Run away to the Dorset countryside, to the sleepy village of Honeymoon, where rose-adorned thatched cottages soak up the sunlight and Emma is risking everything for a brave new start on life and love...

When Emma's useless fiancé tells her a lie she cannot forgive, she decides enough is enough. She leaves him, quits her dead-end job and travels hundreds of miles away to the ancient village of Honeymoon in the Dorset countryside, to help her friend Tia turn the old train station into a boutique hotel. Tia has told Emma that it

will be a project, but when Emma arrives in Honeymoon and sees a weed-choked crumbling ruin, her vision of an idyllic life in Dorset begins to disintegrate. But when she meets twinkly-eyed builder Aiden in the village shop, and sparks fly between them, she can't help but feel that the stars have for once aligned. As work begins on the hotel, Emma and Aiden grow closer, and on sun-dappled evening walks, he tells her the secrets of the village. But there are some villagers who wish that Emma had never arrived in Honeymoon... And when Emma is involved in a terrible accident on site, and then discovers what Aiden has been keeping from her, it feels like the universe is telling her to leave Honeymoon for good. What if she was wrong to say goodbye to all that was safe and familiar? Will she ever be able to find

her happy-ever-after in Honeymoon? A completely gorgeous and romantic read about being brave and taking chances on love and life. Wherever we look, we notice complexity. Philosophically, the concept constitutes a tangled web of problems, in theory as well as daily life. Complexity and Analysis is a meticulous rendering of these problems, tackling the seldom considered nature of complexity that confronts ontological analysts and holists alike. Stewart Umphrey expertly describes the limits of analysis as they have come to light within mathematics, the natural sciences, and analytic philosophy, explaining how Aristotle came upon, and sought to move beyond, the limits of ontological analysis. In trying to understand any complex entity, Umphrey argues, one succeeds in meeting the criterion of metaphysical adequacy only if one fails to meet the criterion of epistemological adequacy. Ranging across an array of subjects including Kantian and Hegelian idealism,

this book provides a superb account of how our own complexity presents not only theoretical problems, but ethical and political dilemmas of great practical significance.

As a probation officer and social worker, Anne Bannister has successfully used creative therapies with abused children for 25 years. Combining her practical experience and recent doctoral research she reflects on how and why these therapies actually work in the healing process. She shows how in 'the space between' children and their therapists, the child and adult can each use their creative skills to aid developmental processes, reverse negative brain patterns and affect positive behavioural changes to heal the damage caused by severe abuse in childhood. The author presents a practical model called the Regenerative Approach to use when assessing and working therapeutically with traumatised children. Her research has implications for those working in the field of children's development and learning, and provides an important new approach for social workers, creative therapists and all those who work with traumatised children. *American Journal of Education* Jessica Kingsley Publishers

"Dr. Macaluso has written the Iliad and the Odyssey of multiple sclerosis while playing the part of Odysseus. Amazing!" Carlo Tornatore, MD, Vice Chairman, Department of Neurology Georgetown University Hospital, Washington, DC
Vincent F. Macaluso was in medical school when he got the news: he had multiple sclerosis. He soon learned that almost a half million people in the United States have multiple sclerosis—and millions more worldwide. Many have obvious symptoms, such as trouble with walking, balance, and coordination, but the most insidious aspect of the disease is how it affects the mind. Macaluso shares insights from his vantage point as a doctor and an MS patient, helping his peers understand symptoms they may not grasp and offering wisdom for those who live with the disease. Learn how to • anticipate and overcome problems concentrating; • manage swirling emotions; • understand MS from a neurological standpoint; • preserve and continue to enjoy an active sex life; and • prevent the disease from ruining family life. Laced with humor and filled with diagrams and the author's own recollections about how he's kept MS from controlling his life, this account is essential reading for doctors, patients, and anyone who has an MSer in his or her life.

An ethnographic study of diverse children on the autism spectrum and the role of media and technology in their everyday lives. In spite of widespread assumptions that young people on the autism spectrum have a "natural" attraction to technology—a premise that leads to significant speculation about how media helps or harms them—relatively little research actually exists about their everyday tech use. In *Kids Across the Spectrums*, Meryl Alper fills this gap with the first book-length ethnography of the digital lives of autistic young people. Based on research with more than sixty neurodivergent children from an array of racial, ethnic, and socioeconomic backgrounds, *Kids Across the Spectrums* delves into three overlapping areas of their media usage: cultural belonging, social relationships, and physical embodiment. Alper's work demonstrates that what autistic youth do with technology is not radically different from their non-autistic peers. However, significant social and health inequalities—including limited recreational programs, unsafe neighborhoods, and challenges obtaining appropriate therapeutic services—spill over into their media habits. With an emphasis on what autistic children bring to media as opposed to what they supposedly lack socially, Alper argues that their relationships do not exist outside of how communication technologies affect sociality, nor beyond the boundaries of stigmatization and society writ large. Finally, she offers practical suggestions for the education, healthcare, and technology sectors to promote equity, inclusion, access, and justice for autistic kids at home, at school, and in their communities. "Nick and Norah's Infinite Playlist meets Cinderella in this thoroughly modern romance." —HelloGiggles Late one night in a dingy Los Angeles club, Nate and Cameron meet and discover they have much more in common than their love of an obscure indie band. But when Nate learns that Cameron is the heir to a soul-sucking record label—the very one that destroyed his father's life—he runs away as fast as he can. The only evidence of their brief but intense connection is the blurry photo Cameron snaps of Nate's Sharpied Chuck Taylors. When Cameron's sister Tess—a famous model and socialite—posts the photo on Instagram for her legions of fans, the internet just about breaks with the news of this modern fairy tale. "Anyone know the owner of these

shoes?" she writes. "My Prince Charming brother is looking for his Cinderella!" But while the viral sensation begins to bring the pair back together, their own demons and pasts might get in the way of any happily ever afters . . .

Written by an inmate serving 45 years for a drug conviction when he was 23, this is an in-depth view living behind bars from the perspective of prisoners themselves. Sections of the book are based on length of imprisonment. Prisoners in Fort Dix, N.J., detail their unique experiences, thoughts, and feelings about life on the inside. Some describe the actions that lead to their confinement, or detail the complexities of living in all-male communities. Others reveal the ways they cope with their terms, or the expectations they have for life after prison. Santos offers the gripping stories of men serving a variety of terms, providing commentary and analysis as he guides readers through the prison experience. How men adjust to their confinement, and how they utilize their time while serving their sentences, can be a predictor of future success or failure both in prison and society upon their release. Through these often-difficult accounts, readers gain a greater understanding of what it means to be a prisoner, and how the system itself can contribute to both positive adjustment and negative outcomes alike.

Each volume contains an Introduction that brings the reader up to date with the latest developments in African ornithology, including the evolution and biogeography of African birds. Diagnoses of the families and genera, often with superspecies maps, are followed by the comprehensive species accounts themselves. These include descriptions of range and status, field characters, voice, general habits, food, and breeding habits. Full bibliographies, acoustic references, and indexes complete this scholarly work of reference. This first volume in the series deals comprehensively with Ostrich, albatrosses, petrels and shearwaters, storm-petrels, penguins, divers, grebes, tropicbirds, boobies, cormorants, darter, pelicans, frigatebirds, herons, Hamerkop, storks, Shoebill, ibises and spoonbills, flamingos, swans, geese and ducks, and diurnal birds of prey. The editors and artists have worked closely with other authors - all acknowledged experts in their field - to produce a superb reference in which comprehensive texts on every species are complemented by accurate and detailed paintings and drawings of the birds themselves.

Do you diet but still find it impossible to lose weight? Do you crave candy, sodas, popcorn, bagels, pasta, chips, cookies? Do you have trouble sleeping through the night? Do you awaken exhausted in the morning even if you've slept? Does it take a cup of coffee or more to get you going in the morning? In today's high-stress world, many would answer yes to at least one of these questions. Irritability, insomnia, weight gain or loss, recurring colds and flu, environmental sensitivities, and low energy are problems that are becoming more commonplace every year, and can develop into more serious health concerns such as heart disease and type II diabetes. But we don't have to live like this. Anti-aging pioneer Jesse Lynn Hanley, M.D. believes that the lifestyles we've grown accustomed to are responsible for our burned-out systems and tired adrenal glands that were not meant to function under constant duress. Her Ten Simple Solution program can show anyone how to repair a lifetime of damage and experience the best health ever: · Eat, Eat, Eat, All Day Long · Exercise Less · Calm Your Central Nervous System · Pay Off Your Sleep Debt

The Shōbōgenzō (The Treasury of the True Dharma Eye) is a revered eight-hundred-year-old Zen Buddhism classic written by the Japanese monk Eihei Dōgen. Despite the timeless wisdom of his teachings, many consider the book difficult to understand and daunting to read. In *Don't Be a Jerk*, Zen priest and bestselling author Brad Warner, through accessible paraphrasing and incisive commentary, applies Dōgen's teachings to modern times. While entertaining and sometimes irreverent, Warner is also an astute scholar who sees in Dōgen very modern psychological concepts, as well as insights on such topics as feminism and reincarnation. Warner even shows that Dōgen offered a "Middle Way" in the currently raging debate between science and religion. For curious readers worried that Dōgen's teachings are too philosophically opaque, *Don't Be a Jerk* is hilarious, understandable, and wise.

The inspiration for the series *Best Foot Forward*, streaming soon on Apple TV+! When Josh was twenty-five years old, it came to his attention that he never had a girlfriend. At the time, he was actually under the impression that he was in a relationship, so this bit of news came as something of a shock. Why was Josh still single? To find out, he tracked down each of the girls he had tried to date since

middle school and asked them straight up: What went wrong? The results of Josh's semi-scientific investigation are in your hands. From a disastrous Putt-Putt date involving a backward prosthetic foot, to his introduction to CFD (Close Fast Dancing), and a misguided "grand gesture" at a Miss America pageant, this story is about looking for love—or at least a girlfriend—in all the wrong places. Poignant, relatable, and totally hilarious, this memoir is for anyone who has ever wondered, "Is there something wrong with me?" (Spoiler alert: the answer is no.)
