From the author of the award-winning *Moth Smoke* comes a perspective on love, prejudice, and the war on terror that has never been seen in North American literature. At a café table in Lahore, a bearded Pakistani man converses with a suspicious, and possibly armed, American stranger. As dusk deepens to night, he begins the tale that has brought them to this fateful meeting. . . Changez is living an immigrant's dream of America. At the top of his class at Princeton, he is snapped up by Underwood Samson, an elite firm that specializes in the "valuation" of companies ripe for acquisition. He thrives on the energy of New York and the intensity of his work, and his infatuation with regal Erica promises entrée into Manhattan society at the same exalted level once occupied by his own family back in Lahore. For a time, it seems as though nothing will stand in the way of Changez's meteoric rise to personal and professional success. But in the wake of September 11, he finds his position in his adopted city suddenly overturned, and his budding relationship with Erica eclipsed by the reawakened ghosts of her past. And Changez's own identity is in seismic shift as well, unearthing allegiances more fundamental than money, power, and perhaps even love. Elegant and compelling, Mohsin Hamid's second novel is a devastating exploration of our divided and yet ultimately indivisible world. "Excuse me, sir, but may I be of assistance? Ah, I see I have alarmed you. Do not be frightened by my beard: I am a lover of America. I noticed that you were looking for something; more than looking, in fact you seemed to be on a mission, and since I am both a native of this city and a speaker of your language, I

thought I might offer you my services as a bridge." —from *The Reluctant Fundamentalist*

This is the fifth revised edition of the best-selling *A Practical Guide for Translators*. It looks at the profession of translator on the basis of developments over the last few years and encourages both practitioners and buyers of translation services to view translation as a highly-qualified, skilled profession and not just a cost-led word mill. The book is intended principally for those who have little or no practical experience of translation in a commercial environment. It offers comprehensive advice on all aspects relevant to the would-be translator and, whilst intended mainly

for those who wish to go freelance, it is also relevant to the staff translator as a guide to organisation of work and time. Advice is given on how to set up as a translator, from the purchase of equipment to the acquisition of clients. The process of translation is discussed from initial enquiry to delivery of the finished product. Hints are given on how to assess requirements, how to charge for work, how to research and use source material, and how to present the finished product. Guidance is given on where to obtain further advice and professional contacts. This revised edition updates practices in the translation profession and considers the impact of web-based translation offerings. Industry and commerce rely heavily on the skills of the human translator and his ability to make intellectual decisions that is, as yet, beyond the capacity of computer-aided translation.

*Die Neueren Sprachen* Penguin

The chapters in this book all address the significance of the relationship between the aims and methods of language teaching and the contexts in which it takes place. Some consider the implications for the ways in which we research language teaching; others present the results of research and development work.

*Börsenblatt für den deutschen Buchhandel* Oxford University Press

This book provides an overview of approaches to language and culture, and it outlines the broad interdisciplinary field of anthropological linguistics and linguistic anthropology. It identifies current and future directions of research, including language socialization, language reclamation, speech styles and genres, language ideology, verbal taboo, social indexicality, emotion, time, and many more. Furthermore, it offers areal perspectives on the study of language in cultural contexts (namely Africa, the Americas, Australia and Oceania, Mainland Southeast Asia, and Europe), and it lays the foundation for future developments within the field. In this way, the book bridges the disciplines of cultural anthropology and linguistics and paves the way for the new book series *Anthropological Linguistics*.

"This book takes cultural knowledge in language learning not only as a necessary aspect of communicative competence, but as an educational objective in its own right. If the aim of foreign language education is to foster cross-cultural awareness and self-realization, language pedagogy needs to come to grips with a range of fundamental issues: what do we mean by cultural context? Can discourse practices be taught like rules of grammar? What role does literature play in the development of second language literacy? How can learners acquire both an insider's and an outsider's understanding of the foreign culture as expressed

through its language? By exploring these and other issues, the book can help language teachers reflect on their profession and place it within its larger societal and educational context. In turn, they can help learners become not only skilful users of the language, but also active architects of a new cross-cultural world order."

Business English for Beginners

A wise, hilarious novel from the beloved, award-winning author of Dickens and Prince, Funny Girl and High Fidelity Will Freeman may have discovered the key to dating success: If the simple fact that they were single mothers meant that gorgeous women – women who would not ordinarily look twice at a Will – might not only be willing, but enthusiastic about dating him, then he was really onto something. Single mothers – bright, attractive, available women – thousands of them, were all over London. He just had to find them. SPAT: Single Parents – Alone Together. It was a brilliant plan. And Will wasn't going to let the fact that he didn't have a child himself hold him back. A fictional two-year-old named Ned wouldn't be the first thing he'd invented. And it seems to go quite well at first, until he meets an actual twelve-year-old named Marcus, who is more than Will bargained for...
