Bertolt
 Brecht's Me-ti,
 which
 remained
 unpublished in
 his own
 lifetime, now
 appears for
 the first time
 in English. Me-
 ti counselled
 against

'constructing
 too complete
 images of the
 world'. For this
 work of
 fragments and
 episodes,
 Brecht
 accumulated
 anecdotes,
 poems,
 personal

stories and assessments of contemporary politics. Given its controversial nature, he sought a disguise, using the name of a Chinese contemporary of Socrates, known today as Mozi. Stimulated by his humorous aphoristic style and social focus, as well as an engrained Chinese awareness of the flow of things, Brecht developed a practical, philosophical, anti-

systematic ethics, discussing Marxist dialectics, Lenin, Hitler, Stalin, the Moscow trials, and the theories behind current events, while warning how ideology makes people the 'servants of priests'. Me-ti is central to an understanding of Brecht's critical reflections on Marxist dialectics and his commitment to change and the non-eternal, the philosophy which informs

much of his writing and his most famous plays, such as The Good Person of Szechwan. Readers will find themselves both fascinated and beguiled by the reflections and wisdom it offers. First published in German in 1965 and now translated and edited by Antony Tatlow, Brecht's Me-ti: Book of Interventions in the Flow of Things provides readers with a much-anticipated

accessible edition of this important work. It features a substantial introduction to the concerns of the work, its genesis and context - both within Brecht's own writing and within the wider social and political history, and provides an original selection and organisation of texts. Extensive notes illuminate the work and provide commentary on related works from Brecht's

oeuvre. *The Secret Sky* Harper Collins Combines a dictionary of key legal terms with an index of leading United States Supreme Court cases indexed by type of case, such as death penalty, right to counsel, and searches and seizures. The new edition of this resource for students, practitioners, and others who need access to criminal justice information contains 125

new U.S. Supreme Court cases, as well as over 5000 terms, concepts, and names. Includes index. Engineers of Jihad Heyne Verlag #1 New York Times Bestseller Edith Hahn was an outspoken young woman in Vienna when the Gestapo forced her into a ghetto and then into a slave labor camp. When she returned home months later, she knew she would become

a hunted woman and went underground. With the help of a Christian friend, she emerged in Munich as Grete Denner. There she met Werner Vetter, a Nazi Party member who fell in love with her. Despite Edith's protests and even her eventual confession that she was Jewish, he married her and kept her identity a secret. In wrenching detail, Edith recalls a life of constant,

almost paralyzing fear. She tells how German officials casually questioned the lineage of her parents; how during childbirth she refused all painkillers, afraid that in an altered state of mind she might reveal something of her past; and how, after her husband was captured by the Soviets, she was bombed out of her house and had to hide while drunken Russian soldiers raped women on the

street. Despite the risk it posed to her life, Edith created a remarkable record of survival. She saved every document, as well as photographs she took inside labor camps. Now part of the permanent collection at the Holocaust Memorial Museum in Washington, D.C., these hundreds of documents, several of which are included in this volume, form the fabric of a gripping new

chapter in the history of the Holocaust—complex, troubling, and ultimately triumphant. Seed-time and Harvest Orca Book Publishers An eye-opening, heart-rending tale of love, honor and betrayal from veteran foreign news correspondent Atia Abawi Fatima is a Hazara girl, raised to be obedient and dutiful. Samiullah is a Pashtun boy raised to defend the traditions of his tribe. They

were not meant to fall in love. But they do. And the story that follows shows both the beauty and the violence in current-day Afghanistan as Fatima and Samiullah fight their families, their cultures and the Taliban to stay together. Based on the people Atia Abawi met and the events she covered during her nearly five years in Afghanistan, this stunning novel is a must-read for anyone who

has lived during America's War in Afghanistan. Perfect for fans of Patricia McCormick, Linda Sue Park, and Khaled Hosseini, this story will stay with readers for a long time to come. * "A suspenseful, enlightening, and hopeful love story." Publishers Weekly, starred review "Riveting plot, sympathetic characters and straightforward narration studded with vivid,

authentic detail: a top choice.” – Kirkus review “Heartbreaking and heartwarming.” – VOYA review
The Town Musicians of Bremen Igloo Books
From which country can you see the Northern Lights? Where is the world's highest mountain situated? Which reef is home to 1,500 kinds of fish? Inside this book, find out about the countries, continent rivers, seas, and mountain

ranges of the world. Discover hundreds of fascinating details about their landscapes, climates, and more with 100 super stickers and over 30 pages packed with amazing atlas facts.

A

groundbreaking investigation into why so many Islamic radicals are engineers The violent actions of a few extremists can alter the

course of history, yet there persists a yawning gap between the potential impact of these individuals and what we understand about them. In *Engineers of Jihad*, Diego Gambetta and Steffen Hertog uncover two unexpected facts, which they imaginatively leverage to narrow that gap: they find that a disproportionate share of Islamist radicals come from an engineering background,

and that Islamist and right-wing extremism have more in common than either does with left-wing extremism, in which engineers are absent while social scientists and humanities students are prominent. Searching for an explanation, they tackle four general questions about extremism: Under which socioeconomic conditions do people join extremist groups? Does the profile of

extremists reflect how they self-select into extremism or how groups recruit them? Does ideology matter in sorting who joins which group? Lastly, is there a mindset susceptible to certain types of extremism? Using rigorous methods and several new datasets, they explain the link between educational discipline and type of radicalism by looking at two key factors: the social mobility (or lack thereof)

for engineers in the Muslim world, and a particular mindset seeking order and hierarchy that is found more frequently among engineers. Engineers' presence in some extremist groups and not others, the authors argue, is a proxy for individual traits that may account for the much larger question of selective recruitment to radical activism. Opening up markedly new

perspectives on the motivations of political violence, Engineers of Jihad yields unexpected answers about the nature and emergence of extremism.
