TRISTIAN REEVES

New York Medical Journal Here's the Key Incorporated

Discusses the potential dangers of cholesterol-lowering medications, steroids, antibiotics, and Ritalin, and reveals the potentially life-threatening risks of certain medical procedures and tests

Heretic's Heart Simon and Schuster
Charlie Garcia has spent his life helping others. For years, he's provided free healthcare for his neighbors and served as a counselor for his friends and their partners. He loves being the go-to guy, except when it results in him falling for the wrong man. Now, six years later, the one who got away is back in Denver to donate a kidney, and he has a request - he wants Charlie to marry him long enough to serve as medical power of attorney. Charlie's happy to help, but in addition to a surprise fiancé, he suddenly has two huge problems: a neighbor with a grudge who wants to ruin his career, and a secret that may destroy his friendship with Warren, Phil, and Gray. Bonus Content: Includes three new Heretic Doms Club vignettes. 20% of the author's proceeds from ebook sales will be donated to the National Kidney Foundation.

Confessions of a Medical Heretic

Routledge

Imagine if you were able to tune up your body when it felt sluggish and unresponsive and maintain it generally the way you do your car. Your body and your car function similarly in that they need air, fuel, and spark. There is one other thing that they should have in common, and that is maintenance. Sadly, and for reasons quite sinister, we

are not given the opportunity or any encouragement to maintain our bodies. We have entrusted our health to people who actually do not want us to be healthy; they are the pharmaceutical industry also known as Big Pharma. It has been said that the truth shall set us free. This book was written with the intention to set you free from the lies, deception, and harm being metered out to you and your loved ones by people who depend on keeping you sick and miserable in order to make incalculable amounts of money. Yes, we are being farmed like animals by the medical profession who are killing the people who believe they are being helped. Chemotherapy is just one example; vaccines are another.

Dissent in Medicine Penguin Group USA

A Milwaukee Journal Sentinel Best Book of 2021 A poignant and funny exploration of authenticity in work and life by a woman doctor. In 2017, Dr. Suzanne Koven published an essay describing the challenges faced by female physicians, including her own personal struggle with "imposter syndrome"—a long-held secret belief that she was not smart enough or good enough to be a “real” doctor. Accessed by thousands of readers around the world, Koven’s “Letter to a Young Female Physician” has evolved into a deeply felt reflection on her career in medicine. Koven tells candid and illuminating stories about her pregnancy during a grueling residency in the AIDS era; the illnesses of her child and aging parents during which her roles as a doctor, mother, and daughter converged, and sometimes collided; the sexism, pay inequity, and harassment that women in medicine encounter; and the twilight of her career during the

COVID-19 pandemic. As she traces the arc of her life, Koven finds inspiration in literature and faces the near-universal challenges of burnout, body image, and balancing work with marriage and parenthood. Shining with warmth, clarity, and wisdom, *Letter to a Young Female Physician* reveals a woman forging her authentic identity in a modern landscape that is as overwhelming and confusing as it is exhilarating in its possibilities. Koven offers an indelible account, by turns humorous and profound, from a doctor, mother, wife, daughter, teacher, and writer who sheds light on our desire to find meaning, and on a way to be our own imperfect selves in the world.

Glasgow Medical Journal Beacon Press
New edition of this highly controversial and campaigning book that reveals the truth about the pills and procedures your doctor prescribes and offers proven alternatives for diagnosing, preventing and treating many illnesses. Includes updated information on all the most recent health issues - vaccination, HRT, Viagra, IVF and more. Every year, 1.17 million British people - a population the size of Birmingham - are put in a hospital bed by a medical procedure gone wrong. And 80% of most of the treatments we take for granted have never been scientifically proven to work. In this groundbreaking book, leading health campaigner Lynne McTaggart reveals the real secrets of modern medicine. Extensively revised and updated, this new edition tackles some of the most worrying health issues of recent years. For example, did you know: * Statin drugs, the new miracle cure for high cholesterol, are causing a heart failure epidemic? * SSRI drugs - now come with a black box warning about suicide risk to children * HRT, touted as the most

important preventative treatment for all the diseases of female old age, actually causes heart disease, dementia, strokes and cancer? * IVF could be causing cases of breast cancer? * The statistics about illnesses prevented by vaccination are vastly overplayed? * Viagra, the great white hope of male impotence, has caused a rash of sudden deaths and is effective, at most, only half the time. *What Doctors Don't Tell You* gives you all the information you need to take your health into your own hands, exposing the true dangers of conventional medicine and offering up-to-the-minute, scientifically proven alternatives for diagnosing, preventing and treating many illnesses.

The Physician Harper Perennial
Jabbed demonstrates that the medical procedure hailed as the greatest medical advancement in history—vaccines—is a racket run by criminals and gullible believers who have replaced vaccine science with the religion of vaccinology. Vaccine marketers teach believers to fear, shame, and scapegoat anyone foolish enough to question the sanctity of vaccines. Such an environment is not the domain of science; rather it's the breeding ground of tyranny. *Jabbed* exposes this tyranny. From polio and smallpox to medical journals, medical curricula, congressional hearings, regulatory policies, White House statements, and executive orders, *Jabbed* shines light on the dark underbelly of Big Pharma, Big Medicine, and Big Government. A vaccine informed public is the only thing that will have the power to stop vaccine industry sociopaths and to hold them accountable for their crimes. *Jabbed* informs and immunizes against three of the most dangerous epidemics in history: tyranny, greed, and corruption. Once immunized,

the growing vaccine-informed community will have the power to stand up and dismantle the vaccine paradigm and program and to punish the perpetrators of what may well be the greatest medical fraud ever perpetrated on the human race: vaccines.

The Medical Mafia Paizo Incorporated

In 1928 Margaret Mead announced her stunning discovery of a culture in which the storm and stress of adolescence didn't exist. The resulting book, *Coming of Age in Samoa* has since become a classic - and the best-selling anthropology book of all time. Within the nature-nurture controversy that still divides scientists, Mead's evidence has long been a crucial negative instance, an apparent proof of the sovereignty of culture over biology.

The Private Lives and Professional Identity of Medical Students McGraw-Hill/Contemporary

Medicine is not a precise science. There are always several options to manage and cure a disease. The best help for the treating doctor comes from the patient. The better informed the patient is, the more helpful this is to the physician.

Heretic, will be forthcoming.

Medical Review of Reviews National Geographic Books

Expose of medical wrongdoings and how alternative methods hold the key.

The Medical Missionary McGraw Hill Professional

Covers issues from unnecessary surgeries and prescribed drugs to preventive medicine and home births.

Death's Heretic Routledge

Silenced for 1,600 years, the "heretics" speak for themselves in this account of the Priscillianist controversy that began

in fourth-century Spain. In a close examination of rediscovered texts, Virginia Burrus provides an unusual opportunity to explore heresy from the point of view of the followers of Priscillian and to reevaluate the reliability of the historical record. Her analysis takes into account the concepts of gender, authority, and public and private space that informed established religion's response to this early Christian movement. Priscillian, who began his career as a lay teacher with particular influence among women, faced charges of heresy along with accusations of sorcery and sexual immorality following his ordination to the episcopacy. He was executed along with several of his followers circa 386. His purportedly "gnostic" doctrines produced controversy and division within the churches of Spain, dissension that continued into the early decades of the fifth century. Burrus's thorough and wide-ranging study enlarges upon previous scholarship, particularly in bringing a feminist perspective to bear on the gendered constructions of religious orthodoxies, making a valuable contribution to the recent commentary that explores new ways of looking at early Christian controversies. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1996.

Confessions of a Medical Heretic

Open Road Media

Nobody cheats death. A warrior haunted

by his past, Salim Ghadafar serves as a problem-solver for a church he hates, bound by the goddess of death to hunt down those who would rob her of her due. Such is the case in the desert nation of Thuvia, where a powerful merchant on the verge of achieving eternal youth via a magical elixir is mysteriously murdered, his soul kidnapped somewhere along its path to the afterlife. The only clue is a magical ransom note, offering to trade the merchant's successful resurrection for his dose of the fabled potion. But who would have the power to steal a soul from the boneyard of Death herself? Enter Salim, whose keen mind and contacts throughout the multiverse should make solving this mystery a cinch. There's only one problem: The investigation is being financed by Neila Anvanory, the dead merchant's stubborn and aristocratic daughter. And she wants to go with him. Along with his uninvited passenger, Salim must unravel a web of intrigue that will lead them far from the blistering sands of Thuvia on a grand tour of the Outer Planes, where devils and angels rub shoulders with fey lords and mechanical men, and nothing is as it seems...

Unholy Alliance McGraw-Hill/Contemporary

To do what no other magazine does: Deliver simple, delicious food, plus expert health and lifestyle information, that's exclusively vegetarian but wrapped in a fresh, stylish mainstream package that's inviting to all. Because while vegetarians are a great, vital,

passionate niche, their healthy way of eating and the earth-friendly values it inspires appeals to an increasingly large group of Americans. VT's goal: To embrace both.

American Eclectic Medical Review

PHOENIX SOURCE DISTRIBUTORS, INC.

An experienced physician and health researcher explains the direct correlation between emotional and mental stress and degenerative diseases--particularly cancer. He also provides the knowledge and tools necessary to prevent or to recover quickly from a degenerative disease.

The Making of a Heretic Strategic Book Publishing

The eagerly anticipated follow-up to the number one bestseller *Vagabond*, this is the third instalment in Bernard Cornwell's *Grail Quest* series.

Male Practice University of Chicago Press

Servetus was a unique and central figure in European history. When he was burned alive in Geneva on October 27, 1553, all unbound copies of his major work went up in smoke with him. Today, only three surviving copies of the original publication are known. Except for a fragment of a few pages concerning the famous discovery of the pulmonary circulation, the book was never translated into English. The present edition is the first translation into English and includes the first part of the original text."

London medical press & circular [afterw.]

The Medical press & circular Troubador Publishing Ltd

An orphan leaves Dark Ages London to study medicine in Persia in this "rich" and "vivid" historical novel from a New York Times--bestselling author (The New York Times). A child holds the hand of his dying mother and is terrified, aware

something is taking her. Orphaned and given to an itinerant barber-surgeon, Rob Cole becomes a fast-talking swindler, peddling a worthless medicine. But as he matures, his strange gift—an acute sensitivity to impending death—never leaves him, and he yearns to become a healer. Arab madrassas are the only authentic medical schools, and he makes his perilous way to Persia. Christians are barred from Muslim schools, but claiming he is a Jew, he studies under the world's most renowned physician, Avicenna. How the woman who is his great love struggles against her only rival—medicine—makes

a riveting modern classic. The Physician is the first book in New York Times–bestselling author Noah Gordon's Dr. Robert Cole trilogy, which continues with Shaman and concludes with Matters of Choice.
