Green budget tagging can be a useful tool in an overall approach to green budgeting. This introductory guidance was developed by the OECD under the Paris Collaborative on Green Budgeting in collaboration with institutional partners working under Helsinki Principle 4 of the Coalition of Finance Ministers for Climate Action (IADB, IMF, UNDP, World Bank) and draws lessons from existing country practices.

Sixteenth in a series of annual reports comparing business regulation in 190 economies, *Doing Business 2019* measures aspects of regulation affecting areas of everyday business activity.

Doing Business 2019 OECD Publishing

The Construction Manuals from Edition Detail are among the most important reference works in the specialist literature. The latest volume shows the potential of the material concrete and documents comprehensively the technical principles of using concrete in construction. Chapters cover the history of the material, the properties of concrete, reinforced concrete, and prestressed concrete, the treatment of its surface. Also covered are the basic principles of statics for large and small structures, and the building requirements with respect to heat, damp, sound-proofing and fire protection according to the most recent norms and standards. Finally a large number of built examples are presented from illustrations of the complete structure down to detailed plans, showing the broad spectrum of applications for concrete in contemporary building. All plans have been specially produced by the editorial department Detail for this book and for ease of comparison, they have been drawn to the same scale.

Bernard Blossom is given a dachshund he names Joe, but Joe is

useless, can't run, jump or retrieve, but one day Joe helps rescue a cat, and becomes Useful.

Counting Candles Elsevier

The unconventional traveller (author) seeks out remote and spectacular corners of Britain and Europe. In terms of both lifestyle and travel, he seems reluctant to accept change or progress. Then, Covid-19 strikes the world in 2020- a global pandemic. In striving not to forego his annual holidays, just how is he ever going to adapt? As he starts to venture further afield, and Covid travel regulations are enforced, he is faced with some shrewd decision-making. Intriguingly, some of the biggest obstacles that he has to face up to actually turn out to be unrelated to Covid. The transcript, and selected photographs, are extracted straight from the author's personal journal. It serves to reward on many levels. We have a compelling armchair travel guide. We get an insightful look at the hospitality sector. Ultimately, we are drawn into an unprecedented year of global travel.

An Introduction to Development Planning in the Third World Routledge

Asian cities are particularly vulnerable to risks associated with natural disasters. While they are exposed to various types of natural hazards, flooding and other water-related disasters pose particularly significant risks and undermine long-term economic growth, especially in coastal cities. Managing such natural disaster risks is an essential component of urban policies in fast-growing Southeast Asian cities, especially as the impacts of climate change worsen. In addition to providing a framework for assessing disaster risk management policies in cities, this report also presents the results of assessment and locally tailored policy recommendations in five cities of different institutional, geographic, socio-economic and environmental contexts in Southeast Asia. They include Bandung (Indonesia), Bangkok (Thailand), Cebu (Philippines), Hai Phong (Viet Nam) and Iskandar (Malaysia). The study highlights that Southeast Asian cities are largely underprepared for natural disaster risks. Through an assessment of disaster risk management (DRM) policies at national and subnational levels, the study aims to enhance urban resilience by: i) identifying policy challenges related to DRM ; ii)

assessing the impacts of current DRM policy practices; and iii) proposing more efficient and effective policy options to enhance urban resilience.

A special full-color issue of Rilly's moody and meditative short stories. Follow the troubled parents of "The Nest," the forceful artist of "Stained Glass," and loneliness in a scorched-earth colony in "The Hollow"--Plus an actual letters page and more! Rilly's Frances-and-Vickie story will return in the next issue. For now, grab this bold new work in the series that received the Ignatz Award for Outstanding Comic and Doug Wright Spotlight Award. Yah!

IFLA Public Library Service Guidelines John Wiley & Sons

Anthropogenic greenhouse gas (GHG) emissions are dramatically influencing the environment, and research is strongly committed to proposing alternatives, mainly based on renewable energy sources. Low GHG electricity production from renewables is well established but issues of grid balancing are limiting their application. Energy storage is a key topic for the further deployment of renewable energy production. Besides batteries and other types of electrical storage, electrofuels and bioderived fuels may offer suitable alternatives in some specific scenarios. This Special Issue includes contributions on the energy conversion technologies and use, energy storage, technologies integration, e-fuels, and pilot and large-scale applications.

 A NEW YORK TIMES BESTSELLER An Esquire Best Book of 2017
 Remember when presidents spoke in complete sentences instead of in unhinged tweets? Former Obama speechwriter David Litt does. In his comic, coming-of-age memoir, he takes us back to the Obama years – and charts a path forward in the age of Trump. More than any other presidency, Barack Obama’s eight years in the White House were defined by young people – twenty-somethings who didn’t have much experience in politics (or anything else, for that matter), yet suddenly found themselves in the most high-stakes office building on earth. David Litt was one of those twenty-somethings. After graduating from college in 2008, he went straight to the Obama campaign. In 2011, he became one of the youngest White House speechwriters in history. Until leaving the White House in 2016, he wrote on topics from healthcare to climate change to criminal justice reform. As President Obama’s go-to comedy writer, he also took the lead on the White House Correspondents’ Dinner, the so-called “State of the Union of jokes.” Now, in this refreshingly honest memoir, Litt brings us inside Obamaworld. With a humorists’ eye for detail, he describes what it’s like to accidentally trigger an international incident or nearly set a president’s hair aflame. He answers questions you never knew you had: Which White House men’s room is the classiest? What do you do when the commander in chief gets your name wrong? Where should you never, under any circumstances, change clothes on Air Force One? With nearly a decade of stories to tell, Litt makes clear that politics is completely, hopelessly absurd. But it’s also important. For all the moments of chaos, frustration, and yes, disillusionment, Litt remains a believer in the words that first drew him to the Obama campaign: “People who love this country can change it.” In telling his own story, Litt sheds fresh light on his former boss’s legacy. And he argues that, despite the current political climate, the politics championed by Barack Obama will outlive the presidency of Donald Trump. Full of hilarious stories and told in a truly original voice, *Thanks, Obama* is an exciting debut about what it means – personally, professionally, and politically – to grow up. *Cutting-Edge Technologies for Renewable Energy Production and Storage* Green Cat Books

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Economics of Education World Bank Publications
 Opening a door to the real behind-the-scenes of a film or television show, this book explores the reality of working in the Production Office as an Office Production Assistant. Drawing on over 40 years’ combined experience, authors Jennifer A. Haire and Gilana M. Lobel map out a career path into the industry by providing comprehensive practical information designed specifically for individuals pursuing the entry level role of the Office PA. An invaluable tool for both breaking into the industry and on the job, the book is full of detailed “how to” information that not only provides an overview of the full scope of the industry, but also functions as a user’s manual for Production Office operations. Haire and Lobel outline variations of the job of an Office PA nationwide, for both big- and small-budget feature films and television shows, and how you are a vital component of the Production team which can open the door to your future career. With coverage on how the Office PA supports the process of creating a show, the Production staff and crew, the practical day-to-day of the office, and developing your career, this is an essential resource for anyone wishing to take their first steps into the film and television industry. Featuring charts, graphics, diagrams, sample documents, templates, supplemental materials, and lighthearted cartoons throughout the book, the reader is immersed in real-world scenarios which create a solid foundation for how to be a professional in the workplace. This is an inspiring and practical manual that reveals what is beyond the behind-the-scenes of film and television production. It’s ideal for aspiring film

and TV professionals with little to no experience working in Physical Production as well as readers studying film and television production courses and industry training programs.

 Originally published in 1988, the book discusses the development of the GCSE system, its application to the main subject areas of the curriculum and some of its innovative aspects from both a theoretical and a practical standpoint.

Notebook 200 Sheets: Light Yellow CRC Press
 Antioxidants and Functional Components in Aquatic Foods compiles for the first time the past and present research done on pro and antioxidants in aquatic animals. The book addresses an area of extreme importance for aquatic foods, since lipid oxidation leads to such a large number of quality problems. Many of these problems are also seen in other muscle based foods, but are exaggerated in aquatic foods, so the book’s contents will be of great use and interest to other fields. Written by top researchers in the field, the book offers not only general overviews of lipid oxidation in aquatic foods and aquatic food pro and antioxidant systems, but also covers specifics and gives the latest information on the key pro and anti-oxidants derived from aquatic foods as well as some of the most recent and innovative means to control lipid oxidations in aquatic foods and food systems with fish oils. Coverage includes the latest research on the effects aquatic foods have on oxidative stress in the human body, an area of great interest recently. Additionally, a chapter is devoted to the latest techniques to measure antioxidative potential of aquatic foods, an area still in development and one very important to the antioxidant research community. Antioxidants and Functional Components in Aquatic Foods will be of great interest to the food science, medical, biochemical and pharmaceutical fields for professionals who deal with aquatic food products, muscle foods products (beef, pork, poultry etc), lipid oxidation, and pro-oxidant and antioxidant systems.

 ""A valuable reference for users of ESRI ArcScan for ArcGIS, one of the extensions for the ArcGIS Desktop products ArcInfo, ArcEditor,

and ArcView. ArcScan for ArcGIS is an extension that enables the conversion from raster data to vector features. This process is commonly referred to as vectorization. ArcScan for ArcGIS can be used to vectorize raster data automatically or interactively by tracing raster cells. ArcScan for ArcGIS also supports the ability to select raster cells and perform simple raster editing, which can help define the scope of the vectorization. Begin with the quick-start tutorial for an overview of executing basic ArcScan functions. If you prefer, jump right in and experiment on your own. The book also includes concise, step-by-step, fully illustrated examples.""
