Tears of a Bride BalboaPress

Providing an overview of researchers' and practitioners' "confessions" on the fascinating phenomenon of failed or derailed organizational health and well-being interventions and contextualizing these confessions is the aim of this innovative volume. Organizational intervention failures, paradoxes and unexpected consequences can offer a lot of rich and extremely useful practical lessons on intervention design and implementation and possibly on the design of future research on organizational interventions. This volume presents lessons learned from derailed interventions and provides possible solutions to those tasked with implementing interventions. It provides an open, practical and solutions-focused account of researchers' and practitioners' experiences in implementing organizational interventions for health and well-being.

"One of the most important contributions of this book is its compelling portrait of the various itinerants within, and often without, early-modern Japan's status system. Even though the topic is a rather serious one, Howell reveals a refreshing sense of humor and an original approach. This is a pleasure to read."—Brett L. Walker, author of *The Conquest of Ainu Lands* "David Howell's immersion in contemporary Japanese scholarship is evident on every page of this masterful book. A probing work of great erudition."—Kären Wigen, author of *The Making of a Japanese Periphery*

Strengthening the protection of sexual and reproductive health and rights in the African region through human rights uses rights-based frameworks to address some of the serious sexual and reproductive health challenges that the African region is currently facing. More importantly, the book provides insightful human rights approaches on how these challenges can be overcome. The book is the first of its kind. It is an important addition to the resources available to researchers, academics, policymakers, civil society organisations, human rights defenders, learners and other persons interested in the subject of sexual and reproductive health and rights as they apply to the African region. Human rights issues addressed by the book include: access to safe abortion and emergency obstetric care; HIV/AIDS; adolescent sexual health and rights; early marriage; and gender-based sexual violence.

Social and behavioral scientists study religion or spirituality in various ways and have defined and approached the subject from different perspectives. In cultural anthropology and archaeology the understanding of what constitutes religion involves beliefs, oral traditions, practices and rituals, as well as the related material culture including artifacts, landscapes, structural features and visual representations like rock art. Researchers work to understand religious thoughts and actions that prompted their creation distinct from those created for economic, political, or social purposes. Rock art landscapes convey knowledge about sacred and spiritual ecology from generation to generation. Contributors to this global view detail how rock art can be employed to address issues regarding past dynamic interplays of religions and spiritual elements. Studies from a number of different cultural areas and time periods explore how rock art engages the emotions, materializes thoughts and actions and reflects religious organization as it intersects with sociopolitical cultural systems.

This book presents an extensive dictionary of the Dagaare language (Niger-Congo; Gur (Mabia)), focussing on the dialect of Central Dagaare, spoken in the Upper West region of Ghana. The dictionary provides comprehensive definitions, example sentences and the English translations, phonetic forms, inflected forms, etymological notes as well as information dialectal variation. This work is intended as a resource for linguists, but also as a resource for Dagaare speakers. Also included is a grammatical sketch of Dagaare contributed by Prof. Adams Bodomo.

*Geographies of Identity in Nineteenth-Century Japan* Karger Medical and Scientific Publishers Since the 1990s, attempts at democratic transition have generated hopes for 'civil society' as well as ambivalence about the state. The interdisciplinary studies gathered here explore this dynamic through the complex interactions of state fragility, self-help, and self-organization in Nigeria. Nigeria stands as a particularly interesting case, as its multifaceted associational life extends far beyond civil society organizations (CSOs) and non-governmental organizations (NGOs): as this volume reveals, there is a 'third sector' of Nigerian society encompassing everything from community self-help programs to ethno-religious affiliations to militias. Some of these formations have narrow, pragmatic aims, while others have an explicit socio-cultural or political agenda; most can be understood as compensating for the state's failure to deliver services and maintain regulatory frameworks. By examining the emergence of broader forms of civil society, this volume considers their successes while also assessing their costs and contradictions.

*Occupational Health and Safety Management Systems* Arcadia Publishing

This report documents human rights abuses committed against largely Nigerian women and girls who are trafficked for sexual and labor exploitation within and outside Nigeria. It also focuses on the experiences of non-Nigerian women and girls who are trafficked into Nigeria, most of them for domestic servitude. It shows how some assistance measures are further violating survivors' rights. The report highlights physical, mental, social, and economic impact of these abuses on survivors, and describes significant gaps in, and obstacles to, much-needed support services. It further outlines steps the Nigerian government should take to combat trafficking in persons and provide survivors the medical care, psychological counseling, and financial assistance they need to heal from the trauma and rebuild their lives.

*Transportation Research* Springer Science & Business Media

This book unpacks two decades of Nigeria's National Assembly spanning 4th-8th legislative sessions. It focuses on the core areas of legislative functions – lawmaking, appropriation, oversight and representation – in examining the achievements, challenges and prospects of the legislature. This is particularly important because Nigeria being the most populous country in Africa is a crucial bastion of democratic governance in the region. Therefore, conducting deep diagnostics of the federal legislature as the custodian of popular mandate and the anchor of accountability offered immense opportunity for learning that would catalyze further institutional reforms and democratic consolidation.

Lakeland, the historical African American community of College Park, was formed around 1890 on the doorstep of the Maryland Agricultural College, now the University of Maryland, in northern Prince George's County. Located less than 10 miles from Washington, D.C., the community began when the area was largely rural and overwhelmingly populated by European Americans. Lakeland is one of several small, African American communities along the U.S. Route 1 corridor between Washington, D.C., and Laurel, Maryland. With Lakeland's central geographic location and easy access to train and trolley transportation, it became a natural gathering place for African American social and recreational activities, and it thrived until its self-contained uniqueness was undermined by the

federal government's urban renewal program and by societal change. The story of Lakeland is the tale of a community that was established and flourished in a segregated society and developed its own institutions and traditions, including the area's only high school for African Americans, built in 1928.

Despite extensive efforts to control it, malaria is still one of the most devastating infectious diseases worldwide. This book, now in its second edition, provides a broad and up-to-date overview of the rapidly expanding field of malaria immunology and its importance in the control of this disease. The first section deals with the malaria parasite and its interactions with both the vertebrate host and the mosquitoes which transmit the disease. In the second part, the mechanisms of immunity and their regulation by environmental and genetic factors are discussed. Finally, this volume contains several chapters on malaria vaccine development, describing the application of the most recent vaccine technologies as well as ongoing and planned vaccine trials. Authored by well-recognized experts, this volume not only demonstrates the rapid progress being made in the search for vaccines against malaria, but also broadens our understanding of immunity to infection in general. It is therefore highly recommended reading for all scientists and professionals in the fields of immunology, infection and vaccine development.

Introduces key terms, research frameworks, debates, and histories for Asian American Studies Born out of the Civil Rights and Third World Liberation movements of the 1960s and 1970s, Asian American Studies has grown significantly over the past four decades, both as a distinct field of inquiry and as a potent site of critique. Characterized by transnational, trans-Pacific, and trans-hemispheric considerations of race, ethnicity, migration, immigration, gender, sexuality, and class, this multidisciplinary field engages with a set of concepts profoundly shaped by past and present histories of racialization and social formation. The keywords included in this collection are central to social sciences, humanities, and cultural studies and reflect the ways in which Asian American Studies has transformed scholarly discourses, research agendas, and pedagogical frameworks. Spanning multiple histories, numerous migrations, and diverse populations, Keywords for Asian American Studies reconsiders and recalibrates the ever-shifting borders of Asian American studies as a distinctly interdisciplinary field.
