Resources in Education SAGE Publications

Guiding you through how to plan your research project, this Little Quick Fix covers everything from how to get started and the stages of research, to avoiding procrastination and staying on track. Like other books in the Little Quick Fix series, this book provides a stand-in for the busy or unavailable supervisor when students are really stuck. It features: Visual, design-led learning Clear, structured, useful pedagogy, with space for notes and workings out A gradual, step-by-step approach for students who are less prepared or out of practice Effective self-directed learning with DIY progress tracking

57 Ways to Screw Up in Grad School National Academies Press

With widespread testing and standards-driven curriculum and accountability pressure in public schools, teachers are expected to be highly skilled practitioners. There is a pressing need for college faculty to prepare current and future teachers for the demands of modern classrooms and to address the academic readiness skills of their students to succeed in their programs. The Handbook of Research on Literacy and Digital Technology Integration in Teacher Education is an essential academic publication that provides comprehensive research on the influence of standards-driven education on educators and educator preparation as well as the applications of technology for the preparation of teachers. Featuring a wide range of topics such as academic success, professional development, and teacher education, this book is essential for academicians, educators, administrators, educational software developers, IT consultants, researchers, professionals, students, and curriculum designers.

This book provides you with all the tools you need to write an excellent academic article and get it published.

The Postgraduate's Companion New Age International

The public sector ombudsman has become one of the most important administrative justice institutions in many countries around the world. This international and interdisciplinary Research Handbook brings together leading scholars and practitioners to discuss the state-of-the-art of ombudsman research. It uses new empirical studies and competing theoretical explanations to critically examine important aspects of the ombudsman's work. This comprehensive Handbook is of value to academics designing future ombudsman studies and practitioners and policymakers in understanding the future challenges of the ombudsman.

Services Marketing: People, Technology, Strategy (Eighth Edition) Edward Elgar Publishing

Learn how to write a successful research proposal with this user-friendly, step-by-step guide.

Research Proposals provides practical advice on how to deal with the seven basic questions that any research proposal needs to answer: • What is it all about? • What do we already know? • What do we need to find out? • How will we get the necessary information? • What will it cost and how long will it take? • Is the research socially acceptable? • What will be produced? This is a valuable resource for students who need to conduct a research project as part of their studies and anyone who wants to submit an application for research funding. The new edition is perfect for master's students planning a dissertation, undergraduate students approaching their final year project, and PhD students applying for acceptance onto a doctoral programme. "This is an insightful and easy to use guide for students and researchers. It will support creating a research proposal for both academic programme assignments and for preparation for conducting research. The logical format is useful and very clear to read. There is an excellent appendix providing a specimen research

proposal with commentary boxes highlighting the important points." Dr Alaster Scott Douglas, Reader in Education & Professional Practice, University of Roehampton, UK "Everything that you need to know about how to put together a research proposal is in this book. It's the perfect guide for students and early career researchers who are writing a research proposal and have not had much experience. Impressive in its clarity and common sense, Denscombe's practical guide tells you not just what to do but why as he takes you step by step through the process. The book is crammed with useful tips, helpful examples, effective graphics, and a great checklist appendix. Highly recommended!" Rosalind Edwards, Professor of Sociology and co-director of the ESRC National Centre for Research Methods, University of Southampton, UK "This is a highly practical book about the art of communicating why your research ideas are worthwhile, feasible and should be supported. It takes away any mystery about the process and so instils confidence." Melanie Nind, University of Southampton, UK

Research Methods in Human Development SAGE

Taking into consideration the variety of information being created, produced, and published, the acquisition and archiving of e-resources by digital libraries is rapidly increasing. As such, managing the rights to these resources is imperative. The Handbook of Research on Managing Intellectual Property in Digital Libraries is a pivotal reference source for the latest scholarly research on strategies in which digital libraries engage in the management of increasing digital intellectual property to protect both the users and the creators of the resources. Featuring coverage on a broad range of topics such as copyright management, open access, and software programs, this book is ideally designed for academicians, researchers, and practitioners seeking material on property rights and e-resources.

Writing Your Journal Article in Twelve Weeks Edward Elgar Publishing

Mixed methods research is becoming prevalent in many fields, yet little has been done to elevate mixed methods research in information science. A comprehensive picture of information science and its problems is needed to further understand and address the issues associated with it as well as how mixed methods research can be adapted and used. The Handbook of Research on Mixed Methods Research in Information Science discusses the quality of mixed methods studies and methodological transparency, sampling in mixed methods research, and the application of theory in mixed methods research throughout various contexts. Covering topics such as the issues and potential directions for further research in mixed methods, this comprehensive major reference work is ideal for researchers, policymakers, academicians, librarians, practitioners, instructors, and students.

Research Methodology IGI Global

Deals with the issue of entrepreneurship and family business. This title considers the issues, problems, contexts, or processes that make a family firm more entrepreneurial. It covers topics such as the emergence and growth of family businesses, and the use of entrepreneurial policies, practices and strategies by family firms.

Myth and Knowing: An Introduction to World Mythology Edward Elgar Publishing

When it comes to a masters or PhD program, most graduate students don't deliberately set out to fail. Yet, of the nearly 500,000 people who start a graduate program each year, up to half will never complete their degree. Books abound on acing the admissions process, but there is little on what to do once the acceptance letter arrives. Veteran graduate directors Kevin D. Haggerty and Aaron Doyle have set out to demystify the world of advanced education. Taking a wry, frank approach, they explain the common mistakes that can trip up a new graduate student and lay out practical advice about how to avoid the pitfalls. Along the way they relate stories from their decades of mentorship and even share some slip-ups from their own grad experiences.

Working Effectively with Legacy Code Bloomsbury Publishing

Writing a doctoral thesis can be an arduous and confusing process. Writing a Watertight Thesis helps you to demystify many doctoral concerns and provides a clear framework for developing a sound structure for your thesis, making your thesis watertight, clear, and defensible. Now with the added experience of Mark A. Fabrizio, the authors draw on their extensive experience of supervising and examining numerous doctorates from an internationally diverse and multicultural student body around the world, including in Australia, Canada, China, Hong Kong, Saudi Arabia, the UK and the USA. The chapters on preparing a research proposal, the viva process, and developing publishable articles out of your thesis have all been updated, and new chapters have been added to demystifying common concerns: Do I have what it takes to do a doctorate? What is doctoral originality? Is my work of doctoral quality? What kind of relationship should I cultivate with my supervisor/advisors? Throughout the book you'll find examples showcasing central research questions and the sub-research questions derived from them, descriptions of different ways that doctoral students have achieved success, and exercises that will enable you to apply what you are reading directly to your own thesis.

Entrepreneurship and Family Business Exceller Books

About the Book: This second edition has been thoroughly revised and updated and efforts have been made to enhance the usefulness of the book. In this edition a new chapter The Computer: Its Role in Research have been added keeping in view of the fact that

An Introduction to Qualitative Research University of Chicago Press

Get more out of your legacy systems: more performance, functionality, reliability, and manageability Is your code easy to change? Can you get nearly instantaneous feedback when you do change it? Do you understand it? If the answer to any of these questions is no, you have legacy code, and it is draining time and money away from your development efforts. In this book, Michael Feathers offers start-to-finish strategies for working more effectively with large, untested legacy code bases. This book draws on material Michael created for his renowned Object Mentor seminars: techniques Michael has used in mentoring to help hundreds of developers, technical managers, and testers bring their legacy systems under control. The topics covered include Understanding the mechanics of software change: adding features, fixing bugs, improving design, optimizing performance Getting legacy code into a test harness Writing tests that protect you against introducing new problems Techniques that can be used with any language or platform—with examples in Java, C++, C, and C# Accurately identifying where code changes need to be made Coping with legacy systems that aren't object-oriented Handling applications that don't seem to have any structure This book also includes a catalog of twenty-four dependency-breaking techniques that help you work with program elements in isolation and make safer changes.

Telling a Research Story WCB/McGraw-Hill

The Postgraduate's Companion is the most comprehensive, practical and accessible source of support and guidance for anyone contemplating starting, or already undertaking, their research degree. Hall and Longman's invaluable book is an essential reference resource for anyone doing postgraduate research or thinking of doing it. Leading experts in their fields address the fundamental questions of what a research degree involves; how to choose the best institution; secure an offer; and fund your research degree. For students who are currently working towards a research degree the book deals with the process thoroughly, including coverage of: getting the most from the supervisory relationship planning and writing the thesis navigating and succeeding in research training learning to teach in HE and balancing teaching and research beating the blues and learning how to complete in good time succeeding in the viva voce examination. The final section of the book covers what to do with a research degree once you have one. This includes identifying your skills; staying in academia; research outside academia; leaving research and academia; and starting your own business. SAGE Study Skills are essential study guides for students of all levels. From how to write great essays and succeeding at university, to writing your undergraduate dissertation and doing postgraduate research, SAGE Study Skills help you get the best from your time at university. Visit the SAGE Study Skills hub for tips, resources and videos on study success!

African Journal of Library, Archives & Information Science Samfundslitteratur

Telling a Research Story: Writing a Literature Review is concerned with the writing of a literature review and is not designed to address any of the preliminary processes leading up to the actual writing of the literature review. This volume represents a revision and expansion of the material on writing literature reviews that appeared in English in Today's Research World. This volume progresses from general to specific issues in the writing of literature reviews. It opens with some orientations that raise awareness of the issues that surround the telling of a research story. Issues of structure and matters of language, style, and rhetoric are then discussed. Sections on metadiscourse, citation, and paraphrasing and summarizing are included.

Kenya National Bibliography Langham Publishing

Services Marketing: People, Technology, Strategy is the eighth edition of the globally leading textbook for Services Marketing by Jochen Wirtz and Christopher Lovelock, extensively updated to feature the latest academic research, industry trends, and technology, social media and case examples. This textbook takes on a strong managerial approach presented through a coherent and progressive pedagogical framework rooted in solid academic research. Featuring cases and

examples from all over the world, Services Marketing: People, Technology, Strategy is suitable for students who want to gain a wider managerial view of Services Marketing.

Research Handbook on the Ombudsman IGI Global

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Research Methodology McGraw-Hill Education (UK)

The updated Fourth Edition of Gretchen B. Rossman and Sharon F. Rallis's popular introductory text leads the new researcher into the field by explaining the core concepts through theory, research, and applied examples. Woven into the chapters are three themes that are the heart of the book: first, research is about learning; second, research can and should be useful; and finally, a researcher should practice the highest ethical standards to ensure that a study is trustworthy. The Fourth Edition includes an elaborate discussion of systematic inquiry as well as a nuanced discussion of developing a conceptual framework.

Exploration of the Seas Guilford Publications

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together

How to Research World Scientific Publishing Company

Problem and project-based learning (PBL) is a key pedagogical approach to teaching since it helps students become effective real-life problem solvers in organisations. Problem-based learning emphasises co-operative learning. Students actively participate in their learning process as they choose theories, models, and methods that they consider to be necessary to solve the "real-world" problem that they have agreed to address (under the guidance of competent and experienced supervisors). At Aalborg University we have observed that students who have backgrounds in traditional forms of university education find this problem-based pedagogy highly challenging. It is in this context that we see the contribution of John Kuada's book: Research Methodology: A Project Guide to University Students. The book provides a "hand-holding" guide to students that do not have any, or only very little, previous experience with problem-based learning. A major strength of the book is the simplicity and straightforwardness of the language used. This approach is quite inviting and provides students a friendly introduction to relatively complex ideas and methods. The book speaks to students directly and therefore encourages their engagement in the process of learning about how they can justify the various choices they make in their project work process. The book draws on Professor John Kuada's many years as lecturer and supervisor for students in the department of economics and business administration, and I believe that the book will serve as a useful reading for any students who are looking for a step-by-step pathway for their project work.

Marketing in Developing Economies SAGE

The book focuses on marketing practices in the developing countries with a special focus on Africa. The Book is divided into 15 chapters covering various aspects of the marketing. The authors have as much as possible used local (African) examples. Each chapter has at least two cases, one at the beginning and another towards the end, with one or a few questions to assist the reader reflect on the case. The authors have tried to use very practical cases that make it quite easy for the reader to understand and follow. Academicians will find this book very useful especially in tackle marketing issues within the African Context. Practitioners will equally find it very useful as it offers very practical suggestions on how to solve marketing problems especially in the developing countries
