Agroecology was chosen  
by INRAE as one of its  
interdisciplinary scientific  
foresight studies designed  
to identify research fronts  
in response to major  
societal challenges. Eighty  
researchers drew up an  
assessment and proposed  
research avenues for  
agroecology. This book  
summarizes their main  
conclusions. Agroecology,  
as a scientific discipline  
that puts ecology back at  
the centre of agricultural  
system design, is now  
well established.  
Diversification of living  
organisms in  
agroecosystems is a

broad objective that is  
intended to make these  
systems more robust and  
resilient. Research in  
genetics and landscape  
ecology must be  
mobilized so that  
agroecology can use  
mechanisms from the  
field to landscape scales.  
Progress is being made in  
modelling agroecological  
systems to better  
understand the many  
biotic and abiotic  
interactions, to predict  
them, and to begin to  
manage some of them.  
Diversification of living  
organisms in agricultural  
production (species,  
varieties, crop rotations,  
etc.) leads to more varied  
products. The

consequences will be significant on the commodity chains, and more precisely on agri-food systems, from production methods to product consumption. These changes are long-term. The agroecological transition, which is adaptive, co-constructed with all actors, is in itself a research subject, and will rely on experimental devices, farms, and 'Territories of innovation'

My name is Ashlee. I am a victim of murder. Through a series of events and by two shots of a gun, I was made a widow at the age of 28, with my youngest child just six weeks old. I am a victim of infidelity. I have felt unlovable. I have felt rejected. I have had days in my life when I wasn't sure if I would ever take a breath again, let alone be able to raise my five children by myself. I have lived in fear. I have felt much heartache. I have felt truly broken to my core. I have carried some heavy burdens...not only of my own, but burdens put upon my shoulders by the death of my husband. I have felt alone. I have felt humiliated. I have been humbled to my knees. I have searched my soul to

find my worth in this world, and in the life that was left for me. My world has been totally shattered. I have faced realities I never knew were possible, and found strength within myself to keep up the fight and live every day as if it was on purpose. I have been carried by Angels...both earthly beings and those unseen. I have found that being a "victim" doesn't mean we have an excuse to stop living. Being a victim means finding a reason for seeking a higher road. I have picked up the pieces left and carried on. I am a mother. We are survivors. In one way or another, we are all victims. There are times in our lives when we are forced to question who we are at our core. When we are presented with a path...we can go this way or we can choose that way. For some, this moment comes when the one person whom we love the most decides we are not enough. This person leave us-at a most vulnerable moment-alone to search within ourselves for who we really are. We are left trying to find who it is that was left behind. Sometimes the person we love dies. Sometimes it is merely an internal battle we are facing...all alone

inside our minds. Whatever the situation and wherever you have been...you have been hurt. You have felt alone. You have been abandoned, either by your parents, your lover, your friends, complete strangers, or even yourself. We have all been at that crossroad where all we have left is ourselves. Sometimes these moments of lows have brought you to your knees and caused you to reflect and ponder your relationship with God...and other times they have made you question if He is even there, or if He knows you are alone. Whatever that moment has been for you, it is personal and real. It has defined and refined who you are, who you think you were, and who you want to become. This is my story...the defining moments that have truly brought me to my knees, the times when I've questioned to my core my very existence, and the experiences I've had that have shown me who I really am and who my Heavenly Father still needs me to become. The night of my husband's death was my darkest hour, but also the very moment when I saw firsthand that my

Heavenly Father sent  
Angels on errands for me.  
He carried me. It was the  
hour when all my fears  
and all the pain of this  
world collided together  
and He was  
there...putting back  
together all the pieces,  
one step at a time.

Ouvrage de référence, le Larousse encyclopédique illustré constitue à la fois un dictionnaire de langue et une encyclopédie. Dictionnaire de langue, il fournit des informations sur les mots en usage dans la communauté francophone : origine, sens anciens et actuels, emplois, niveaux de langue, etc. Encyclopédie, il offre l'essentiel du savoir d'aujourd'hui, dans tous les domaines et sur tous les objets de la connaissance. Pour mieux satisfaire ses utilisateurs, le Larousse encyclopédique illustré innove sur plusieurs plans. Dans la forme, il mêle noms communs et noms propres, pour simplifier les recherches; il fait aussi usage d'une

typographie claire et aérée, qui préserve au mieux la lisibilité; enfin, il recourt à la couleur, pour repérer immédiatement noms propres et développements encyclopédiques, d'autant mieux distingués des noms communs, disposition qui facilite considérablement la consultation. Sur le fond, il apporte une innovation majeure pour un ouvrage de ce type: la présence de quelque 500 développements encyclopédiques qui, à la suite des articles, rendent compte des évolutions passées comme des bouleversements contemporains, pour mieux comprendre les mutations de notre temps, sur un grand nombre de sujets: géopolitiques, scientifiques, philosophiques, religieux, culturels, etc. Au croisement de la forme et du fond, l'illustration - 2 600 photographies, dessins, schémas et cartes - a bénéficié d'une attention égale, y compris dans les légendes, le plus

souvent rédigées selon une perspective encyclopédique. Elle éclaire les mots, prolonge les définitions, met en relation les éléments dispersés par l'ordre alphabétique, joignant ainsi l'agréable à l'utile. Le Larousse encyclopédique illustré constitue donc à la fois, par sa rédaction claire et accessible, un outil de base pertinent et actuel, à consulter souvent pour le travail comme pour l'étude, et, par sa présentation attrayante et soignée, un beau livre à parcourir pour le seul plaisir de la découverte.
