DELACRUZ AUBREE

Catalogues of Sales Academy of Natural Sciences

The Bamberg version of the "Historia Romana" represents a fascinating witness to the transition from Latin to vernacular literature, which the author relates to the intellectual and ideological milieu of the Ottonians. This book presents the first edition of the paraphrase contained in the manuscript Bamberg, Hist. 3.

Bulletin of the Public Library of the City of Boston BRILL

The Fourth Edition of *The Light and Smith Manual* continues a sixty-five-year tradition of providing to both students and professionals an indispensable, comprehensive, and authoritative guide to Pacific coast marine invertebrates of coastal waters, rocky shores, sandy beaches, tidal mud flats, salt marshes, and floats and docks. This classic and unparalleled reference has been newly expanded to include all common and many rare species from Point Conception, California, to the Columbia River, one of the most studied areas in the world for marine invertebrates. In addition, although focused on the central and northern California and Oregon coasts, this encyclopedic source is useful for anyone working in North American coastal ecosystems, from Alaska to Mexico. More than one hundred scholars have provided new keys, illustrations, and annotated species lists for over 3,500 species of intertidal and many shallow water marine organisms ranging from protozoans to sea squirts. This expanded volume covers sponges, sea anemones, hydroids, jellyfish, flatworms, polychaetes, amphipods, crabs, insects, snails, clams, chitons, and scores of other important groups. The Fourth Edition also features introductory chapters on marine habitats and biogeography, interstitial marine life, and intertidal parasites, as well as expanded treatments of common planktonic organisms likely to be encountered in near-to-shore shallow waters.

Index Medicus

Georgian and Soviet investigates the constitutive capacity of Soviet nationhood and empire. The Soviet republic of Georgia, located in the mountainous Caucasus region, received the same nation-building template as other national republics of the USSR. Yet Stalin's

Georgian heritage, intimate knowledge of Caucasian affairs, and personal involvement in local matters as he ascended to prominence left his homeland to confront a distinct set of challenges after his death in 1953. Utilizing Georgian archives and Georgian-language sources, Claire P. Kaiser argues that the postwar and post-Stalin era was decisive in the creation of a "Georgian" Georgia. This was due not only to the peculiar role played by the Stalin cult in the construction of modern Georgian nationhood but also to the subsequent changes that de-Stalinization wrought among Georgia's populace and in the unusual imperial relationship between Moscow and Tbilisi. Kaiser describes how the Soviet empire could be repressive yet also encourage opportunities for advancement—for individual careers as well as for certain nationalities. The creation of national hierarchies of entitlement could be as much about local and republic-level imperial imaginations as those of a Moscow center. Georgian and Soviet reveals that the entitled, republic-level national hierarchies that the Soviet Union created laid a foundation for the claims of nationalizing states that would emerge from the empire's wake in 1991. Today, Georgia still grapples with the legacies of its Soviet century, and the Stalin factor likewise lingers as new generations of Georgians reevaluate the symbiotic relationship between Soso Jughashvili and his native land.
