NEW YORK TIMES BESTSELLER • Now a major motion picture directed by Martin Scorsese and starring Leonardo DiCaprio

By day he made thousands of dollars a minute. By night he spent it as fast as he could. From the binge that sank a 170-foot motor yacht and ran up a \$700,000 hotel tab, to the wife and kids waiting at home and the fast-talking, hard-partying young stockbrokers who called him king, here, in Jordan Belfort's own words, is the story of the ill-fated genius they called the Wolf of Wall Street. In the 1990s, Belfort became one of the most infamous kingpins in American finance: a brilliant, conniving stock-chopper who led his merry mob on a wild ride out of Wall Street and into a massive office on Long Island. It's an extraordinary story of greed, power, and excess that no one could invent: the tale of an ordinary guy who went from hustling Italian ices to making hundreds of millions—until it all came crashing down. Praise for *The Wolf of Wall Street* "Raw

and frequently hilarious."—The New York Times "A rollicking tale of [Jordan Belfort's] rise to riches as head of the infamous boiler room Stratton Oakmont . . . proof that there are indeed second acts in American lives."—Forbes "A cross between Tom Wolfe's *The Bonfire of the Vanities* and Scorsese's *GoodFellas* . . . Belfort has the Midas touch."—The Sunday Times (London) "Entertaining as pulp fiction, real as a federal indictment . . . a hell of a read."—Kirkus Reviews

A magisterial history that recasts the Enlightenment as a period not solely consumed with rationale and reason, but rather as a pursuit of practical means to achieve greater human happiness. One of the formative periods of European and world history, the Enlightenment is the fountainhead of modern secular Western values: religious tolerance, freedom of thought, speech and the press, of rationality and evidence-based argument. Yet why, over three hundred years after it began, is the Enlightenment so profoundly misunderstood as controversial, the expression of soulless calculation? The answer may be that, to an extraordinary

extent, we have accepted the account of the Enlightenment given by its conservative enemies: that enlightenment necessarily implied hostility to religion or support for an unfettered free market, or that this was “the best of all possible worlds”. Ritchie Robertson goes back into the “long eighteenth century,” from approximately 1680 to 1790, to reveal what this much-debated period was really about. Robertson returns to the era’s original texts to show that above all, the Enlightenment was really about increasing human happiness – in this world rather than the next – by promoting scientific inquiry and reasoned argument. In so doing Robertson chronicles the campaigns mounted by some Enlightened figures against evils like capital punishment, judicial torture, serfdom and witchcraft trials, featuring the experiences of major figures like Voltaire and Diderot alongside ordinary people who lived through this extraordinary moment. In answering the question 'What is Enlightenment?' in 1784, Kant famously urged men and women above all to “have the courage to use your own intellect”. Robertson shows how the thinkers of the Enlightenment did just that,

seeking a well-rounded understanding of humanity in which reason was balanced with emotion and sensibility. Drawing on philosophy, theology, historiography and literature across the major western European languages, *The Enlightenment* is a master-class in big picture history about the foundational epoch of modern times.

 Europe is a gay adventure just waiting to happen. Written in a fun, frank, and fabulous style by four travel writers who know all the ins and outs, Frommer's Gay & Lesbian Europe is the first queer guide to Europe to include coverage on all aspects of your trip — from how to get there to how to get around, from where to stay and dine to where to shop, from what

to see and do to where to work out, from where to sip a cocktail to where to cruise. No matter what your budget, you'll find candid reviews of the best hotels and restaurants--mainstream, gay-friendly, and all-out gay. Are you looking for a plush suite with silk-covered walls and baroque paintings at the Hôtel Costes in Paris, a pleasant room with hand-hewn beams at the Hotel Bernardi-Semenzato in Venice, or an "atmospheric" room with bondage hooks and a galvanized steel cage at the Black Tulip in Amsterdam? Feeling hungry? You can choose from French haute cuisine, British pub fare, German comfort food, Spanish tapas, Greek specialties, and more. Frommer's Gay & Lesbian Europe also offers the dish on queer sights (do you know where Oscar Wilde died and where he's buried, where there's a Homomonument, where there's a Gay Museum?) , neighborhoods, and beaches, plus all the top attractions. The guide also shows you where to shop for everything from antiques to clubwear to "toys" and sends you to the best venues for the performing arts. And, of course, it gives the lowdown on what to do after dark--bars and cafes, discos, saunas, and

more. If all that weren't enough, there are also fun little features like "A Queen's English" (on British gay slang), "The Queer Quiz" (on British gays), and "A Toast for the Boys" (on where to find "toast"--not what you think it is--on your way home from the clubs in Athens).

Way to the top

Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse

beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights
