L'histoire de l'Europe au  
XXe siècle est marquée  
par de nombreux  
dualismes dont les traces

continuent à caractériser  
l'Union européenne. Pour  
mieux comprendre les  
problèmes actuels de  
l'intégration européenne,  
ces dualismes sont  
étudiés dans une  
perspective historique et  
déclinés en quatre axes  
de réflexion : Europe de  
l'Est versus Europe de

l'Ouest, Europe comme  
rêve versus Europe  
comme réalité, Europe(s)  
politique(s) versus  
Europe(s) économique(s)  
et Europe puissance  
versus Europe comme  
instrument de puissance.  
Le présent ouvrage  
recueille les actes du IIIe  
colloque international de

l'association RICHIE (Réseau international de jeunes chercheurs en histoire de l'intégration européenne) qui s'est tenu à Naples (Italie) en décembre 2007 et qui a réuni une vingtaine de jeunes chercheurs de toute l'Europe pour présenter l'état de leurs travaux en cours à travers cette perspective. The history of Europe in the 20th century is marked by several dualisms, traces of which continue to characterize the European Union. For a better understanding of the

current problems of European integration, these dualisms should be studied in their historical context. This book is organized around four axes: Eastern Europe versus Western Europe, Europe as a dream versus Europe as a reality, Political Europe(s) versus Economic Europe(s), Europe as a power versus Europe as an instrument of power. The present work gathers the proceedings of the 3rd international conference of the RICHIE association (International

Network of Young Researchers in European Integration History). The conference took place in Naples (Italy) in December 2007, and brought together young scholars from all over Europe to present their current research on this topic.

The "European Yearbook" promotes the scientific study of European organisations and the Organisation for Economic Co-operation and Development. Each

volume contains a detailed survey of the history, structure and yearly activities of each organisation and an up-to-date chart providing a clear overview of the member states of each organisation. In addition, a number of articles on topics of general interest are included in each volume. A general index by subject and name, and a cumulative index of all the articles which have appeared in the "Yearbook," are included in every volume and provide direct access to

the "Yearbook"'s subject matter. Each volume contains a comprehensive bibliography covering the year's relevant publications. This is an indispensable work of reference for anyone dealing with the European institutions.

The Academy is an institution for the study and teaching of public and private international law and related subjects. Its purpose is to encourage a thorough and impartial

examination of the problems arising from international relations in the field of law. The courses deal with the theoretical and practical aspects of the subject, including legislation and case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the "Collected Courses of the Hague Academy of International Law." *Manuel Élémentaire de Droit Romain* Martinus Nijhoff Publishers  
The "European Yearbook"

has expanded over the years in keeping with the role played by European institutions compared with national ones. It is an indispensable work of reference for anyone dealing with these institutions, which have become so numerous and varied that no-one can possibly memorise all their acronyms or functions. The "European Yearbook" provides aids for finding one's way through the labyrinth of these organisations which coordinate a variety of activities in over 20

countries. One of the aids is an 'organisation chart' at the beginning of the documentary section, giving a clear picture of the general situation. A perusal of the many contributions in the volume organisation by organisation, shows the full diversity of the activities which Europe is gradually taking over from national governments, with their consent and financial support. Written in both of the Council of Europe's official languages, English and French, the "European

Yearbook" also contains a general index by subject and name which constitutes a very valuable list of articles and provides direct access to the work's subject matter, regardless of the particular organisation concerned, offering a kind of cross-section of the activities of European organisations.

Coastal Zones: Solutions for the 21st Century bridges the gap between

national and international efforts and the local needs for actions in communities where coastal zone challenges are faced daily. The solution-oriented approach covers issues of coastal zone management as well as responses to natural disasters. This work provides ideas on how to face the challenges, develop solutions, and localize management of common-pool resources. Coastal Zones targets academic stakeholders and coastal stakeholders who have

local knowledge and experience but need a theoretical framework and a greater range of skills to make use of this experience. - Represents the collaborative work of more than 200 coastal zone researchers from all continents - Provides a transdisciplinary approach that draws on stakeholder knowledge as well as diverse disciplines in the natural and social sciences - Provides a basis for the co-development of an effective understanding of social-ecological systems in the

coastal zone

The United Nations Convention on the Law of the Sea of 10 December 1982 entered into force on 16 November 1994. Since this date a single binding instrument has regulated the rights and duties of States at sea and regarding the sea. New concepts, such as the exclusive economic zone, archipelagic waters, transit passage through straits, and the International Seabed Area, are now fully

recognized. The fifteen member States of the European Union are a significant sample for analyzing the practice of States, or at least that of the Western industrialized States, as regards the law of the sea. They include major and small maritime powers, coastal and land-locked States, States with coasts on the Atlantic Ocean and States with coasts on semi-enclosed seas such as the Baltic and the Mediterranean, States with and without involvement in deep seabed mining and States

with different interests as regards fisheries. The fact that they all belong to the European Union is a very important common feature, which amply justifies the choice made to study them together. The book's aim is to give, through essays prepared by well-known specialists, a detailed survey of the attitudes and practice concerning the law of the sea of the member States of the European Union and of the European Community as such. The common positions of the member States and the

results of their coordinated action also emerge from these essays. The fact that the member States and the European Community are now actively engaged in the process of becoming parties to the Law of the Sea Convention is certainly a major contribution to the consolidation of the Convention as a universal instrument, or at least as an instrument widely ratified by States of all continents and economic and political interests. **Coastal Zones** Routledge

Voilà un ouvrage de base en organisation communautaire dont le contenu gravite autour de quatre grandes approches: l'approche sociocommunautaire, l'action sociale, le développement local et l'approche socio-institutionnelle. Les auteurs reconstruisent les fondements, les contours,

l'histoire, les principales stratégies, les perspectives, les apports spécifiques ainsi que les conditions générales d'exercice de l'organisation communautaire depuis 1960 jusqu'à aujourd'hui. Ils abordent l'organisation communautaire tout autant comme pratique de mouvements sociaux que comme profession inscrite au fil du temps dans le développement des réseaux public et associatif de santé et de services sociaux.

Religion in today's Democratic Republic of Congo has many faces: from the overflowing seminaries and Marian shrines of the Catholic Church to the Islamic brotherhoods, from the healers of Kimban-guism to the televangelism of the booming Pentecostalist churches in the great cities, from the Orthodox communities of Kasai to the 'invisible' Mai Mai warriors in the brousse of Kivu. During the colonial period religion was no less

central to people's lives than it is today. More surprisingly, behind the seemingly smooth facade of missions linked closely to imperial power, faith and worship were already marked by diversity and dynamism, tying the Congo into broader African and global movements. The contributions in this book provide insight into the multifaceted history of the interaction between religion and colonization. The authors outline the institutional political framework, and focus on

the challenge that old and new forms of slavery entailed for the missions. The atrocities committed at the time of the Congo Free State became an existential question for young Christian communities. In the Belgian Congo after 1908, more structural forms of colonial violence remained a key issue marking religious experiences. And yet, religion also acted as a bridge. The authors emphasize the role of intermediaries such as catechists or medical

assistants played in the African "appropriation" of Christianity. They examine the complex interaction with indigenous religious beliefs and practices, and zoom in on the part religions played in the independence movement, as well as on their reaction to independence itself. Coming at a moment when Belgium confronts its colonial past, this volume provides a timely reassessment of religion as a key factor.

La question de l'identité

européenne a souvent été soulevée par les historiens sous l'angle de la civilisation et de l'héritage historique et culturel commun. Mais l'identité européenne n'a que rarement été abordée à travers une grille de lecture liée à l'émergence d'un espace public européen et d'une expérience de vivre ensemble. Cet ouvrage se propose donc de croiser les compétences multiples de jeunes chercheurs européens, afin d'identifier les vecteurs porteurs d'une

identité européenne et de mesurer leur réalité ou leurs insuffisances. Ce faisant, il propose des pistes de développement pour cette identité européenne encore en gestation, afin d'en déterminer les enjeux pour l'Europe. À la fois objectif et handicap dans l'histoire des communautés européennes, la question identitaire semble être un enjeu majeur pour aujourd'hui comme pour demain. The issue of a common European identity has been the

subject of academic research from diverse perspectives. This book approaches the theme of European identity through the interpretive lens of both European public space and the experience of living together. Young scholars in the field of European studies identify instruments for the development of a European identity and analyse their characteristics and shortcomings. These proceedings offer a spectrum of perspectives on the development of a

European identity. The Journal of the Palestine Oriental Society Walter de Gruyter Monograph comprising a compilation of reprinted UN publications, ILO publications and other documents dealing with human rights - includes a one-page bibliography of related books in English. Derived from the renowned multi-volume International

Encyclopaedia of Laws, this monograph provides a survey and analysis of the rules concerning intellectual property rights in France. It covers every type of intellectual property right in depth – copyright and neighbouring rights, patents, utility models, trademarks, trade names, industrial designs, plant

variety protection, chip protection, trade secrets, and confidential information. Particular attention is paid throughout to recent developments and trends. The analysis approaches each right in terms of its sources in law and in legislation, and proceeds to such legal issues as subject matter of protection, conditions of protection, ownership, transfer of rights, licences, scope of exclusive rights, limitations, exemptions, duration of protection,

infringement, available remedies, and overlapping with other intellectual property rights. The book provides a clear overview of intellectual property legislation and policy, and at the same time offers practical guidance on which sound preliminary decisions may be based. Lawyers representing parties with interests in France will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative

intellectual property law. *Religion, Colonization and Decolonization in Congo, 1885-1960. Religion, colonisation et décolonisation au Congo, 1885-1960* BRILL

This book gathers together contributions from thirty-two former and current professors who have, through their teaching in the Legal Studies Department at the College of Europe, enhanced the College's reputation as an authentic European academic postgraduate centre of excellence. Within their

areas of specialisation the authors analyse both the evolution of European law over the years and more specific questions. The contributions cover institutional/constitutional law, judicial remedies, the law governing the internal market and its accompanying politics, competition law, and the law of the Union's external relations. Cet ouvrage rassemble les contributions de trente-deux professeurs, anciens et actuels, du département d'études juridiques européennes du

Collège d'Europe. Par leur enseignement, ceux-ci ont assuré à cette institution, originale par sa dimension européenne, sa reconnaissance en tant que centre académique post-universitaire d'excellence. Les auteurs analysent, chacun dans sa spécialité, l'évolution du droit européen ou des questions plus particulières. Les contributions couvrent ainsi le droit institutionnel/constitutionnel, le contentieux, le droit du marché intérieur et de ses politiques

d'accompagnement, le droit de la concurrence et le droit des relations extérieures de l'Union européenne.

A variety of productions and representations of Canadian identities are the central theme that runs through this book. The different contributions explore imagined spaces by considering Canadian music, poetry and novels; they engage with political space by addressing various ways in which the

people of Canada have made claims to different regions in the distant and recent past; and they address lived spaces, and their actual and symbolic meanings. It is an unusual book as it encompasses the writings by those studying the arts and literature as well as writings by social scientists, and it includes both English and French-speaking scholars. The richness that can be found in this multitude of perspectives and approaches to exploring Canadian space is

characteristic of the way in which Canadian Studies is practiced nowadays. It is therefore an appropriate volume to celebrate 20 years of Canadian Studies in the Netherlands.

The theme of this meeting was the management of technologies in the context of developing countries, and in the light of recent developments concerning especially open source software and

applications. Speakers from various countries debated in English and in French over the importance of changing the rules concerning library management systems, as well as related implications. Results show that open source software might be a solution, although some conditions apply. Réunis

sous le thème de la gestion des systèmes automatisés de bibliothèques dans les pays en développement, conférenciers et participants discutèrent des changements récents dans ce domaine, notamment de l'apport des logiciels à code source ouvert. Les conférenciers, provenant de différents pays,

présentèrent en anglais et en français leurs différents points de vue et expériences sur cette question importante pour l'avenir, de même que sur les implications qui y sont liées. Les résultats démontrent que les logiciels à code source ouverts peuvent être une solution, mais à certaines conditions.
