The Lockheed Plant in Marietta has been building many of the world's most legendary aircraft for the past 60 years--and that doesn't even count its service building B-29 bombers for the Bell Aircraft Company during World War II. Lockheed's six decades have seen the plant build jet bombers, like the B-47 Stratojet; the world's most dominant fighter jet (the F-22 Raptor); and the most vaunted cargo planes (C-130 Hercules, C-141 StarLifter, and C-5 Galaxy). In *Images of America: The Lockheed Plant*, readers will learn about those planes, the people who designed and assembled them, and the plant in which they were built. The striking images in this book were shared by Lockheed Martin and the Marietta Daily Journal and depict the plant from its construction through today.

Awesome Stuff Routledge

Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city

districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does

it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

The Workbench Book Arcadia Publishing

Media Literacy Education in Action brings together the field's leading scholars and advocates to present a snapshot of the theoretical and conceptual development of media literacy education—what has influenced it, current trends, and ideas about its future. Featuring a mix of perspectives, it explores the divergent ways in which media literacy is connected to educational communities and academic areas in both local and global contexts. The volume is structured around seven themes:

- Media Literacy: Past and Present
- Digital Media and Learning
- Global Perspectives
- Public Spaces
- Civic Activism
- Policy and Digital Citizenship
- Future Connections

Compelling, well-organized, and authoritative, this one-stop resource for understanding more about media literacy education across disciplines, cultures, and divides offers the fresh outlook that is needed at this point in time. Globally, as more and more states and countries call for media literacy education more explicitly in their curriculum guidelines, educators are being required to teach media literacy in both elementary and secondary education contexts.
