Eris Helgren knew her life was about to end. A daughter of the Priory—a generations-old family who protected their territories from nightwalkers—Eris was strong and independent. But on her birthday, her father would announce her betrothal. A year later, she would be forced to marry. What Eris didn't know was that the very monsters she hunted were watching her, and that being tamed wasn't what would kill her after all. In a land where the woods were forbidden and the laws meant life, Eris will have to make a decision that could bring peace between enemies, or war among friends.

Today's consumers are more knowledgeable, networked, and vocal. For them consumption is not merely an act of buying products and services, but an expression of their creative potential. Consequently, they are demanding a say and a voice in how companies conceive, develop, and deliver value to them. It is not surprising, therefore, to hear that a large number of companies are transforming how they innovate—not only in terms of developing new products and services, but in how they are created, delivered, and supported to customers. Open Innovation thinking, where companies collaborate with suppliers, distributors, and customers to co-create unique value, is fast replacing traditional thinking that viewed innovation as a proprietary activity and marketing as a static, one-way broadcast. However, while there is significant advocacy and buy-in for collaborating with customers, there is little guidance for companies on how to undertake the journey from

applause and appreciation to execution. Only reading about others' success stories - Nike, Hallmark, P&G, Mozilla, etc. - is not sufficient for helping a company develop a blueprint for themselves. In Customer Driven Innovation, strategy and branding consultant Gaurav Bhalla presents a concrete framework to help companies systematically and effectively design and implement collaborative innovation programs with their customers that can be applied in both business-to-business and business-to-consumer contexts. The authors describe how today's technologies allow companies to create dynamic dialogues with their customers through shared networks, virtual marketing techniques, and blogs to develop deeper relationships that reinforce brand loyalty and ultimately drive growth. They challenge traditional approaches to market research that measure "customer satisfaction" from a rear-window perspective, and help companies and their customers look forward instead.P>

This is a completely rewritten and updated version of one of the true classic books in the field of marketing and advertising. What's in a Name? Advertising and the Concept of Brands analyzes brands from the point of view of modern marketing theory. It deals in detail with the role of advertising in creating, building, and maintaining strong brands - the lifeblood of any long-term marketing campaign. The work is empirically based and is supported by the best research from both

the professional and academic fields. The authors describe the birth and maturity of brands and dissect the patterns of consumer purchasing of repeat-purchase goods. In addition to all new research findings and examples, this new edition of What's in a Name? includes first time coverage of the short-term, medium-term, and long-term effects of advertising on sales of brands. The book concludes with new recommendations on how to develop and disseminate better advertising.
