SAP Certified Associate - SAP Activate Project Manager These questions are similar to the ones asked in the actual Test. How should I know? I know, because although I have been working as an SAP Project Manager and consultant for many years, I have myself recently certified with the latest version of the Certification test. Before you start here are some Key features of the Certification Exam. This certification exam verifies that the candidate has the knowledge required in the area of SAP Activate. This certificate builds on basic consultant skills and experience that is then refined by practical experience during several projects. This exam validates whether SAP focused project managers have advanced business skills and the ability to apply methodologies and tools. Aside from advanced communication and presentation skills, this certificate also verifies that the project manager has skills to manage internal and external stakeholders, basic knowledge of change management processes, and communicating these processes to others. This exam validates that project manager can successfully manage the end-to-end transition of the project from Sales to Realization, can develop roadmaps for project execution, and understand testing and quality management. In particular for SAP related projects, the exam verifies that the Project Manager can apply the SAP Activate Methodology. The exam is Computer based and you have three hours to to answer 80 Questions. The Questions are (mostly) multiple choice type and there is NO penalty for an incorrect answer. Some of the Questions have more

than one correct answer. You must get ALL the options correct for you to be awarded points. For questions with a single answer, the answers will have a button next to them. You will be able to select only one button. For questions with multiple answers, the answers will have a 'tick box' next to them. This allows you to select multiple answers. You are not allowed to use any reference materials during the certification test (no access to online documentation or to any SAP system). Clearing the Certification will not automatically lead you to a job. However a Certification with some project experience will certainly open a lot of doors for you. So if you have little or no experience, you should get yourself certified, get some project experience, and then the whole of the SAP Project Management World open for you to explore. Helping you with the first step on your ladder to success is this book! Some UNIQUE features of this Book: - There is NO Other quality material in the market for this Certification exam. - The author has himself cleared the exam. - All questions are multiple choice format, similar the questions you will get in the actual exam. - Over 100 authentic questions, testing the exact same concepts that will be tested in Your exam!

Want to start working in SAP? Breaking into SAP shows you how to get a job - fast! There is a vibrant and global marketplace for those who have the right skills in SAP. But jobs for newcomers to the industry remain elusive. So how do you get started? Rather than spend a small fortune on expensive training and certifications of questionable value, Breaking into SAP suggests a more sensible route. Breaking into SAP acknowledges the recent changes in the way global corporations hire and retain talent, and helps shift the balance of the power back to individual job seekers. Because breaking into the field of SAP in these competitive times requires more than just a list of certification exam questions, more than a walk-through of standard SAP transactions. You need advice from a recognized leader in SAP who understands the SAP career landscape, and frankly, you need someone other than a recruiter to teach you how to move into this highly lucrative field. Jim Stewart's Breaking into SAP is the book you need if you want to understand exactly what it takes to move into the field of SAP. Breaking into SAP MM includes: How to obtain the experience needed to start working in SAP Real-life problems and solutions encountered on SAP implementations Detailed functional and technical questions, answers and explanations SAP careers: from permanent employment to consulting and contracting

What does it take to gain entry into the fascinating & lucrative world of SAP System Administration? A successful Interview. In fact for contracting jobs, all it takes is a half an hour telephone interview before you get your first break. Though the interview procedure is more drawn out for permanent job, there is normally only ever One technical interview. A successful interview can provide you with that break which will be the first step to a career in the SAP World. So what are the interviewers looking for? For an associate level position (less than 2 year's System Admin project experience), here is what the interviewers typically look for: - Decent overall knowledge of SAP System Administration - Deep knowledge in at least one or two area (e.g. BW, Oracle etc). - Ability to work in a team environment (As you are a junior you will probably be working as part of a larger team). - Ability to find relevant technical information. (With System Administration being so wide, no single consultant is reasonably expected to know everything. However, you should have the skills to find out more wherever required). The kind of questions asked at the associate level interview are less to do with tables and fields and more to do with your approach to a project issue or a support Issue. This is something that can only come with experience or if you receive some coaching from experienced consultants. So how would you like some insider knowledge of what kind of questions are asked in an actual Basis (System Administration) interview and what kind of response gets you the green light? By reading this book! Why should you buy this book? Current Questions that are being asked in Interviews TODAY Every single question is based on project knowledge and personal experience Divided into Basis functionality areas for easy reading Covers the most important concepts & configuration settings Focus on business scenarios Some unique features of this book: - The Question are ACTUAL questions asked in some of the regular interviews that the likes of Accenture & IBM do. (How do we know? Because we do some of these interviews!) - The questions available on 'google' are almost never asked in a 'Real' interview. This book contains Questions that are NOT available anywhere else. - The authors have a combined experience of over 20 years in SAP.
