FREDERICK NICOLE

The Curse of the Pharaohs Simon and Schuster
 From a New York Times bestselling author, Egyptologist Amelia Peabody, now a wife and mother, returns to catch a murderer at an excavation of an ancient tomb. It's 1892, and Amelia and her now-husband Radcliffe Emerson have settled down in Victorian England after their escapade in Egypt. They're raising their young son Ramses and everything seems normal—until they are approached by a damsel in distress. Lady Baskerville's husband, Sir Henry, has died after uncovering what might be a royal tomb in Luxor. Despite rumors of a curse haunting all those involved with the dig, Amelia and Radcliffe proceed to Egypt and realize that Sir Henry did not die a natural death. Accidents continue to plague the dig, and talk of a pharaoh's curse runs rampant among the group. Amelia begins to suspect that these accidents are caused by a sinister human—but who?
Kid Detective Zet - the Egyptian Mysteries Simon and Schuster

The inside story, told by excavators of the extraordinary discovery of the world's oldest papyri, revealing how Egyptian King Khufu's men built the Great Pyramid at Giza. Pierre Tallet's discovery of the Red Sea Scrolls—the world's oldest surviving written documents—in 2013 was one of the most remarkable moments in the history of Egyptology. These papyri, written some 4,600 years ago, and combined with Mark Lehner's research, changed what we thought we knew about the building of the Great Pyramid at Giza. Here, for the first time, the world-renowned Egyptologists Tallet and Lehner give us the definitive account of this astounding discovery. The story begins with Tallet's hunt for hieroglyphic rock inscriptions in the Sinai Peninsula and leads up to the discovery of the papyri, the diary of Inspector Merer, who oversaw workers in the reign of Pharaoh Khufu in Wadi el-Jarf, the site of an ancient harbor on the Red Sea. The translation of the papyri reveals how the stones of the Great Pyramid ended up in Giza. Combined with Lehner's excavations of the harbor at the pyramid construction site the Red Sea Papyri have greatly advanced our understanding of how the ancient Egyptians were able to build monuments that survive to this day. Tallet and Lehner narrate this thrilling discovery and

explore how the building of the pyramids helped create a unified state, propelling Egyptian civilization forward. This lavishly illustrated book captures the excitement and significance of these seminal findings, conveying above all how astonishing it is to discover a contemporary eyewitness testimony to the creation of the only remaining Wonder of the Ancient World.

Eve of the Pharaoh Harper Collins

Said to have been dictated by Joseph Smith as a translation of an ancient Egyptian scroll purchased in Kirtland, Ohio, in 1835, the *Book of Abraham* may be Mormonism's most controversial scripture. Decades of impassioned discussion began when about a dozen fragments of Smith's Egyptian papyri, including a facsimile from the *Book of Abraham*, were found in the New York Metropolitan Museum in 1966. The discovery solved a mystery about the origin of the Egyptian characters that appear in the various manuscript copies of the *Book of Abraham* from 1835, reproduced from one of the fragments. Some LDS scholars devised arguments to explain what seemed to be clear evidence of Smith's inability to translate Egyptian. In this book, Dan Vogel not only highlights the problems with these apologetic arguments but explains the underlying source documents in revealing detail and clarity.

The Lost Scroll of the Physician Scholastic Inc.

Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülrü Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised "dead" drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll's patterns could be used to design a three-dimensional vault.

The Moses Scroll Chronicle Books

Winner of the 2014 Sami Rohr Prize for Jewish Literature A thousand years ago, the most perfect copy of the Hebrew Bible was written. It was kept safe through one upheaval after another in the Middle East, and by the 1940s it was housed in a dark grotto in Aleppo, Syria, and had become known around the world as the Aleppo Codex. Journalist Matti Friedman's true-life detective story traces how this precious manuscript was smuggled from its hiding place in Syria into the newly founded state of Israel and how and why many of its most sacred and valuable pages went missing. It's a tale that involves grizzled secret agents, pious clergymen, shrewd antiquities collectors, and highly placed national figures who, as it turns out, would do anything to get their hands on an ancient, decaying book. What it reveals are uncomfortable truths about greed, state cover-ups, and the fascinating role of historical treasures in creating a national identity.
