This book contains over 54 cross stitch motifs, all on the theme of flowers. Inside there are pretty little floral garlands, bold poppies, sprigs of lavender, pansies, violas and flowering herbs. There are softly coloured roses and also bolder designs which have a contemporary feel to them, such as the colourful flowering cacti motifs in brightly coloured, decorated pots. You can stitch the motifs individually, or mix and match them to make up your own 'sampler' style design. The motifs are small and easy to stitch as they are made up of full cross stitches only and some backstitch outlining, for the detail. They can be stitched by beginners and more confident stitchers alike.

The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

A wider conversation on the policies and collective experiences of large-scale development that are shaping China's urban future. Superblocks are the basic unit of China's urban development, but they are also spatial instruments with social, cultural, environmental, and economic implications, operating between the scales of architecture and the city. These redefined 'Megablocks' then become laboratories for the consequences, opportunities, and potential global proliferation of Chinese urban models, reconsidered through the filters of ecology, economics, and ethics. In this bilingual Guide to Megablock Urbanisms, China Lab aims to document and advance China's urban future. Co-published with GSAPP, Columbia University. This is a discount Black and white version. Some images may be unclear, please see BCCampus website for the digital version.This book was born out of a 2014 meeting of earth science educators representing most of the universities and colleges in British Columbia, and nurtured by a widely shared frustration that many students are not thriving in courses because textbooks have become too expensive for them to buy. But the real inspiration comes from a fascination for the spectacular geology of western Canada and the many decades that the author spent exploring this region along with colleagues, students, family, and friends. My goal has been to provide an accessible and comprehensive guide to the important topics of geology, richly illustrated with examples from western Canada. Although this text is intended to complement a typical first-year course in physical geology, its contents could be applied to numerous other related courses.

This book contains lots of little cross stitch motifs which are quick and easy to stitch. It was inspired by the trend for making very small cross stitch items which can be used to adorn jewelry, such as pendants, bracelets and earrings. You could also make them into little pictures by mounting them into a small hoop or a tiny picture frame. There are designs which can be used to

decorate mobile phone cases too. The designs cover a variety of themes, including flowers and cacti, gardens, birds and butterflies, seaside motifs, tropical motifs, and animals. The designs are colorful and pretty and will take crafters no time at all to stitch!

A range of designs that are suitable for all sewing abilities. The essence of this book is to keep it simple, fun, and easy to stitch. With that in mind most of the designs are sewn using only whole cross stitch, and back stitch is kept to a minimum. The patterns vary in sizes. From small quick stitch designs for tags, pincushions, key fobs, and cards, to larger, more involved designs for notebook covers, pictures, fire screens, or table cloths. Many of the designs can easily be used in multiple ways. A single small design or band could be used to edge a place mat, table cloth, towel, or curtain tie back, or you could combine several designs together to make a sampler. A stunning collection of patterns for both new and experienced stitchers alike.

A compassionate, shame-free guide for your darkest days "A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized."—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn't cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to "choose joy" and "pray more." So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you're left wondering if God has abandoned you. You just want a way out. But there's hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn't look like what you expect.
