"DIVIDED WE FALL delivers cover-to-cover action, intrigue and suspense, all with a gut-punch of an ending that'll leave you begging for the next installment." -- Brad Thor, author of THE LAST PATRIOT  
 Danny Wright never thought he'd be the man to bring down the United States of America. In fact, he enlisted in the Idaho National Guard because he wanted to serve his country the way his father did. When the Guard is called up on the governor's orders to police a protest in Boise, it seems like a routine crowd-control mission ... but then Danny's gun misfires, spooking the other soldiers and the already fractious crowd, and by the time the smoke clears, twelve people are dead. The president wants the soldiers arrested. The governor swears to protect them. And as tensions build on both sides, the conflict slowly escalates toward the unthinkable: a second American civil war. With political questions that are popular in American culture yet rare in YA fiction, and a provocative plot that asks what happens when the states are no longer united, *Divided We Fall* is Trent Reedy's very timely YA debut.

*Quitters Never Win* Macmillan

You can't win a fight with your boss. If you have ever thought otherwise, then you're dead wrong. And your career is over, too. In this lively guide to

surviving the pitfalls of the modern corporate environment, Tom Markert, a senior executive at information giant ACNielsen, presents 56 practical rules that every employee, manager, and executive must follow in order to find corporate success. With rules such as "Work hard and smart" and "Find a good boss" Markert addresses some of the most important questions facing corporate executives today. Here, in colorful and inspiring language, he offers practical advice on how to impress and make your boss look good, how to position yourself for success, and how to address work and social situations that every employee must conquer. And, most important, Markert covers the number one question in any employee's mind: How do I work with my boss? Here, this book becomes an indispensable guide to corporate life. Markert draws on his experience to illustrate these rules with telling, and often funny, anecdotes about people who have not followed the rules and paid the ultimate corporate price -- failure, embarrassment, and a career stopped dead in its tracks.

Chris Nilan, who grew up in the tough and gritty Irish enclave in Boston, was a feared enforcer for the Montreal Canadiens, the Boston Bruins, and the New York Rangers and a Stanley Cup champion never afraid to go into the corners or take off his gloves. He was a valued teammate whose very presence on the ice affected the way the game was played. As an enforcer and as a teammate, Nilan ranks among the greatest of all time; when the cheering stopped, however, Chris Nilan did not do well. The same qualities—his aggressiveness and high-emotion style—that proved so valuable on the ice did not serve him well when his career ended. Nilan turned to drugs and alcohol to dull his pain and nearly died from an overdose. His story is a fascinating and troubling exposé of the booze, bills, and drugs that destroy so many athletes after their careers are over. But it's also a story of triumph, as Nilan has been the victor in his fight against his demons.

*Women Fight Back*: The centuries-long struggle for liberation follows the evolution of a movement that thoroughly transformed society. Donna Goodman, a long-time partisan of the struggle for women's liberation, recounts how women in the United States confronted a whole society - from the legal system to popular culture to home life - that was immersed in blatant sexism, discrimination and anti-woman violence. Challenging the notion that the women's movement just reflected the concerns of the middle class, Goodman highlights the contributions of working-class, Black, Latina and other oppressed women, who always made sure their presence was felt and perspectives were heard. Generation after generation, the movement itself became the terrain on which women of different backgrounds articulated and debated the meaning of liberation, often in radical terms. *Women Fight Back* compares the status of women in the United States with other capitalist societies, and with women under socialism. It concludes with a review of the challenges of women's organizing today, projecting a vision of how a new wave of militant struggle could be coming in the era of Trump and into the future. "The idea for this book grew out of a mix of indignation and optimism: indignation toward the right-wing backlash against the gains women have won over more than 150 years of struggle for equality; and optimism that women would once again rise up and fight back to preserve and extend those gains. "The election of (Donald) Trump was a game changer. With this blatant sexist and his hard right-wing cabinet occupying the White House, all the gains of the women's movement for the last 50 years are in grave danger. It is urgent to build a militant, broad and united women's movement to fight back." "Donna Goodman's book is appearing when we need it most - a time when a new mass women's movement is emerging. Recovering the militant history of two hundred years of women's struggles, Goodman reminds us that an attack on inequality, exploitation, and militarism has always been feminism's revolutionary core." - Jodi Dean, author of *The Communist Horizon*

The MacArthur grant-winning environmental justice activist's riveting memoir of a life fighting for a cleaner future for America's most vulnerable A Smithsonian Magazine Top Ten Best Science Book of 2020 Catherine Coleman Flowers, a 2020 MacArthur "genius," grew up in Lowndes County, Alabama, a place that's been called "Bloody Lowndes" because of its violent, racist history. Once the epicenter of the voting rights struggle, today it's Ground Zero for a new movement that is also Flowers's life's work—a fight to ensure human dignity through a right most Americans take for granted: basic sanitation. Too many people, especially the rural poor, lack an affordable means of disposing cleanly of the waste from their toilets and, as a consequence, live amid filth. Flowers calls this America's dirty secret. In this "powerful and moving book" (Booklist), she tells the story of systemic class, racial, and geographic prejudice that foster Third World conditions not just in Alabama, but across America, in Appalachia, Central California,

coastal Florida, Alaska, the urban Midwest, and on Native American reservations in the West. In this inspiring story of the evolution of an activist, from country girl to student civil rights organizer to environmental justice champion at Bryan Stevenson's Equal Justice Initiative, Flowers shows how sanitation is becoming too big a problem to ignore as climate change brings sewage to more backyards—not only those of poor minorities.

We all do things that we wish we wouldn't. We overeat, under perform, procrastinate, push people away and say the wrong things at precisely the worst moments. What if we could find a way to overcome our self-destructive tendencies? Fight explains the psychology of self-sabotage and offers a practical guide to taking control. While training as a competitive boxer and kickboxer, Hazel Gale developed anxiety issues that led to emotional and physical burnout. Discovering cognitive hypnotherapy not only helped her back on the road to health, but ultimately turned her whole life around. She learnt to understand competition, success, fear and challenge in new ways, leading to international titles across both sports. Hazel felt compelled to introduce others to the profound benefits of cognitive hypnotherapy. She trained as a therapist and is now one of the most sought-after practitioners in Britain.

This damning account of the forces that have hijacked progress on climate change shares a bold vision of what it will take, politically and economically, to face the existential threat of global warming head-on. In the past few years, it has become impossible (for most) to deny the effects of climate change and that the planet is warming, and to acknowledge that we must act. But a new kind of denialism is taking root in the halls of

power, shaped by a quarter-century of neoliberal policies, that threatens to doom us before we've grasped the full extent of the crisis. As Kate Aronoff argues, since the 1980s and 1990s, economists, pro-business Democrats and Republicans in the US, and global organizations like the UN and the World Economic Forum have all made concessions to the oil and gas industry that they have no intention of reversing. What's more, they believe that climate change can be solved through the market, capitalism can be a force for good, and all of us, corporations included, are fighting the good fight together. These assumptions, Aronoff makes abundantly clear, will not save the planet. Drawing on years of reporting and rigorous economic analysis, Aronoff lays out a robust vision for what will, detailing how to constrain the fossil fuel industry; transform the economy into a sustainable, democratic one; mobilize political support; create effective public-private partnerships; enact climate reparations; and adapt to inevitable warming in a way that is just and equitable. Our future, *Overheated* makes clear, will require a radical reimagining of our politics and our economies, but if done right, it will save the world.
