Handgun enthusiasts, gun-owning do-it-yourself, law enforcement officials, and gunsmiths here is the ultimate one-volume guide to acquiring and developing all the necessary skills for making pistol repairs at home, from helpful hints on work space and setting up a small shop, to the tools needed and how to use them properly, to welding, hardening, and gun finishing. All this valuable information, plus much more, is contained in this easy-to-use reference for handgun aficionados.

A.H. Fox Down East Books

The popularity of rifles designed to take big game has never been greater. Terry Wieland, a widely recognized firearms expert, explores in detail the rifles and calibers that are drawing attention. This second edition covers what has changed in the field since the first edition was published-new calibers, new cartridges, new guns, new actions-and includes new material on action and barrel manufacture, tracing the production of a fine, custom-made, big-bore rifle.

Tools and Weapons Gun Digest Books

The updated second edition of Handbook of Firearms and Ballistics includes recent developed analytical techniques and methodologies with a more comprehensive glossary, additional material, and new case studies. With a new chapter on the determination of bullet caliber via x-ray photography, this edition includes revised material on muzzle attachments, proof marks, non-toxic bullets, and gunshot residues. Essential reading for forensic scientists, firearms examiners, defense and prosecution practitioners, the judiciary, and police force, this book is also a helpful reference guide for undergraduate and graduate forensic science students.

Handgun Buyer's Guide Simon and Schuster

Richard Gatling, the one-time philanthropist, had been stung by growing competition. In 1881 he published a forthright challenge in the Army & Navy Journal. The Gatling Gun Many articles have recently appeared in the press, claiming the superior advantages of the Gardner and other machine guns over the Gatling gun. In order to decide which is the best gun, the undersigned offers to fire his gun against any other gun, on the following wagers, viz.: First, \$500 that the Gatling can fire more shots in a given time, say one minute. Second, \$500 that the Gatling can give more hits on a target, firing, say one minute-at a range of 800 or 1,000 yards. The winner to contribute the money won to some charitable object. The time and place for the trials to be mutually agreed upon. R.J. Gatling of Hartford, Conn. No one took up the challenge, possibly because the various purchasers of these guns had made up their own minds about the merits of the rival weapons. Nevertheless, of all the rapid-firing guns in business at the time, the Gatling had pride of place. It was seeing service all over the world, and perhaps Gatling should not have bothered to express such apparent nervousness. What he did not know, and could not then know, was that an electrician working out of New York City would soon serve as the greatest rival of them all. Three years after that gamble had been published in the Journal, Hiram Stevens Maxim would be travelling to Europe. There he would appreciate quite how many nations were rattling sabres at each other, and hear his friend's advice that, if he wished to make money, he should help their citizens kill each other. And that is what he did. The 'greatest mechanic of all' would change warfare dramatically, and the first fully automatic machine gun would eclipse all others.

Survival Guns Random House (NY)

If you want to know what it really takes to prevail in a gunfight, you must go to a person who's been in them. Jim Cirillo is that person. As one of the top guns in the New York City Police Department Stakeout Squad, Cirillo participated in some of the most harrowing of the unit's 252 armed confrontations with the worst of New York's criminal element. He went on to become one of the most sought-after combat shooting instructors in the country. This book is packed with practical information that can come only from someone who has experienced the fear and intensity of an actual shootout. Find out what Cirillo has to say about how to handle the stress of a gunfight, the qualities of a good gunfighter, how to aim a handgun in the heat of combat, which types of bullets offer the best stopping power, the most vital single element to develop in training to survive a gun battle, plus hair-raising and humorous tales of life in one of the most elite units in law enforcement history."There is no better way to learn practical defensive shooting tactics and techniques than from an experienced instructor who has been there. Jim Cirillo has been there." --from the foreword by Ray Chapman

Saint Martin's Paperbacks

David Carr was an addict for more than twenty years -- first dope, then coke, then finally crack -- before the prospect of losing his newborn twins made him sober up in a bid to win custody from their crack-dealer mother. Once recovered, he found that his recollection of his 'lost' years differed -- sometimes radically -- from that of his family and friends. The night, for example, his best friend pulled a gun on him. 'No,' said the friend (to David's horror, as a lifelong pacifist), 'It was you that had the gun.' Using all his skills as an investigative reporter, he set out to research his own life, interviewing everyone from his parents and his ex-partners to the policemen who arrested him, the doctors who treated him and the lawyers who fought to prove he was fit to have custody of his kids. Unflinchingly honest and beautifully written, the result is both a shocking account of the depths of addiction and a fascinating examination of how -- and why -- our memories deceive us. As David says, we remember the stories we can live with, not the ones that happened.

No one knows and writes about machine guns like Peter Kokalis. Kokalis on Machine Guns collects the best Kokalis articles and columns on full-auto arms. It covers everything from antiques like the Colt Potato Digger to modern machine guns like the M240B, with everything in between. Whether it's an old favorite like the Thompson or a rarity like the Austrian M.30, it gets the definitive Kokalis treatment. He doesn't leave out the accessories, either, covering belts, tripods, magazines, gunner's kits, and the whole panoply of gadgets that make machine gun collecting such a fascinating hobby. Kokalis didn't learn about machine guns from a book; he's owned hundreds and fired hundreds more in combat zones like Afghanistan, Bosnia and El Salvador.

New International Encyclopedia Simon and Schuster

The revised third edition of the landmark Guns in American Society provides an authoritative and objective survey of the history and current state of all gun-related issues and areas of debate in the United States. Guns in American Society: An Encyclopedia of History, Politics, Culture, and the Law is a comprehensive and evenhanded three-volume reference resource for understanding all of the political, legal, and cultural factors that have swirled around gun rights and gun control in America, past and present. The encyclopedia draws on a vast array of research in criminology, history, law, medicine, politics, and social science. It covers all aspects of the issue: gun violence, including mass shootings in schools and other public spaces; gun control arguments and organizations; gun rights arguments and organizations; the firearms industry; firearms regulation, legislation, and court decisions; gun subcultures (for example, hunters and collectors); leading opinion-shapers on both sides of the gun debate; technological innovations in firearm manufacturing; various types of firearms, from handguns to assault weapons; and evolving public attitudes toward guns. Many of these entries place the topics in both historical and cross-cultural perspective. Serves as the most

comprehensive single source on the gun issue published to date, drawing on a vast array of research in criminology, history, law, medicine, politics, and social science in more than 400 entries Places topics in historical, political, and cross-cultural perspective Carefully cross-references and appends entries with suggested readings, representing the best of current scholarship Provides a chronology of important events and developments related to guns in American society Include appendices on federal gun laws, state gun laws, and organizations involved in gun debate (on both sides)

Dangerous-Game Rifles AuthorHouse

When he wrote *Survival Guns* in 1979, Mel Tappan demonstrated that having the right weapons for securing food and providing personal defense is the key to sustaining life on an independent basis, whether or not a catastrophe occurs. This is even more true today. *Survival Guns* became the standard in its own time and went through several printings. When it finally went out of print, it graduated from a classic to a sought-after collector's item, because the principles and advice in this well-reasoned volume are sound and perennially valuable. Some new guns and some new calibers have become available since this book was first published, but its principles, advice, and value remain unchanged. Having more choices only increases the value of advice on how to choose what is best for you. As used copies of this book became harder and harder to find, Paladin received numerous requests to bring Tappan's classic back into print. We are pleased to make the most well-known survival firearms book ever published available once more to a new generation of concerned citizens facing the same threats Tappan chronicled during his lifetime. *Survival Guns* remains the definitive book for anyone interested in the practical use of firearms and related weapons for defense, food gathering, and predator and pest control under conditions of long-term, self-sufficient living.

American Gun Gun Digest Books

The one-stop-shop for prospective handgun buyers. The market for new handguns is expanding rapidly, and that's good news for consumers. Each year more and more new models break cover and there has never been a better time to be in the market for a new handgun, whether you're a recreational shooter, a concealed carry permit holder, a hunter or a serious competitive shooter. Today's handguns offer superb machining and utilize some of the most technologically-advanced alloys, polymers and finishes to help make the current crop of handguns lightweight, accurate, durable, and affordable. This increase in product offerings stem from new interest in handguns, primarily as a result of nationwide issuance of concealed carry permits. As laws have been enacted that protect the rights of gun owners and defend our personal liberties, more and more new shooters are showing up on the range. But first-time shooters and new concealed carry permit holders are not the only segment of the handgun market that is seeing growth and interest. Pistol competitions have become more popular and more advanced, evolving from slow-fire matches at local gun clubs to modern IPSC, IDPA and 3-gun competitions. Handgun Buyer's Guide will help both the bewildered new shooter find their feet and purchase a handgun, find the best accessories, and locate a place to practice on hone their skills. You'll find all you need for owning a handgun in the Handgun Owner's Guide! Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Jane's Fighting Ships John Wiley & Sons

Ours is a nation in the grip of a strange kind of mania. Why after President Reagan was shot was there virtually no handgun legislation? Why after the Columbine massacre in Littleton, Colorado, was nothing done to regulate the tools that children most frequently use to kill one another? Why was there no legislative response after a six-year-old in Flint, Michigan, shot a classmate with a .32 caliber "pocket rocket"? Tragedy follows tragedy, with twelve children shot dead every day in America, but guns remain less regulated than automobiles. Why? As authors Peter Harry Brown and Daniel G. Abel in this powerful book demonstrate, it is because of the terrible power of the gun coalition. *Outgunned* begins with the story of Wendell Gauthier, the "master of disaster" attorney, who brought down the tobacco industry to the tune of billions and then turned his attention to guns. He struck fear into the hearts of the gun manufacturers as he set out to make gunmakers bear some liability for the killings caused by the often poorly made, inaccurate handguns they marketed to criminals. Coauthor Daniel G. Abel worked for Gauthier, along with other attorneys, as the gun-control campaign gathered momentum. This legal initiative seemed to be about to make history and change the face of violence in America, but sadly, Wendell Gauthier died of cancer before meaningful gun control could be established. More than thirty class-action suits against gun manufacturers now languish in courtroom paralysis while as many Saturday night specials as ever are being made. What happened? Brown and Abel demonstrate how the pro-gun forces once again curbed the will of a nation. This book shows the enormous power of the NRA -- how it killed pending legislation in Congress, hijacked the Campaign Act to fund the George W. Bush presidential election victory, and eviscerated the American Shooting Sports Council. That association and the gun manufacturers actually wanted to compromise and agree to new handgun laws, implicitly accepting some liability, but the NRA leadership, with Charlton Heston as their president, crushed them. In *Outgunned*, Brown and Abel uncover how NRA lobbyists were instrumental in stopping Smith & Wesson in its tracks. They show how the tendrils of the NRA reach into the Christian Alliance and Republican Party, and how men like John McCain have fought back and been undermined. *Outgunned* reveals how the NRA began dealing with President George W. Bush when he was still governor of Texas -- prodding him into signing a shocking prohibition against the kind of suits

PADA 1970-an, ketika sedang berada di Papua untuk meneliti burung, Jared Diamond ditanyai oleh sahabatnya yang orang Papua: Mengapa orang kulit putih membuat banyak barang berharga, sementara orang Papua tidak? Pertanyaan itu sebenarnya adalah pertanyaan mengenai mengapa kemajuan peradaban di berbagai benua itu berbeda-beda. *Guns, Germs & Steel*, buku pemenang Hadiah Pulitzer 1998, adalah jawaban Jared Diamond bagi pertanyaan sahabatnya. Mengapa sebagian bangsa di dunia bisa mencapai kemajuan teknologi dan peradaban, sehingga lantas menaklukkan dan menjajah bangsa di bagian dunia lain? Apakah itu karena bangsa-bangsa itu hakikatnya lebih unggul daripada lainnya? Atau semua bangsa sama saja, dan yang membedakan adalah faktor lingkungan berupa tanah, iklim, flora-fauna, dan sejarah alam? *Guns, Germs & Steel* mengajak kita melihat riwayat peradaban manusia pada masa tepat sebelum masa sejarah—mulai sekitar tahun 11000 SM—yang justru penting karena pada waktu itulah unsur-unsur pembentuk peradaban manusia seperti pertanian dan bahasa muncul. Dari situ kita diajak meninjau perkembangan di semua benua, dan mengetahui mengapa kemajuan peradaban manusia di berbagai tempat itu berbeda-beda.

Some Comments from Lens Students I want you to know that in my many years of being a student, you easily rank as the best teacher I have ever had. Your skill and patience has made me infinitely more comfortable with my weapons and myself. The next class you teach, I'll be there in a heartbeat. I'm sure you don't have to be reminded of the multitude of people you have touched and the positive impact you have had on firearms training overall. Bob Patridge Len has taught me to effectively and safely use a handgun and rifle and for that I will always be grateful. I look forward to the time I spend once or twice a week under his instruction. Len has created a wide range of firearms training programs out of virtually nothing and trained a sizeable and competent cadre of firearms instructors who, like me, greatly respects the man. He is engaged with his students and always approachable. Students who have shot much longer than me comment on his great depth of knowledge and ability to improve their shooting. He clearly loves to teach the material and his enthusiasm is contagious. He has a great sense of humor and makes his classes a lot of fun. But in spite of all of this the safety of his students is always his first concern. Dr. Noel Pillman, MD I am a retired police officer and a former police firearms instructor for over 20 years. I have been to numerous firearms training classes over the years but have not had any instructors more professional, knowledgeable, and dedicated to what they do than Len Breure. Maurice Merabella "Len was my first real 'tactical' instructor a few years ago. He is a thorough, safe, and well versed instructor. His teaching style is unique in a way that clearly conveys lessons and makes them easy to understand for experienced shooters and novices alike. Len brings a wealth of prior "been there, done that" experience to the table that's an asset to his teaching, and is rarely found in many of the new instructors that have come to the arena since most states have enacted concealed carry laws. I continue to train with a variety of tactical instructors, and am always amazed by how much of the information Len taught me is still the foundation upon which I build." Mike VanMeeteren "I have been fortunate enough to receive numerous training courses that were being taught by Len Breure. In my opinion, Len is one of the best in the business! It is very rewarding to be able to learn from someone who has the experience and knowledge to take tactical training to the next level." Jim Bryant I first meet Len while taking my Minnesota Concealed Carry Course in 2005. Since that time I have taken every course that Len teaches. In my opinion Len is the consummate professional, who teaches with passion and an incredible degree of knowledge. I would strongly urge anyone interested in personal protection to take Len's courses. The instant New York Times bestseller. From Microsoft's president and one of the tech industry's broadest thinkers, a frank and thoughtful reckoning with how to balance enormous promise and existential risk as the digitization of everything accelerates. "A colorful and insightful insiders' view of how technology is both empowering and threatening us. From privacy to cyberattacks, this timely book is a useful guide for how to navigate the digital future." —Walter Isaacson Microsoft President Brad Smith operates by a simple core belief: When your technology changes the world, you bear a responsibility to help address the world you have helped create. This might seem uncontroversial, but it flies in the face of a tech sector long obsessed with rapid growth and sometimes on disruption as an end in itself. While sweeping digital transformation holds great promise, we have reached an inflection point. The world has turned information technology into both a powerful tool and a formidable weapon, and new approaches are needed to manage an era defined by even more powerful inventions like artificial intelligence. Companies that create technology must accept greater responsibility for the future, and governments will need to regulate technology by moving faster and catching up with the pace of innovation. In *Tools and Weapons*, Brad Smith and Carol Ann Browne bring us a captivating narrative from the cockpit of one of the world's largest and most powerful tech companies as it finds itself in the middle of some of the thorniest emerging issues of our time. These are challenges that come with no preexisting playbook, including privacy, cybercrime and cyberwar, social media, the moral conundrums of artificial intelligence, big tech's relationship to inequality, and the challenges for democracy, far and near. While in no way a self-glorifying "Microsoft memoir," the book pulls back the curtain remarkably wide onto some of the company's most crucial recent decision points as it strives to protect the hopes technology offers against the very real threats it also presents. There are huge ramifications for communities and countries, and Brad Smith provides a thoughtful and urgent contribution to that effort.

In this long-awaited book, Michael McIntosh reveals information on Fox guns never before published and offers a fascinating look at the busy life and changing times of the mercurial genius behind them. Ansley H. Fox was an inventor, a professional live-pigeon shooter, entrepreneur, real-estate developer, and manufacturer of everything from automobiles and auto parts to machine guns and munitions. But he is best remembered as a gunmaker who created an American classic and named it "The Finest Gun in the World." In this, the definitive book on Fox, shotguns of every interest, from bird hunter to advanced collector, will delight in the insight, the technical expertise, the remarkable breadth and depth of research, and the masterfully crafted prose that is the McIntosh trademark.
