Autumn Snow and Witch of Winter Turner Publishing Company

A personal memoir, by a seasoned nurse practitioner living and working independently in remote, isolated indigenous communities of the Arctic, Labrador, Western and Northern Canada. Graphically shows self-reliance, descriptions of local cultures and personalities and the understanding of the health care needs of the indigenous people and how their health has been affected by historical happenings. She worked onboard ships and visited lighthouses and treated animals. In between working contacts in the north she participates in volunteer health care in indigenous Latin American communities and exercises her knowledge of language, culture and the desire to travel. Returning to urban living in Victoria at sedentary occupation, which involved committee work with employment equity and multiculturalism. Magnetism and Call of the North draws her back twice demonstrating her love of challenge and adventure. An exciting, engaging, entertaining, instructive and stimulating book, which some read twice and others cannot put down.

"Time belongs not to us but to God,' contends Michel. Lambasting time management strategies that prioritize productivity, Michel argues that readers must instead accept that 'there is always enough time to do what God has planned.' Michel succeeds in putting earthly concerns in cosmic perspective. These insightful musings are worth a look."--Publishers Weekly *** Whether we're trying to find time, save it, manage it, or make the most of it, one word defines our relationship with the clock: anxiety. Yet is productivity really the only grid for the good life? Have you ever imagined a life without hurry, relentless work, multitasking, or scarcity? A life that is characterized instead by presence, attention, rest, rootedness, fruitfulness, and generosity? This is the kind of life we are meant for, says Jen Pollock Michel. But if we want to experience freedom from time anxiety, we have to reimagine our relationship with time itself. In the pages of In Good Time, she invites you to disentangle your priorities from our modern assumptions and instead ground them in God's time. Then she shows you how to establish 8 life-giving habits that will release you from the false religion of productivity so you can develop a grounded, healthy, life-giving relationship with the clock.

This is the true story of a double murder that occurred in March, 1873 off the New England coast. The event was followed closely by newspapers across the country for months. It is unique because of the circumstances surrounding the crime and the controversy it raised. Reconstructed from old newspaper articles, court transcripts, the Internet and other source materials, it is as factual as I have been able to make it. Names and places are real, as is trial testimony. Where facts and dialogue were available from research and documented sources, they are accurate. Where they were scant or sustained by rumor yet necessary for the flow of the story and capture of emotions, the interpretations are mine. --author.

In this poignant and insightful new novel, the acclaimed author of The Good Life delves beneath the shimmering surface of one couple's evolving marriage. . . Karen Spears and Bob Parsons meet in college and embark upon the kind of enviable, picture-perfect relationship featured in romantic movies. Bob is ambitious and adoring; Karen is bright and beautiful. And nothing seems more natural to them than getting married right after Karen's graduation. Newlywed life meets all of Karen's expectations. Bob's career is soaring and Karen has a fulfilling job of her own—one that's put on hold when she becomes pregnant. But their caring partnership begins to slip away as Bob's single-minded pursuit of the next promotion blinds him to how overwhelmed Karen feels as a stay-at-home mom. When resentment and disenchantment build on both sides, Karen finds herself at a crossroads. What happens when reality erodes your ideal relationship? How do you know when to stay and when to go? And how much can any marriage endure before it becomes just another statistic? Profoundly honest and revealing, A Changing Marriage is a vivid portrait of relationships at their most intricate—and most familiar. Praise for Susan Kietzman's The Good Life "Kietzman's well crafted characterizations give the narrative its depth. . . Readers will find themselves drawn into the tragedies and triumphs of this fictional family—distinct and yet utterly relatable." --Hartford Books Examiner

Snowshoe Country is an environmental and cultural history of winter in the colonial Northeast, closely examining indigenous and settler knowledge of snow, ice, and life in the cold. Indigenous communities in this region were more knowledgeable about the cold than European newcomers from temperate climates, and English settlers were especially slow to adapt. To keep surviving the winter year after year and decade after decade, English colonists relied on Native assistance, borrowed indigenous winter knowledge, and followed seasonal diplomatic protocols to ensure stable relations with tribal leaders. Thomas M. Wickman explores how fluctuations in winter weather and the halting exchange of winter knowledge both inhibited and facilitated English colonialism from the 1620s to the early 1700s. As their winter survival strategies improved, due to skills and technologies appropriated from Natives, colonial leaders were able to impose a new political ecology in the greater Northeast, projecting year-round authority over indigenous lands.

2012 Recipient of the Gerald R. Miller Book Award from the Interpersonal Communication Division of the National Communication Association (NCA) 2009 Recipient of the David R. Maines Narrative Research Award from the Ethnography Division of the National Communication Association (NCA) "The book is a valuable addition to the literature on friendship. Faculty who teach relationship development will find useful material for themselves and their students. Relationship researchers will find dozens of possible studies in these pages. Finally, any thoughtful person interested in relationship quality could profit from reading this interesting treatment of one of life's most valuable

attributes—our friends." - Phil Backlund, University of Denver Exploring how friends use dialogue and storytelling to construct identities, deal with differences, make choices, and build inclusive communities, *The Compass of Friendship* examines communication dialectically across private, personal friendships as well as public, political friendships. Author William K. Rawlins uses compelling examples and cases from literature, films, dialogue and storytelling between actual friends, student discussions of cross-sex friendships, and interviews with interracial friends.

Throughout the book, he invites readers to consider such questions as: What are the possibilities for enduring, close friendships between men and women? How far can friendship's practices extend into public life to facilitate social justice? What are the predicaments and promises of friendships that bridge racial boundaries? How useful and realistic are the ideals and activities of friendship for serving the well-lived lives of individuals, groups, and larger collectives?

The mental health system in America is hardly the front-burner issue it should be, despite lip service about reform after each new tragic mass killing. Yet every American should care deeply about fixing a system a presidential commission reported was in "shambles." By some measures, 20 percent of Americans have some sort of mental health condition, including the most vulnerable among us—veterans, children, the elderly, prisoners, the homeless. With *Mental Health, Inc.*, award-winning investigative journalist Art Levine delivers a Shock Doctrine-style exposé of the failures of our out of control, profit-driven mental health system, with a special emphasis on dangerous residential treatment facilities and the failures of the pharmaceutical industry, including the overdrugging of children with antipsychotics and the disastrous maltreatment of veterans with PTSD by the scandal-racked VA. Levine provides compelling narrative portraits of victims who needlessly died and some mentally ill people who won unexpected victories in their lives by getting smart, personalized help from "pyschosocial" programs that incorporate safe and appropriate prescribing, along with therapy and social support. He contrasts their stories with corrupt Big Pharma executives and researchers who created fraudulent marketing schemes. Levine also tells the dramatic David vs. Goliath stories of a few brave reformers, including Harvard-trained psychiatrist and researcher Dr. Stefan Kruszewski, who has acted as a whistleblower in several major cases, leading to important federal and state settlements; in addition, the book spotlights pioneering clinicians challenging outmoded, drug-and-sedate practices that leave 90 percent of people with serious mental illness too disabled to work. By taking a comprehensive look at mental health abuses and dangerous, ineffective practices as well as pointing toward solutions for creating a system for effective, proven and compassionate care, *Art Levine's essential Mental Health, Inc.* is a call to action for politicians and citizens alike—needed now more than ever.

Los Angeles in the 1960s gave the world some of the greatest music in rock 'n' roll history:

"California Dreamin'" by the Mamas and the Papas, "Mr. Tambourine Man" by the Byrds, and "Good Vibrations" by the Beach Boys, a song that magnificently summarized the joy and beauty of the era in three-and-a-half minutes. But there was a dark flip side to the fun fun fun of the music, a nexus between naïve young musicians and the fringe elements that exploited the decade's peace-love-and-flowers ethos, all fueled by sex, drugs, and overnight success. One surf music superstar unwittingly subsidized the kidnapping of Frank Sinatra Jr. The transplanted Texas singer Bobby Fuller might have been murdered by the Mob in what is still an unsolved case. And after hearing Charlie Manson sing, Neil Young recommended him to the president of Warner Bros. Records. Manson's ultimate rejection by the music industry likely led to the infamous murders that shocked a nation. *Everybody Had an Ocean* chronicles the migration of the rock 'n' roll business to Southern California and how the artists flourished there. The cast of characters is astonishing—Brian and Dennis Wilson of the Beach Boys, Jan and Dean, eccentric producer Phil Spector, Cass Elliot, Sam Cooke, Ike and Tina Turner, Joni Mitchell, and scores of others—and their stories form a modern epic of the battles between innocence and cynicism and joy and terror. You'll never hear that beautiful music in quite the same way.

Once again, Dr. Bollendorf, with Donna Gluck, has woven a vivid and entertaining tapestry of dysfunctional family dynamics and the ripples of sadness that drug addiction causes. As the effects of addiction explode, the romantic and familial relationships of the well-drawn characters, we see the radius of the blast expand to disrupt communities and cultures, particularly the Native American reservations and the tensions of coexistence with the white cities and towns. The themes of addiction, its treatment, and the recovery process are accurate and informative, but rather than simply posit these valuable lessons, *Autumn Snow* wraps it all in an entertaining and suspenseful murder mystery. A hell of a good read that entertains as well as informs. . . . (Prof. Frank Salvatini, MEd, CSADC, MISAI, NCACII Coordinator; Addictions Counselor Training Program, College of DuPage). This book, the third in the series, is an exciting murder mystery that blends insight into addiction recovery with a mysterious cast of characters. The reader is taken into the dark side of drug dealing and sinister secrets that add to the stresses and trials of a recovering police officer drawn into a web of deceit.

This book begins where basic trail guides and maps leave off. For each section of the trail, the authors describe the route in detail and recommend the best day hikes and short backpacks from each trailhead. They describe the plants and animals hikers will see, tell stories about local history, explain plate tectonics, and in a thousand other ways enrich your experience of the journey. For many people, the Pacific Crest Trail is the ultimate long-distance hiking trail. Beginning in the dry valleys of southern California, it follows the crest of the snow-capped Sierras and ends in the ancient forests of Washington's Cascades. Along the way, national treasures such as Yosemite, Crater Lake, and Mount Rainier make this trail one of the premier hiking destinations in the world. But hiking is about much more than getting from A to B. Berger and Smith draw on their tremendous experience—together they have logged more than 12,000 miles on the PCT—to give tested advice to long-distance hikers on trip planning, gear and safety, seasonal considerations, trailheads and resupplies, permits, and much more.
