Environment and Planning Routledge

Urban planning on the five Lusophone African countries - Angola, Cape Verde, Guinea-Bissau, Mozambique, and Sao Tome and Príncipe - has so far been relatively overlooked in planning literature. Bringing together a team of leading scholars, this book fills the gap by providing an in-depth analysis of key issues in the history of urban planning and discussing the key challenges confronting contemporary urban planning in these countries. The book argues that urban planning is a non-neutral and non-value free kind of public action and, therefore, ideology, planning theories, urban models and the ideological role urban planning has played are some of the key issues addressed. For that reason, the practice of Urban Planning is also seen as the outcome of a complex interrelationship between structure and agency, with the role of key planers being examined in some of the chapters. The findings and insights presented by the contributing authors

confirm previous research on urban planning in the colonial and postcolonial periods in Lusophone African countries and at the same time break fresh ground and offer additional insights as new evidence has been collected from archives and in fieldwork carried out by a new generation of researchers. In addition, it outlines possible directions for future research.

Urban Design and Planning for Age-Friendly Environments Across Europe: North and South Thomas Telford

Safety and Reliability – Theory and Applications contains the contributions presented at the 27th European Safety and Reliability Conference (ESREL 2017, Portorož, Slovenia, June 18-22, 2017). The book covers a wide range of topics, including: • Accident and Incident modelling • Economic Analysis in Risk Management • Foundational Issues in Risk Assessment and Management • Human Factors and Human Reliability • Maintenance Modeling and Applications • Mathematical Methods in Reliability and Safety • Prognostics and System Health Management • Resilience Engineering • Risk Assessment • Risk Management • Simulation for Safety and Reliability Analysis • Structural Reliability • System Reliability, and • Uncertainty Analysis. Selected special sessions include

contributions on: the Marie Skłodowska-Curie innovative training network in structural safety; risk approaches in insurance and finance sectors; dynamic reliability and probabilistic safety assessment; Bayesian and statistical methods, reliability data and testing; organizational factors and safety culture; software reliability and safety; probabilistic methods applied to power systems; socio-technical-economic systems; advanced safety assessment methodologies: extended Probabilistic Safety Assessment; reliability; availability; maintainability and safety in railways: theory & practice; big data risk analysis and management, and model-based reliability and safety engineering. Safety and Reliability – Theory and Applications will be of interest to professionals and academics working in a wide range of industrial and governmental sectors including: Aeronautics and Aerospace, Automotive Engineering, Civil Engineering, Electrical and Electronic Engineering, Energy Production and Distribution, Environmental Engineering, Information Technology and Telecommunications, Critical Infrastructures, Insurance and Finance, Manufacturing, Marine Industry, Mechanical Engineering, Natural Hazards, Nuclear Engineering, Offshore Oil and Gas, Security and Protection, Transportation, and Policy Making.

Routledge Revivals: Planning and Urban Growth in Southern Europe (1984) Routledge

"This book covers a multitude of newly developed hardware and software technology advancements in urban and spatial planning and architecture, drawing on the most current research and studies of field practitioners who offer solutions and recommendations for further growth, specifically in urban and spatial developments"--

Computer-based Modelling and Optimization in Transportation Council of Europe

This book collects a selection of the best articles presented at the CUPUM (Computers in Urban Planning and Urban Management) conference, held in the second week of July 2013 in Utrecht, the Netherlands. The articles included were selected by external reviewers using a double blind process.

Trends and Innovations in Urban E-Planning Springer Nature

During 2000/2001 exceptionally high winter rainfall resulted in major ground instability problems on the Isle of Wight, and coincided with the completion of important research on the predicted impacts of climate change on unstable coastal and mountainous areas. These proceedings highlight the importance of implementing coastal and landslide management strategies and integrating the research findings into strategic planning and development control policies.

Technologies for Urban and Spatial Planning: Virtual Cities and Territories Frontiers Media SA Issues in Urban Policy and Planning / 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Transportation Policy. The editors have built Issues in Urban Policy and Planning: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Transportation Policy in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Urban Policy and Planning: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Fodor's Portugal ScholarlyEditions

The digital transformation of the 21st century has affected all facets of society and has been highly advantageous in many industries, including urban planning and regional development. The practices, strategies, and developments surrounding urban e-planning in particular have been constantly shifting and adapting to new innovations as they arrive. Trends and Innovations in Urban E-Planning provides an updated panorama of the main trends, challenges, and recent innovations in the field of e-planning through the critical perspectives of diverse experts. This book adds new and updated evidence on recent changes in this field and provides critical insights on these innovations. Covering topics such as citizen engagement, land property management, and spatial planning, this book is an essential resource for students and educators of higher education, researchers, urban planners, engineers, public officials, community groups, and academicians.

Emerging Issues, Challenges, and Opportunities in Urban E-Planning Alinea Editrice

Growing urban populations have resulted in the development of marginal land and brownfield sites as well as increasing the desirability of maximum utilisation of underground space. As a result, there is an increasing need for urban planners and developers to understand the geotechnical and geo-environmental issues involved in urban construction. Hidden aspects of urban planning aims to raise the awareness of geotechnical and geo-environmental issues among urban planners and within the urban planning frameworks across Europe.

Urban Play and the Playable City: A Critical Perspective Random House Digital, Inc.

At YouGuide™, we are dedicated to bringing you the finest travel guides on the market, meticulously crafted for every type of traveler. Our guides serve as your ultimate companions, helping you make the most of your journeys around the world. Our team of dedicated experts works tirelessly to create comprehensive, up-to-date, and captivating travel guides. Each guide is a treasure trove of essential information, insider insights, and captivating visuals. We go beyond the tourist trail, uncovering hidden treasures and sharing local wisdom that transforms your travels into extraordinary adventures. Countries change, and so do our guides. We take pride in delivering

the most current information, ensuring your journey is a success. Whether you're an intrepid solo traveler, an adventurous couple, or a family eager for new horizons, our guides are your trusted companions to every country. For more travel guides and information, please visit www.youguide.com

This book brings together the notions of material school design and educational governance in the first such text to address this critical interrelationship in any depth. In addressing the issue of governance through analysing current and historical material school designs, it looks at the intersection of politics, economics, aesthetics and pedagogical ideas and practices. More specifically, it explores and unfolds educational governance as it is constituted, materialized and transformed in and through material school designs. It does so by studying a range of issues: from the material and aesthetic language of schooling to the design of the built environment, from spatial organization to the furnishing and equipment of classrooms, and from technologies of regulation to the incorporation of tools of learning. The book presents examples from Europe, Latin and Central America and the United States, and relates to the past, present and future of governance and school design. It focuses on design processes and on designers/architects and people involved in the planning of school design, as well as on school leaders, teachers and pupils adopting, inhabiting and re-shaping them in everyday school life. Furthermore, the book discusses how to study governance by material school design, and how to act upon governance by material design on wishful, actual and ethical terms.

Urban Planning in Lusophone African Countries ScholarlyEditions

This book explores how lessons from past urban planning experiences can inform current debates on urban agriculture. Productive landscapes today have been posited as instruments for the positive transformation related to territorial fragility and abandonment, promoting social cohesion, food security and wider environmental and economic benefits. The book will re-map the way in which seeming landscape limitations and challenges can be turned into potential, innovation and a new lease of urban-rural life. It does so by drawing on significant past urban agricultural experiences in planning as vectors for new critical reflections relevant to re-igniting ideas for future envisioning of urban scenarios in which productive landscapes play fundamental transformative roles. The focus is on planning ideas and the roles of key individual planners, all of which have designed agricultural strategies for the city at some point in their careers. It intends to help us today reimagine urban-rural relationships, and the transformation of under or mis-used urban open spaces, peri-urban areas, fringe conditions and in-between spaces.

Utopia(s) - Worlds and Frontiers of the Imaginary IGI Global

Planning the charging infrastructure for electric vehicles (EVs) is a new challenging task. This book treats all involved aspects: charging technologies and norms, interactions with the electricity system, electrical installation, demand for charging infrastructure, economics of public infrastructure provision, policies in Germany and the EU, external effects, stakeholder cooperation, spatial planning on the regional and street level, operation and maintenance, and long term spatial planning.

New Approaches, Methods, and Tools in Urban E-Planning IGI Global

With In the Skin of the City, António Tomás traces the history and transformation of Luanda, Angola, the nation's capital as well as one of the oldest settlements founded by the European colonial powers in the Southern Hemisphere. Drawing on ethnographic and archival research alongside his own experiences growing up in Luanda, Tomás shows how the city's physical and social boundaries—its skin—constitute porous and shifting interfaces between center and margins, settler and Native, enslaver and enslaved, formal and informal, and the powerful and the powerless. He focuses on Luanda's "asphalt frontier"—the (colonial) line between the planned urban center and the ad hoc shantytowns that surround it—and the ways squatters are central to Luanda's historical urban process. In their relationship with the state and their struggle to gain rights to the city, squatters embody the process of negotiating Luanda's divisions and the sociopolitical forces that shape them. By illustrating how Luanda emerges out of the continual redefinition of its skin, Tomás offers new ways to understand the logic of urbanization in cities across the global South.

Ecopolis Springer Science & Business Media

This book provides an overview of the typical nature-based solutions (NBS) used for flood mitigation at different scales and in different areas (e.g. from catchment to hillslope scale; from urban to coastal areas). NBS can provide several ecosystem services, such as water regulation and

water quality enhancement, and as such offer relevant technical solutions to complement typical grey infrastructures to mitigate flood hazard and water quality problems. In recent years, political awareness and interest from the scientific community have led to increasing implementation of NBS worldwide. In light of this trend, this book provides valuable insights into the environmental aspects of NBS, particularly their effectiveness for flood and pollution mitigation, and discusses socio-economic aspects related to the implementation of NBS, including regulatory aspects, cost, and citizens' perceptions of NBS. Compiling the latest research, the book furthers our understanding of the role of NBS for flood mitigation and its relation to environmental aspects, to guide scientists and stakeholders in future NBS projects. It is intended for the scientific community and stakeholders, such as spatial planners and landscape managers. Chapter "Nature-based solutions for flood mitigation and resilience in urban areas" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Local Governance in Cape Verde Springer Science & Business Media

First published in 1984, this book addresses key questions about the pattern of urban development in Southern Europe and the mechanisms employed to control and regulate this development in individual countries. It examines five countries – Greece, Italy, Portugal, Spain and Turkey – that have experienced different scales and rates of urbanization and industrialization. It identifies common problems arising from these processes, as well as the successes and failures of the planning policies employed to regulate development. This book will be of great value to geographers interested in Southern Europe and urban and regional planners interested in comparative patterns of development.

Issues in Urban Policy and Planning: 2011 Edition KIT Scientific Publishing

This practical look at the methods used by experienced professionals in the urban revitalization field describes why this field is important and how the actual work is done. Case studies, charts, chapter analyses and web resources are all included in this desk reference for students and professionals.

Making Business Districts Work Routledge

This edited collection provides an introduction to the emerging interdisciplinary field of cultural mapping, offering a range of perspectives that are international in scope. Cultural mapping is a mode of inquiry and a methodological tool in urban planning, cultural sustainability, and community development that makes visible the ways local stories, practices, relationships, memories, and rituals constitute places as meaningful locations. The chapters address themes, processes, approaches, and research methodologies drawn from examples in Australia, Canada, Estonia, the United Kingdom, Egypt, Italy, Malaysia, Malta, Palestine, Portugal, Singapore, Sweden, Syria, the United Arab Emirates, the United States, and Ukraine. Contributors explore innovative ways to encourage urban and cultural planning, community development, artistic intervention, and public participation in cultural mapping—recognizing that public involvement and artistic practices introduce a range of challenges spanning various phases of the research process, from the gathering of data, to interpreting data, to presenting "findings" to a broad range of audiences. The book responds to the need for histories and case studies of cultural mapping that are globally distributed and that situate the practice locally, regionally, nationally, and internationally.

In the Skin of the City Duke University Press

This volume brings together works resulting from research carried out by members of the EURO Working Group on Transportation (EWGT) and presented during meetings and workshops organized by the Group under the patronage of the Association of European Operational Research Societies in 2012 and 2013. The main targets of the EWGT include providing a forum to share research information and experience, encouraging joint research and the development of both theoretical methods and applications, and promoting cooperation among the many institutions and organizations which are leaders at national level in the field of transportation and logistics. The primary fields of interest concern operational research methods, mathematical models and computation algorithms, to solve and sustain solutions to problems mainly faced by public administrations, city authorities, public transport companies, service providers and logistic operators. Related areas of interest are: land use and transportation planning, traffic control and simulation models, traffic network equilibrium models, public transport planning and management, applications of combinatorial optimization, vehicle routing and scheduling, intelligent transport systems, logistics and freight transport, environment problems, transport safety, and impact evaluation methods. In this volume, attention focuses on the following topics of interest: · Decision-making and decision support · Energy and Environmental Impacts · Urban network design ·

Optimization and simulation · Traffic Modelling, Control and Network Traffic Management ·
Transportation Planning · Mobility, Accessibility and Travel Behavior · Vehicle Routing
Issues in Urban Policy and Planning: 2013 Edition Springer Nature
Recent advances in information and communication technologies have enhanced the standards of

metropolitan planning and development. These innovations have led to new opportunities in this
evolving profession. Emerging Issues, Challenges, and Opportunities in Urban E-Planning brings
together the efficiency of web-based tools and digital technologies with the practice of spatial

planning. Focusing on the utilization of geographic information systems, computer-assisted design,
visualization concepts, and database management systems, this book is a pivotal reference source
for planners, policymakers, researchers, and graduate students interested in how recent
technological advancements are enhancing the traditional practices in urban planning.
