BLACKBURN DUDLEY

The Library of the Counts of Benavente Elsevier Health Sciences
 This volume brings together new research on fiction from the fields of philosophy and linguistics. Fiction has long been a topic of interest in philosophy, but recent years have also seen a surge in work on fictional discourse at the intersection between linguistics and philosophy of language. In particular, there has been a growing interest in examining long-standing issues concerning fiction from a perspective that is informed both by philosophy and linguistic theory. Following a detailed introduction by the editors, *The Language of Fiction* contains 14 chapters by leading scholars in linguistics and philosophy, organized into three parts. Part I, 'Truth, Reference, and Imagination', offers new, interdisciplinary perspectives on some of the central themes from the philosophy of fiction: What is fictional truth? How do fictional names refer? What kind of speech act is involved in telling a fictional story? What is the relation between fiction and imagination? Part II, 'Storytelling', deals with themes originating from the study of narrative: How do we infer a coherent story from a sequence of event descriptions? And how do we interpret the words of impersonal or unreliable narrators? Part III, 'Perspective Shift', focuses on an alleged key characteristic of fictional narratives, namely how we get access to the fictional characters' inner lives, through a variety of literary techniques for representing what they say, think, or see. The volume will be of interest to

scholars from graduate level upwards in the fields of discourse analysis, semantics and pragmatics, philosophy of language, psychology, cognitive science, and literary studies. *Historical Essays* BRILL

A novel about survival, self-reliance, and art, by Peter Stamm, finalist for the 2013 Man Booker International Prize *All Days Are Night* is the story of Gillian, a successful and beautiful TV host, content with her marriage to Matthias, even if she feels restless at times. One night following an argument, the couple has a terrible car accident: Matthias, who is drunk, hits a deer on the wet road and dies in the crash. Gillian wakes up in the hospital completely disfigured. Only slowly, after many twists and turns, does she put her life back together, and reconnects with a love interest of the past who becomes a possible future—or so it seems. In Stamm's unadorned and haunting style, this new novel forcefully tells the story of a woman who loses her life but must stay alive all the same. How she works everything out in the end is at once surprising and incredibly rewarding.

Learner Autonomy in Second Language Pedagogy and Research Springer

A master chronicler of the African-American experience, Richard Wright brilliantly expanded his literary horizons with *Pagan Spain*, originally published in 1957. An amalgam of expert travel reportage, dramatic monologue, and arresting sociological critique, *Pagan Spain* serves as a pointed and still-relevant commentary on the grave human dangers of oppression and governmental corruption.

Lights and Shadows of Spiritualism New Directions Publishing

Picture two people, young and in love. Picture them being separated from one another. Picture them keeping their love alive through letters. So far, so simple. Now imagine they've not just been separated geographically, but also historically. Imagine that their love and letters now defy time and place, life and death. By now you realize that this novel is unique. And, when you learn how it has made Russian literary-prize history, and has to-date been sold in twenty-two languages, you begin to sense just how unique...

Levin's Mill Polymarket Press

Lernen und Arbeiten im Fach Allgemeinmedizin - alle Infos, die Medizinstudenten sowie Assistenzärzte Allgemeinmedizin/Innere Medizin brauchen: Wie unterscheiden sich Allgemeinmedizin und Innere Medizin? Was kann ich in der Hausarztpraxis lernen? Was ist anders im Alltag in der Praxis und in dem der Klinik? Dieses Buch beantwortet Ihnen alle Fragen und bietet so den Bezug zur täglichen Arbeit. Natürlich deckt es Behandlungsanlässe mit den wichtigsten Leitsymptomen, aber auch Diagnostik, Verordnen von Medikamenten, Patientensicherheit, Prävention und Notfallmanagement sowie Hilfestellungen für eine gelungene Arzt-Patienten-Kommunikation in der Hausarztpraxis ab. Tipps und Tricks rund ums Lernen, das PJ in der Allgemeinmedizin sowie das letzte Staatsexamen finden sich ebenfalls. Wie entstand dieses Werk? Eigene Erfahrungen und Fragen haben das Autorenteam motiviert, Lernen und Lehren in der allgemeinmedizinischen Praxis endlich einmal aus erster Hand darzustellen. Herausgekommen ist eine Zusammenstellung der wichtigsten Informationen rund um die Arbeit in der Praxis und in der

Allgemeinmedizin. Auf oft gestellte Fragen findet man hier schlüssige Antworten!

Teaching for Understanding at University Viking Adult

Usually, a country brand is not focused, resulting in unsuccessful place branding. It is possible to successfully raise your national identity to the level of an attractive brand. Building a country brand is an investment, with strong positive returns. This book will guide you along the path to building a successful brand.

A fascinating, obscure, and slightly eccentric book about the many different ways in which Latin has been pronounced and spelled over the centuries as it traveled from its ancient seat to far-flung regions of Europe and beyond. The author makes the case that we should not be too fussy or insistent on a "correct" way of pronouncing the language, given that every context has its own justification, and that even scholars are not always sure about their own theories. An entertaining read for Latin lovers.

The Russian Language Today Penguin

Flush with delightfully useless--and sometimes even useful--information about sports, movies, music, politics, American and world history, and much more, this book is the most extensive reference guide in the series to date.

Learner Autonomy in the Foreign Language Classroom Palgrave Macmillan

Leading professional gambler and host of a national television show and of dozens of instructional videotapes, John Patrick shares his secrets of success, providing readers with specific, easy-to-learn methods for mastering the tables, wheels, cards, and dice of every game, as well as proven techniques for sports betting.

Translation Translation Bloomsbury Publishing

This collection reviews 20 years of research into Spoken Discourse by the Birmingham group, allowing, for the first time, a developmental perspective. It combines previously published but unavailable work with new research. Bringing together recent theories of discourse structure, with a new and detailed analytic framework, the book emphasises both historical context and new developments. The articles are comprehensive, ranging from the theoretical to the highly applied. Practical applications include language teaching, literary stylistics and forensic linguistics with examples taken from literature and language classrooms, telephone conversations, disputed witness statements and corpuses of spoken English.

Lyle Stuart

The Russian Language Today provides the most up-to-date analysis of the Russian language. The Russian language has changed dramatically in recent years, becoming inundated by new words, mainly from American English. The authors focus on the resulting radical changes in Russian vocabulary and grammar. Supported throughout by extracts from contemporary press and literary sources, this is a comprehensive overview of present-day Russian and an essential text for all students of the Russian language.

Narrative Development Routledge

Until recently, the history of debates about language and thought has been a history of thinking of language in the singular. The purpose of this volume is to reverse this trend and to begin unlocking the mysteries surrounding thinking and speaking in bi- and multilingual speakers. If languages influence the way we think, what happens to those who speak more than one language? And if they do not, how can we explain the difficulties second language learners experience in mapping new words and structures onto real-world referents? The contributors to this volume put forth a novel approach to second language learning, presenting it as a process that involves conceptual development and restructuring, and not simply the mapping of new forms onto pre-existing meanings.

'From the Fury of the Northmen deliver us, O Lord.' Between the eighth and eleventh centuries, the Vikings surged from their Scandinavian homeland to trade, raid and invade along the coasts of Europe. Their influence and expeditions extended from Newfoundland to Baghdad, their battles were as far-flung as Africa and the Arctic. But were they great seafarers or desperate outcasts, noble heathens or oafish pirates, the last pagans or the first of the modern Europeans? This concise study puts medieval chronicles, Norse sagas and Muslim accounts alongside more recent research into ritual magic, genetic profiling and climatology. It includes biographical sketches of some of the most famous Vikings, from Erik Bloodaxe to Saint Olaf, and King Canute to Leif the Lucky. It explains why the Danish king Harald Bluetooth lent his name to a twenty-first century wireless technology; which future saint laughed as she buried foreign ambassadors alive; why so many Icelandic settlers had Irish names; and how the last Viking colony was destroyed by English raiders. Extending beyond the traditional 'Viking age' of most books, A Brief History of the Vikings places sudden Scandinavian population movement in a wider historical context. It presents a balanced appraisal of these infamous sea kings, explaining both their swift expansion and its supposed halt. Supposed because, ultimately, the Vikings didn't disappear: they turned into us.

Thinking and Speaking in Two Languages Taschendolmetscher für Ärzte

Translation Translation contributes to current debate on the question of translation dealt with in an interdisciplinary perspective, with implications not only of a theoretical order but also of the didactic and the practical orders. In the context of globalization the question of translation is fundamental for education and responds to new community needs with reference to Europe and more extensively to the international world. In its most obvious sense translation concerns verbal texts and their relations among different languages. However, to remain within the sphere of verbal signs, languages consist of a plurality of different languages that also relate to each other through translation processes. Moreover, translation occurs between verbal languages and nonverbal languages and among nonverbal languages without necessarily involving verbal languages. Thus far the allusion is to translation processes within the sphere of anthroposemiosis. But translation occurs among signs and the signs implicated are those of the semiotic sphere in its totality, which are not exclusively signs of the linguistic-verbal order. Beyond anthroposemiosis, translation is a fact of life and invests the entire biosphere or biosemiosphere, as clearly evidenced by research in "biosemiotics", for where there is life there are signs, and where there are signs or semiotic processes there is translation, indeed semiotic processes are translation processes. According to this approach reflection on translation obviously cannot be restricted to the domain of linguistics but must necessarily involve semiotics, the general science or theory of signs. In this theoretical framework essays have been included not only from major translation experts, but also from researchers working in different areas, in addition to semiotics and linguistics, also philosophy, literary criticism, cultural studies, gender studies, biology, and the medical sciences. All scholars work on problems of translation in the light of their own special competencies and interests.

All Days Are Night London : Macmillan ; New York : St. Martin's Press

Research into how teaching affects the quality of student learning at university is a rapidly changing field. University teachers are increasingly required to develop their own strategies for effective teaching, often with limited guidance from their institutions. Teaching for Understanding at University not only outlines a wide range of recent developments in the area, but shows how approaches can be brought together to help university teachers think more imaginatively about ways of encouraging students' learning. Written in a way designed to be interesting and accessible to university teachers across disciplines, the volume concentrates on how students reach a personal understanding of the subject they are studying. Covering academic understanding, approaches to teaching, assessment methods and evaluation of teaching, the book provides a comprehensive introduction to the latest ideas on teaching and learning. Avoiding unnecessary jargon and 'business speak', this is the ideal book for the newly qualified lecturer, as well as the more experienced academic who is keen to consider their teaching methods from a fresh

perspective. Noel Entwistle is Professor Emeritus of Education at the University of Edinburgh. He was previously the editor of the British Journal of Educational Psychology and Higher Education, and has an international reputation for his work in the field of student learning in higher education.

The Light and the Dark Routledge

Growing out of an International Society of the Study of Behavioral Development-sponsored symposium, this book discusses the basic assumptions that led the contributors to conduct research in the field of narrative development. This collection gathers their research reflections and varying approaches to narrative and its development. It illustrates each type of approach and highlights their respective motives. The book presents some of the basic motivating assumptions of each approach and provides insight into what holds each set of assumptions together, potentially transforming them into actions. This book will serve as an excellent text for courses emphasizing multiple approaches to the study of narrative. The editor has organized this volume in accordance with the six main points of the symposium: * Specification of the Domain--how narratives are defined in terms of textual structures, knowledge thereof, interactive moves, sociocultural conventions, and the like. * The Individual's Involvement in the Developmental Process--the relationship between some internal or external forces and the organism's own active participation in the developmental process. * The Course of Development--if it is continuous or discontinuous; whether it proceeds in an additive fashion or whether regressive phases occur; and what changes at different points in the developmental process signify. * The Goal of Development--the implicit notion of a telos, a target or end-point that needs to occur in the developmental process. * Mechanisms of Development--the forces and/or conditions that both instigate the developmental process and keep it moving toward its telos. * Methodology--where and how to look in the establishment of a developmental framework. This book is an indispensable text in the fields of narrative and/or discourse, linguistics, language studies, psychology, and education in general.

Designed for teachers of Chinese at all levels, this groundbreaking Second Edition has been fully updated and revised with information to help teachers create strong, sustainable K-16 Chinese language programs.

Pagan Spain Other Press, LLC

This selection of papers is the result of a two-day conference on ""Learner autonomy in second language pedagogy and research - challenges and issues"" which was held in Hannover, Germany. The edited volume contains written versions of the three plenaries, followed by Everhard's conceptual look at the various definitions of learner autonomy. We then look at challenges and obstacles of implementing learner autonomy when dealing with learners (Beseghi & Berotolotti; Born-Lechleitner; Denekamp) before turning to those challenges and obstacles we encounter in teacher education and teacher practice.

Allgemeinmedizin RiverRun

"We heard that the FBI and the Justice Department made a ferocious effort to stop the writing of this book, and after reading it we understand why. Marching Plague offers a radical reframing of the discourse surrounding germ warfare. After refuting the idea that massive biological attack is a probable if not a certain future occurrence, Critical Art Ensemble goes on to argue that biological weapons programmes are little more than a monumental waste of taxpayer dollars and medical and health resources that could be better spend fighting the massive loss of life each year from emerging infectious diseases." The Yes Men"The first draft of this book was seized with other materials under Section 175 of the US Biological Weapons Anti-Terrorism Act expanded by the USA PATRIOT Act. As the book was rewritten, the ensuing Kafkaesque legal and political process unfolding in parallel serve to demonstrate the argument presented within -- that the militarisation of medical institutions and public health policy is at odds with a transparent, comprehensible civil society. Clear, convincing and commanding analysis will guide you through the many ways in which biowarfare programmes have not and cannot secure this nation. Anyone interested in our shared biological future must read this book." Natalie Jeremijenko
