The Tears of Greed Elsevier

New edition includes the sentencing and identifies Don Steenkamp as the murderer for the first time ... Just after dusk on Good Friday, 6 April 2012, the peace and quiet permeating the small Northern Cape town of Griekwastad was disrupted when a young teenage boy sped into town in his father's Isuzu bakkie and screeched to a halt in front of the town's nearly deserted police station to announce that his parents and sister had been brutally shot and killed on the family farm, Naauwhoek Based on interviews with all the role-players, including the investigating officers on the case, the forensic and ballistic experts, and family and friends of the deceased, this is the riveting account of what really happened on Naauwhoek farm on that fateful day, as told by the reporter who first broke the story ...

Practical Guide for General Nursing Science Pt 2 Partridge Africa

How old is this arrowhead? Is there really gold in that Indian mound? What tribe left all these artifacts behind? Can the government take my artifact collection away? For more than twenty years, Evan Peacock, an archaeologist at Mississippi State University, has been fielding and answering questions such as these from the public. In Mississippi Archaeology Q & A, he gathers those answers in one place to give landowners, history buffs, arrowhead hunters, and students new to archaeology an invaluable handbook of dos and don'ts. Peacock writes for the lay reader, supplies humorous anecdotes from his years in the field, and never scolds. Instead he respectfully introduces the neophyte to the wonders of the remarkable prehistoric and historic remains throughout the Magnolia State. Rather than pursuing a hobby in a destructive manner, in-formed artifact collectors can and do contribute to the field. This book offers solid suggestions on how enthusiasts can play a helpful role. Mississippi Archaeology Q & A explains the basic methods that archaeologists use to find, explore, and interpret ancient sites. In a clear and straightforward manner, Peacock divulges what he has learned about landowners' rights and other legal issues. The guide describes many important archaeological sites in Mississippi and adjacent states and the different kinds of artifacts commonly found in the region. For people who wish to protect a site or for those who would like to sell a site or obtain a tax break for its preservation, this guide contains critical information. While the book focuses closely on Native American artifacts, it also

thoroughly treats the full range of Mississippi's historical treasures from the remnants of pioneer settlers to Civil War curios.

Medications that may produce movement disorders are widely used. The resulting disorders are often highly disconcerting for the patient and their relatives, especially when the connection between medication and disorder is not recognized. However, ascribing an adverse drug effect to medication exposure is often difficult, especially when the side effect is rare. Covering various drugs - including the major classes of medications working primarily on the brain, specifically antipsychotics and antidepressants - this all-encompassing review of medication-induced movement disorders aids early recognition and improved treatment. The problem of what to do when the offending medication cannot be reduced is also reviewed. It discusses the best options for evaluation and treatment, including medical imaging and deep brain stimulation, and guides the clinician in managing the disorder, making this a vital reference for medical specialists and consultants in neurology and neuropharmacology and any clinician seeing patients on medications crossing the blood brain barrier.

An authoritative account of the crimes of Oscar Pistorius, the beloved Paralympic superstar who shot his girlfriend in cold blood, from the night of the killings to the controversial verdict. At 08:03 on the morning of Valentine's Day 2013, news broke that Oscar Pistorius, the Paralympic superstar known as the "Blade Runner," had shot and killed his girlfriend at his luxury home in Pretoria, South Africa. Within minutes, the story reverberated around the world as banners flashed across television screens broadcasting global news networks. At first glance, it appeared to be a heart-wrenching, tragic accident. The athlete had mistaken beautiful Reeva Steenkamp for an intruder. But as the morning unfolded, a second version of events began to reveal itself, indicating that the country's celebrated icon, its "Golden Boy," may have murdered his model girlfriend in a fit of rage. In this vivid and insightful narrative, South African journalists Mandy Wiener and Barry Bateman reveal the true story of Oscar Pistorius and Reeva Steenkamp, from that horrific night to the announcement of the shocking verdict. Drawing on evidence from the trial as well as on-the-ground interviews with family and friends of Oscar and Reeva, this is the authoritative account of one of the most high-profile trials of the 21st century.

"This interdisciplinary, international, and multi-lingual collection of essays explores a broad range of issues related to hospitality and hostility, in

literary and cultural contexts from antiquity to the present. Insightful theoretical and historical discussions undergird richly detailed particular studies. The central focus unifies the diverse pieces, which are original, well-researched and reasoned, and clearly written. A solid contribution to scholarship in several fields (including linguistics, anthropology and Internet culture), the volume is also enjoyable to read. Its lively and appealing pieces on recent novels and contemporary trends lend a fresh and contemporary feel." -Prof. Pamela S. Saur, Lamar University, Texas

Pursuing the Triple Aim Jonathan Ball Publishers

Written by the President and CEO of the Institute for Healthcare Improvement (IHI) and a leading health care journalist, this groundbreaking book examines how leading organizations in the United States are pursuing the Triple Aim—improving the individual experience of care, improving the health of populations, and reducing the per capita cost of care. Even with major steps forward – including the Affordable Care Act and the creation of the Center for Medicare and Medicaid Innovation -- the national health care debate is too often poisoned by negativity. A quieter, more thoughtful, and vastly more constructive conversation continues among health care leaders and professionals throughout the country. Innovative solutions are being designed and implemented at the local level, and countless health care organizations are demonstrating breakthrough remedies to some of the toughest and most expensive challenges in health care. Pursuing the Triple Aim shares compelling stories that are emerging in locations ranging from Pittsburgh to Seattle, from Boston to Oakland, focused on topics including improving quality and lowering costs in primary care; setting challenging goals to control chronic disease with notable outcomes; leveraging employer buying power to improve quality, reduce waste, and drive down cost; paying for care under an innovative contract that compensates for quality rather than quantity; and much more. The authors describe these innovations in detail, and show the way toward a health care system for the nation that improves the experience and quality of care while at the same time controlling costs. As the Triple Aim moves from being largely an aspirational framework to something that communities all across the US can implement and learn from, its potential to become a touchstone for the work ahead has never been greater. Pursuing the Triple Aim lays out the vision, the interventions, and promising examples of success.

Medicaid Hospital Payment Edward Elgar Publishing

This fully updated second edition focuses on mental illness, both globally and in terms of specific mental-health-related visits encountered in emergency department settings, and provides practical input from physicians experienced with adult emergency psychiatric patients. It covers the pre-hospital setting and advising on evidence-based practice; from collaborating with psychiatric colleagues to establishing a psychiatric service in your emergency department. Potential dilemmas when treating pregnant, geriatric or homeless patients with mental illness are discussed in detail, along with the more challenging behavioral diagnoses such as substance abuse, factitious and personality disorders, delirium, dementia, and PTSD. The new edition of Behavioral Emergencies for Healthcare Providers will be an invaluable resource for psychiatrists, psychologists, psychiatric and emergency department nurses, trainee and experienced emergency physicians, and other mental health workers.

The growth of international travel for purposes of medical treatment has been accompanied by increased academic research and analysis. This Handbook explores the emergence of medical travel and patient mobility and the implications for patients and health systems in Transition World Health Organization

Today our emergency care system faces an epidemic of crowded emergency departments, patients boarding in hallways waiting to be admitted, and daily ambulance diversions. Hospital-Based Emergency Care addresses the difficulty of balancing the roles of hospital-based emergency and trauma care, not simply urgent and lifesaving care, but also safety net care for uninsured patients, public health surveillance, disaster preparation, and adjunct care in the face of increasing patient volume and limited resources. This new book considers the multiple aspects to the emergency care system in the United States by exploring its strengths, limitations, and future challenges. The wide range of issues covered includes: • The role and impact of the emergency department within the larger hospital and health care system. • Patient flow and information technology. • Workforce issues across multiple disciplines. • Patient safety and the quality and efficiency of emergency care services. • Basic, clinical, and health services research relevant to emergency care. • Special challenges of emergency care in rural settings. Hospital-Based Emergency Care is one of three books in the Future of Emergency Care series. This book will be of particular interest to emergency care providers, professional organizations, and policy makers looking to address the deficiencies in emergency care systems.

Behavioral Emergencies for Healthcare Providers John Wiley & Sons

The opening chapters introduce the criminal elements whose atrocities have an impact throughout Kenya, Uganda, and South Africa. In South Africa, the reader meets a staunch conservationist family, the Smits, and their contributions to the eventual resolution of many criminal dockets in South Africa. A serious attack at a taxi rank in Durban leaves a member of the ruling political party dead, and the South African Police Services become involved with the case which is soon found to have strong links to Kenya. This murderous ex-mercenary is connected to various crimes in South Africa, and it is discovered that he is a main supplier of contraband and controls a poaching ring and a smuggling outfit operating in Ulundi which is adjacent to the Imfolozi/Hluhluwe Game reserve. The Kenyan Law enforcement agency is found to be corrupt with the exception of the assistant commissioner of police and his newly formed branch. This division starts investigating past unresolved cases and soon smashes a criminal syndicate. The South Africans are involved and a crack antipoaching team is involved to the end of a serious poaching expedition.

In this book, fused deposition modeling (FDM) is described with focus on product quality control and enhancement. The book begins by introducing the basics of FDM and its associated process parameters. Then, strategies for quality control and enhancement are described using case studies of both original results by the authors and from published literature. Resolution and print orientation, multi-objective optimizations and surface engineering are identified and discussed as the strategies for enhancing the quality of FDM products in this book.

Die tragedie wat op Valentynsdag 2013 Reeve Steenkamp se lewe kortgeknipt en Oscar Pistorius se status as internasionale sportheld aan skerwe laat spat het, en die ongekende mediadekking van die sensasionele moordverhoor daarna, het verreikende gevolge op vele terreine gehad. Soos nog nooit tevore nie het die kollig geval op fasette wat ons lewens op talle terreine raak: die manier waarop regspleging in Suid-Afrika geskied; hoe sosiale en nuusmedia opinies genereer, beïnvloed en rapporteer; die publiek se obsessie met heldestatus; en die intriges wat van minnaars moordenaars maak. Vir hierdie boek het Ilse Salzwedel deur 'n vloedgolf menings gesif om sin te maak van die Oscar-saak. 'n Fassinerende prentjie ontvou waarin sleutelaspekte ontleed word, soos die belang van forensiese besonderhede, die kundigheid van polisie- en regsbeamptes, die rol van die staat en die verdediging in die hof, die effek van mediadekking op die publiek se persepsies, en nog meer. In die toeganklike, nugtere en nie-sensasionele styl waarvoor dié gerespekteerde joernalis bekend is, vra die skrywer: watter lesse hou 'n tragedie soos hierdie in vir vandag se samelewing?

The ever-diversifying field of aerosol effects on climate is comprehensively presented here, describing the strong connection between fundamental research and model applications in a way that will allow both experienced researchers and those new to the field to gain an understanding of a wide range of topics. The material is consistently presented at three levels for each topic: (i) an accessible "quick read" of the essentials, (ii) a more detailed description, and (iii) a section dedicated to how the processes are handled in models. The modelling section in each chapter summarizes the current level of knowledge and what the gaps in this understanding mean for the effects of aerosols on climate, enabling readers to quickly understand how new research fits into established knowledge. Definitions, case studies, reference data, and examples are included throughout. Aerosols and Climate is a vital resource for graduate students, postdoctoral researchers, senior researchers, and lecturers in departments of atmospheric science, meteorology, engineering, and environment. It will also be of interest to those working in operational centers and policy-facing organizations, providing strong reference material on the current state of knowledge. - Includes a section in each chapter that focuses on the treatment of relevant aerosol processes in climate models - Provides clear exposition of the challenges in understanding and reducing persistent gaps in knowledge and uncertainties in the field of aerosol-climate interaction, going beyond the fundamentals and existing knowledge - Authored by experts in modeling and aerosol processes, analysis or observations to ensure accessibility and balance

NUWE UITGAWE: SLUIT DIE VONNISOPLEGGING IN EN MAAK VIR DIE EERSTE KEER DIE MOORDENAAR SE IDENTITEIT BEKEND ... Die vrede en stilte in die Noord-Kaapse dorpie Griekwastad is kort ná skemer op Goeie Vrydag, 6 April 2012, versteur toe 'n tienerseun in sy pa se Isuzu-bakkie die dorp ingejaag het en met skreeuende remme voor die byna verlate polisiestasie tot stilstand gekom het. Dit was net voor 19:00 toe Don Steenkamp, net in sy swart rugbybroek en vol bloed, uit die voertuig gespring het en die aanklagkantoor binnegestorm het met die nuus dat sy ouers en suster op die familieplaas Naauwhoek wreedaardig geskiet en vermoor is. Alhoewel daar aanvanklik gedink is dat die moorde net nóg 'n plaasaanval was, is Don maande later vir die moorde gearresteer. Dit het 'n proses aan die gang gesit wat Suid-Afrika sou meesleur en die mense van Griekwastad onderling sou verdeel. Hierdie storie is die aangrypende verhaal, gebaseer op onderhoude met al die betrokkenes insluitende die ondersoekbeamptes, die forensiese en ballistiese deskundiges, asook familie en vriende van die oorledenes, van wat werklik op daardie noodlottige dag op die plaas Naauwhoek gebeur het, soos vertel deur die verslaggewer wat eerste daaroor berig het ...

Oscar klop aan die deur en Reeve kom maak vir hom oop. Die man wat oor die drumpel trap, wat vir die laaste keer by hierdie huis instap, is Oscar Pistorius, skatryk, alomgeliefde wêreldberoemde Olimpiese held. Die man wat oor minder as 24 uur by dieselfde deur sal uit steier, sal 'n ander Oscar wees. Berug, bebloed, bedroef, 'n flentersgebreekte spieël van homself."Dis die verhoor van die jaar, die storie van die dekade. Dis 'n liefdesverhaal wat 'n hofdrama geword het, 'n sprokie wat in bloed geëindig het.Die Oscar Pistorius-saak is al van hoek tot kant bestudeer en ontleed, in berigte en debatte bespreek. Maar nog nooit is dit van die begin tot die end as 'n spanningsverhaal vertel nie. En dít is wat Marida Fitzpatrick in Die Staat vs. Oscar doen. Sy weef die skrikwekkende gebeure van daardie nag en die mees dramatiese dele van die verhoor op só 'n manier ineen dat die boek soos 'n misdaadriller lees. Tussendeur dié boeiende vertelling is uittreksels uit roerende onderhoude met van die betrokkenes se naastes. Die boek bevat ook 'n interessante ontrafeling van die tegniese aspekte van die verhoor: Wat het die ballistiek, die getuienis oor die gille en Oscar se twee verwerpe uiteindelik vir hom beteken? Dit word alles geïllustreer met foto's wat op die toneel geneem is en grafiese voorstellings. Die Staat vs. Oscar is 'n fassinerende storie wat nie net al die legkaartstukke van die Oscar-raaisel in plek laat val nie, maar deurentyd aangryp en meesleur.

This book presents a systematic approach to analyzing the challenging engineering problems posed by the need for security and privacy in implantable medical devices (IMD). It describes in detail new issues termed as lightweight security, due to the associated constraints on metrics such as available power, energy, computing ability, area, execution time, and memory requirements. Coverage includes vulnerabilities and defense across multiple levels, with basic abstractions of cryptographic services and primitives such as public key cryptography, block ciphers and digital signatures. Experts from Computer Security and Cryptography present new research which shows vulnerabilities in existing IMDs and proposes solutions. Experts from Privacy Technology and Policy will discuss the societal, legal and ethical challenges surrounding IMD security as well as technological solutions that build on the latest in Computer Science privacy research, as well as lightweight solutions appropriate for implementation in IMDs.

The term "zooplankton" describes the community of floating, often microscopic, animals that inhabit aquatic environments. Being near the base of the food chain, they serve as food for larger animals, such as fish. The ICES (International Council for the Exploration of the Sea) Zooplankton Methodology Manual provides comprehensive coverage of modern techniques in zooplankton ecology written by a group of international experts. Chapters include sampling, acoustic and optical methods, estimation of feeding, growth, reproduction and metabolism, and up-to-date treatment of population genetics and modeling. This book will be a key reference work for marine scientists throughout the world. - Sampling and experimental design - Collecting zooplankton - Techniques for assessing biomass and abundance - Protozooplankton enumeration and biomass estimation - New

optical and acoustic techniques for estimating zooplankton biomass and abundance - Methods for measuring zooplankton feeding, growth, reproduction and metabolism - Population genetic analysis of zooplankton - Modelling zooplankton dynamics This unique and comprehensive reference work will be essential reading for marine and freshwater research scientists and graduates entering the field.
