*Who's who in Commerce and Industry* Springer Science & Business Media

How much extra net income growth can be had in rural areas of Africa by increasing the spending power of local households? The answer depends on how rural households spend increments to income, whether the items desired can be imported to the local area in response to increased demand, and, if not, whether increased demand will lead to new local production or simply to price rises. For every dollar in new farm income earned, at least one additional-tional dollar could be realized from growth multipliers, according to *Agricultural Growth Linkages in Sub-Saharan Africa*, Research Report 107, by Christopher L. Delgado, Jane Hopkins, and Valerie A. Kelly, with Peter Hazell, Anna A. McKenna, Peter Gruhn, Behjat Hojjati, Jayashree Sil, and Claude Courbois.

*Current List of Medical Literature* Princeton University Press

The essays ... have been selected from among the papers presented as a symposium on the social impact of cybernetics held in Washington, D.C., in November, 1964, under the joint sponsorship of Georgetown University, American University, and George Washington University with the cooperation of the American Society for Cybernetics.

*Principles of Stellar Dynamics* Bentham Science Publishers

*Astronomy and Astrophysics Abstracts*, which has appeared in semi-annual volumes since 1969, is devoted to the recording, summarizing and indexing of astronomical publications throughout the world. It is prepared under the auspices of the International Astronomical Union (according to a resolution adopted at the 14th General Assembly in 1970). *Astronomy and Astrophysics Abstracts* aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months.

This time interval is near to that achieved by monthly abstracting journals, compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume 7 contains literature published in 1972 and received before August 15, 1972; some older literature which was received late and which is not recorded in earlier volumes is also included.

**Catalogue général de la librairie française** Intl Food Policy Res Inst

This book discusses the use of microorganisms for improving nutrient quality and producing healthier foods. Conventional roles of microbes in food preservation and in producing more readily digestible nutrients via natural fermentation processes are also examined. Individual chapters explore topics such as bio-preservation, incorporation of lactic acid bacteria, traditional fermented Mongolian foods, fermented fish products of Sudan, probiotics in China, fermented soymilk, food colorants, and the effect of food on gut microbiota. Readers will gain insights into current trends and future prospects of functional foods and nutraceuticals. This volume will be of particular interest to scientists working in the fields of food sciences, microbiology, agriculture and public health.

*Surface Water Records of Georgia* Scarecrow Press

The novel coronavirus SARS-CoV-2, which causes the disease known as COVID-19, has infected people in 212 countries so far and on every continent except Antarctica. Vast changes to our home lives, social interactions, government functioning and relations between countries have swept the world in a few months and are difficult to hold in one's mind at one time. That is why a collaborative effort such as this edited, multidisciplinary collection is needed. This book confronts the vulnerabilities and interconnectedness made visible by the pandemic and its consequences, along with the legal, ethical and policy responses. These include vulnerabilities for people who have been harmed or will be harmed by the virus directly and those harmed by measures taken to slow its relentless march; vulnerabilities exposed in our institutions, governance and legal structures; and

vulnerabilities in other countries and at the global level where persistent injustices harm us all. Hopefully, COVID-19 will force us to deeply reflect on how we govern and our policy priorities; to focus preparedness, precaution, and recovery to include all, not just some. Published in English with some chapters in French.

**The Biochemistry of the Grape Berry** IUCN

Cameroon is a country endowed with a variety of climates and agricultural environments, numerous minerals, substantial forests, and a dynamic population. It is a country that should be a leader of Africa. Instead, we find a country almost paralyzed by corruption and poor management, a country with a low life expectancy and serious health problems, and a country from which the most talented and highly educated members of the population are emigrating in large numbers. Although Cameroon has made economic progress since independence, it has not been able to change the dependent nature of its economy. The economic situation combined with the dismal record of its political history, indicate that prospects for political stability, justice, and prosperity are dimmer than they have been for most of the country's independent existence. The fourth edition of the *Historical Dictionary of the Republic of Cameroon* has been updated to reflect advances in the study of Cameroon's history as well as to provide coverage of the years since the last edition. It relates the turbulent history of Cameroon through a chronology, an introductory essay, a bibliography, and over 600 cross-referenced dictionary entries on significant persons, events, places, organizations, and other aspects of Cameroon history from the earliest times to the present.

*Fusion des intérêts territoriaux et commerciaux, ou, Nouveau système de crédit applicable par le commerce, à la propriété foncière et aux industries agricoles et manufacturières* IRD Editions

This volume consists of a carefully edited version of the General Course on Public International Law delivered at the Hague Academy of International Law to commemorate the fiftieth anniversary of the foundation of the United Nations. The author brings to them not only his background of academic distinction,

but his experience as a practitioner concerned with major international legal issues. The rule of law in international affairs is a question of perennial concern but it is of greater moment these days for a number of reasons. The active agenda of the Security Council and its relative solidarity creates a paradox. Its increased political power is a source of hope but the modalities of the exercise of power present problems of principle and of legal concern. Another area of concern is the International Court, which has had a successful record since the early eighties and provides one of the guarantees of the maintenance of legality. Recent successes of the Court include the effective resolution of the territorial dispute between Chad and Libya. The general level of compliance with its decisions by States is impressive. Yet its success is matched not by encouragement and enhancement of its facilities but by United Nations financial constraints which hinder its work and, ultimately, may threaten its independence in relation to the political organs of the United Nations.

Encyclopédie du dix-neuvième siècle Martinus Nijhoff Publishers  
A foundational work on historical and social studies of quantification What accounts for the prestige of quantitative methods? The usual answer is that quantification is desirable in social investigation as a result of its successes in science. Trust in Numbers questions whether such success in the study of stars, molecules, or cells should be an attractive model for research on human societies, and examines why the natural sciences are highly quantitative in the first place. Theodore Porter argues that a better understanding of the attractions of quantification in business, government, and social research brings a fresh perspective to its role in psychology, physics, and medicine. Quantitative rigor is not inherent in science but arises from political and social pressures, and objectivity derives its impetus from cultural contexts. In a new preface, the author sheds light on the current infatuation with quantitative methods, particularly at the intersection of science and bureaucracy.

The Social Impact of Cybernetics Springer

Most basic information on plant-mealybug interactions during the last decade has come from research on the cassava *Manihot esculenta* Crantz (Euphorbiaceae) system with two mealybug species, namely *Phenacoccus manihoti* Matile-Ferrero and *Phenacoccus herreni* Cox and Williams (Sternorrhyncha: Pseudococcidae). Both these insects cause severe damage to

cassava in Africa and South America, respectively. This book reviews these interactions (plant selection by the insects, nutritional requirements

Dictionary Catalog of the Department Library Springer Science & Business Media

During a forum held at the Vth IUCN World Parks Congress in South Africa in 2003, the Wildlife Conservation Society (WCS) and the IUCN SSC Veterinary and Southern Africa Sustainable Use Specialist Groups (VSG and SASUSG) brought together nearly 80 experts from Africa and beyond to develop ways to tackle the immense health-related conservation and development challenges at the wildlife/domestic animal/human interface facing East and Southern Africa today, and tomorrow. This volume focuses on several themes of critical importance to the future of animal agriculture, wildlife, and, of course, people: competition over grazing and water resources, disease mitigation, local and global food security and other potential sources of conflict related to the overall challenges of land-use planning and the pervasive reality of resource constraints. This publication seeks to draw attention to the need to move towards a "one health" perspective - an approach that was the foundation of the discussions in Durban, and a theme pervading these thought-provoking, insightful, and practical Proceedings.

**Methods in Lignin Chemistry** Notre Dame : University of Notre Dame Press

In this classic text, a Nobel Prize-winning astrophysicist presents the theory of stellar dynamics as a branch of classical dynamics-- a discipline in the same general category as celestial mechanics. His method offers the advantages of clarifying the theory's fundamental issues and defining its underlying motivations. S. Chandrasekhar investigates two areas. The first concerns problems in which the time of relaxation of a stellar system is central. His method consists of analyzing the effects of stellar encounters in terms of the two-body problem of classical dynamics and applying this theory to the dynamics of star clusters. The second area investigates problems centering around Liouville's theorem and the solutions of the equation of continuity; here, the author discusses the dynamic implications of the existence of a field of differential motions, which appears to be the most striking kinematic feature of the galaxy and the extragalactic systems. This edition includes two papers by the

author that were published after Principles of Stellar Dynamics and that have been studied and quoted extensively: "New Methods in Stellar Dynamics" (originally published in the Annals of the New York Academy of Sciences) and "Dynamical Friction" (originally published in The Astrophysical Journal).

Catalogue of Printed Maps Springer Science & Business Media  
An up-to-date compilation of the theoretical background and practical procedures involved in lignin characterization. Whenever possible, the procedures are presented in sufficient detail to enable the reader to perform the analysis solely by following the step-by-step description. The advantages and limitations of individual methods are discussed and, more importantly, illustrated by typical analytical data in comparison to results obtained from other methods. This handbook serves the need of researchers and other professionals in academia, the pulp and paper industry as well as allied industries. It is equally useful for those with no previous experience in lignin or lignocellulosics.

Ocean Highways University of Ottawa Press

The book presents an overview of the International practices and state-of-the-art of LCA studies in the agri-food sector, both in terms of adopted methodologies and application to particular products; the final purpose is to characterise and put order within the methodological issues connected to some important agri-food products (wine, olive oil, cereals and derived products, meat and fruit) and also defining practical guidelines for the implementation of LCAs in this particular sector. The first chapter entails an overview of the application of LCA to the food sector, the role of the different actors of the food supply chain and the methodological issues at a general level. The other chapters, each

with a particular reference to the main foods of the five sectors under study, have a common structure which entails the review of LCA case studies of such agri-food products, the methodological issues, the ways with which they have been faced and the suggestion of practical guidelines.

*New Observations, Natural, Moral, Civil, Political, and Medical, on City, Town and Country Bills of Mortality. To which are Added, Large and Clear Abstracts of the Best Authors who Have Wrote on that Subject. With an Appendix on the Weather and Meteors. By*

*Thomas Short*

The revised Third Edition of *The Prokaryotes*, acclaimed as a classic reference in the field, offers new and updated articles by experts from around the world on taxa of relevance to medicine, ecology and industry. Entries combine phylogenetic and systematic data with insights into genetics, physiology and application. Existing entries have been revised to incorporate rapid progress and technological innovation. The new edition

improves on the lucid presentation, logical layout and abundance of illustrations that readers rely on, adding color illustration throughout. Expanded to seven volumes in its print form, the new edition adds a new, searchable online version.
