics of higher education.

Africa faces serious challenges in the world of globalisation. One of the most serious and basic of these challenges is that of information and communication technologies. Meeting the range of social, economic and political goals in the contemporary world requires the meeting of the information challenge. This volume - primarily the product of a specialist meeting at Cornell University - provides both overview and detail on how this challenge can be and is being met.

Cybersecurity for Information Professionals MTH Multimedia S.L.

Information professionals have been paying more attention and putting a greater focus on privacy over cybersecurity. However, the number of both cybersecurity and privacy breach incidents are soaring, which indicates that cybersecurity risks are high and growing. Utilizing cybersecurity awareness training in organizations has been an effective tool to promote a cybersecurity-conscious culture, making individuals more cybersecurity-conscious as well. However, it is unknown if employees' security behavior at work can be extended to their security behavior at home and personal life. On the one hand, information professionals need to inherit their role as data and information gatekeepers to safeguard data and information assets. On the other hand, information professionals can aid in enabling effective information access and dissemination of cybersecurity knowledge to make users conscious about the cybersecurity and privacy risks that are often hidden in the cyber universe. *Cybersecurity for Information Professionals: Concepts and Applications* introduces fundamental concepts in cybersecurity and addresses some of the challenges faced by information professionals, librarians, archivists, record managers, students, and professionals in related disciplines. This book is written especially for educators preparing courses in information security, cybersecurity, and the integration of privacy and cybersecurity. The chapters contained in this book present multiple and diverse perspectives from professionals in the field of cybersecurity. They cover such topics as: Information governance and cybersecurity User privacy and security online and the role of information professionals Cybersecurity and social media Healthcare regulations, threats, and their impact on cybersecurity A socio-technical perspective on mobile cybersecurity Cybersecurity in the software development life cycle Data security and privacy Above all, the book addresses the ongoing challenges of cybersecurity. In particular, it explains how information professionals can contribute to long-term workforce development by designing and leading cybersecurity awareness campaigns or cybersecurity hygiene programs to change people's security behavior.
