The Almanac of American Employers: The Only Guide to America's Hottest, Fastest-Growing Major Corporations Excel Books India

In today's era of International business, International Human Resource Management (IHRM) is emerging as a crucial factor since organizations are run by people. What is interesting in this phenomenon is, not only that there are differences in people across the countries, but even within a country or regions within it. This complex socio-cultural and psychological fabric coupled with historical, geographic, economic and political factors, creates certain boundary conditions and makes IHRM a very complex process. The intention of this book is to portray the various factors that are connected with managing Human Resources in International Business. Since the two are inseparable, any organization aspiring to participate as a player in international business must develop the knowledge, skills and acumen to perceive the subtle nuances that govern the rules of game. IHRM as a discipline cuts across all other business operations in the international context and plays a vital role in the success or failure of a business venture since, businesses are essentially driven by people. In the light of the above, this book has sought to address some of the issues that relate to IHRM, which need to be logically understood by any keen observer of international business, today. The approach of this book has been to detail IHRM both, in terms of a function, as well as a process and the factors or key elements that are attached to them. To make this book reader-friendly, chapter

highlights have been added at the beginning of each chapter to facilitate the reader to identify the broader areas that may be learnt from a particular chapter. Each chapter also contains detailed references and key terms. Conceptual questions, multiple choices, web-based exercises are some of the additional features of the book. Relevant diagrammatic representation, relevant case study and list of web references have been also added in this book.

Human service programming has been the focus of much public scrutiny, legislative action, and applied research in recent years. As a result, human service providers have learned to exhibit greater respect for the needs and legal rights of their consumers, the appropriateness and cost effectiveness of treatment procedures and service programs, and the personnel and facilities involved in providing services to consumers. Despite this encouraging trend, many human service agencies are still trying unsuccessfully to meet the two fundamental criteria of effective programming: (1) providing services that are effective in meeting the needs of the consumer and (2) equipping consumers to function independently of the human service system to the extent possible. For example, there appears to be a general acceptance of the notion that custodial institutional service programs are needed, despite the fact that they are ineffective in rehabilitating and transitioning clients to the community and that they are difficult to change. In addition, although community based service programs have been developed as alternatives to institutional placement, there is rarely sufficient transitional planning and programming to facilitate the client's progress from the institution to the community. Although these problems generally are acknowledged, most human service managers and practitioners are ill equipped to deal with them. Specifically, the technology of human service management is in need of improvement. It is more theoretical than practical, and it lacks sufficient field testing and empirical validation.
