 Combat Operations: Stemming the Tide describes a critical chapter in the Vietnam conflict, the first eighteen months of combat by the U.S. Army's ground forces. Relying on official American and enemy primary sources, John M. Carland focuses on initial deployments and early combat and takes care to present a well-balanced picture by discussing not only the successes but also the difficulties endemic to the entire effort. This fine work presents the war in all of its detail: the enemy's strategy and tactics, General William C. Westmoreland's search and destroy operations, the helicopters and airmobile warfare, the immense firepower American forces could call upon to

counter Communist control of the battlefield, the out-of-country enemy sanctuaries, and the allied efforts to win the allegiance of the South Vietnamese people to the nation's anti-Communist government. Carland's volume demonstrates that U.S. forces succeeded in achieving their initial goals, but unexpected manpower shortages made Westmoreland realize that the transition from stemming the tide to taking the offensive would take longer. Bruising battles with the Viet Cong and North Vietnamese in the Saigon area and in the Central Highlands had halted their drive to conquest in 1965 and, with major base development activities afoot, a series of high-tempo spoiling operations in 1966 kept them off balance until more U.S. fighting units arrived in the fall. Carland credits the improvements in communications and intelligence, the helicopter's capacity to extend the battlefield, and the availability of enormous firepower as the potent ingredients in Westmoreland's optimism for victory, yet realizes that the ultimate issue of how effective the U.S. Army would be and what it would accomplish during the next phase was very much a question mark.

"The new evidence uncovers a number of behind-the-scenes plays - such as Nixon's secret nuclear alert of October 1969 - and sheds more light on Nixon's goals in Vietnam and his and Kissinger's strategies of Vietnamization, the "China card," and "triangular diplomacy." The excerpted documents also reveal significant new information about the purposes of the linebacker bombings, Nixon's manipulation of the POW issue, and the conduct of the secret negotiations in Paris - as well as other key topics, events, and issues. All of these are effectively framed by Kimball, whose introductions to each document provide historical context."

The Vietnam War remains one of the most contentious events in American history. This book is a collection of essays that seeks to examine the current state of scholarship on the war and its aftermath. It is divided into five sections which address American presidents and the war, the conduct of the war in the field, the impact of the Tet Offensive, the meaning of the war and its lasting legacies. The purpose of the collection is to present the most recent contributions to the continuing academic and scholarly dialogue about one of the most momentous historical events of the twentieth century.

A revealing look at presidential politics and foreign policy-making from the aftermath of Vietnam to the NATO intervention in Kosovo. The book illuminates the relationship between presidents' domestic and foreign policy priorities and the key role of public opinion in constraining presidential initiatives, particularly the ability of a president to use military force overseas. In case studies ranging from the invasion of Grenada through the Gulf War and the dilemmas of Somalia, Haiti, Bosnia and Kosovo, Melanson provides compelling portraits of presidents Nixon, Carter, Reagan, Bush and Clinton, and their different efforts to forge a foreign policy consensus.

**The Columbia Guide to the Vietnam War** Routledge  
Explores the rivalry between the armed services of the U.S. relating to the employment of tactical airpower during the Vietnam War. Not being an American, Horwood is able to put a fresh perspective on this complex issue. This study focuses on tactical airpower in S. Vietnam between 1961 and 1968. Horwood avoids a lengthy discussion of the air war over N. Vietnam, focusing instead on the combat operations in the South. He examines a number of issues which are relevant to the use of airpower in irregular warfare: command and control of airpower, the use of airpower at the tactical and the operational-strategic level of war, the role of helicopters, and different service understandings of the proper role of airpower in a counterinsurgency.

This volume chronicles RAND's involvement in researching insurgency and counterinsurgency in Vietnam, Laos, and Thailand during the Vietnam War era and assesses the effect that this

research had on U.S. officials and policies. Elliott draws on interviews with former RAND staff and the many studies that RAND produced on these topics to provide a narrative that captures the tenor of the times and conveys the attitudes and thinking of those involved.

Children born during the post-WWII era of peace and prosperity entered history at a time dominated by I-Like-Ike politics and domestic security. As they approached adolescence, however, their world was shaken by major cultural, economic, social, and political upheaval. And although it was time of great innovation and progress, a sense of chaos and bitterness began to envelop the country. It was the '60s. For many Americans, a mere mention of this decade evokes an extraordinary time and place in the country's - and their own - history. Adolescents who had been enjoying the technological and medical advances of the era - television, drive-in movies, rock-and-roll, vaccinations that prevented once-incurable diseases - now were also experiencing the fallout from the Civil Rights Movement, domestic terrorism, stagflation, and (perhaps most significant) the Vietnam War. From Adolescence to Adulthood in the Vietnam Era provides a unique, detailed, long-term study of the psychological and social worlds of male adolescents who were on the cusp of adulthood as the 1960s were ending. This longitudinal analysis follows adolescent boys who graduated with the class of 1969 and transitioned into adulthood either through military service, full-time employment, or college life. The results examine the different pathways these boys chose and the affect these choices had on their transition from adolescents to young adult men.

This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines with the staff of the

U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

YouTube sensation John D. Ruddy brings history to life with clarity and hilarity in videos that have amassed millions of views around the world. Here, his viral online hit, Manny Man, turns Ireland's tumultuous millennia of history into a fun and easy-to-understand story. Why did the Celts love stealing cows? What was the Norman Invasion, and were they all called Norman? From the Ice Age up to the present day, through the Vikings and Tudors, British rule and the fight for independence, he covers it all - with his tongue in his cheek, of course. The succinct, lively text is complemented by comic, colorful illustrations. So if you want a quick fix of Irish history with lots of fun along the way, then Manny Man is your only man.

When the plane full of young recruits landed in Cam Ranh Bay, Vietnam, the stewardess stood at the cabin door and cried. It seemed like a bad omen. *The Frog Hunter: A Story about the Vietnam War, an Inkblot Test and a Girl*, is a memoir that reads stranger than fiction. The author takes his readers on a fascinating, often humorous, and emotionally moving journey from deadly Ranger missions in Vietnam, to betrayal by his superior officers at Fort Ord, to the inside of an Army psychiatric ward. With a chaotic mind, trying to make sense of the war, Stamper is in a desperate search for truth. He turns to the hippie culture, attracted by their message of peace and enlightenment. Unexpectedly, he meets a beautiful girl who becomes the love of his life. He wants normalcy; he wants the girl, and he wants a future. But every bit of happiness that life offers him is threatened by a war that ravages his mind and heart. It has taken everything from him—his friends, his sanity, and his peace. He can't let it take her too, and he must keep it from her at all costs. Written in powerful prose, the story reveals how war wounds the mind and soul. But hope emerges, kindled within the tangled aftermath of trauma and loss.

Just as famines and plagues can provide opportunities for medical research, the unhappy course of United States relations with Vietnam is a prime source of evidence for students of American political institutions. How Presidents Test Reality draws on the record of American decision making about Vietnam to explore the

capacity of top government executives and their advisers to engage in effective reality testing. Authors Burke and Greenstein compare the Vietnam decisions of two presidents whose leadership styles and advisory systems diverged as sharply as any in the modern presidency. Faced with a common challenge—an incipient Communist take-over of Vietnam—presidents Eisenhower and Johnson engaged in intense debates with their aides and associates, some of whom favored intervention and some of whom opposed it. In the Dien Bien Phu Crisis of 1954, Eisenhower decided not to enter the conflict; in 1965, when it became evident that the regime in South Vietnam could not hold out much longer, Johnson intervened. How Presidents Test Reality uses declassified records and interviews with participants to assess the adequacy of each president's use of advice and information. This important book advances our historical understanding of the American involvement in Vietnam and illuminates the preconditions of effective presidential leadership in the modern world. "An exceptionally thoughtful exercise in what 'contemporary history' ought to be. Illuminates the past in a way that suggests how we might deal with the present and the future." —John Lewis Gaddis "Burke and Greenstein have written what amounts to an owner's manual for operating the National Security Council....This is a book Reagan's people could have used and George Bush ought to read." —Bob Schieffer, *The Washington Monthly*

*Bloods* Rand Corporation

This is the first of a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam conflict. This particular volume covers a relatively obscure chapter in U.S. Marine Corps history—the activities of Marines in Vietnam between 1954 and 1964. The narrative traces the evolution of those activities from a one-man advisory operation at the conclusion of the French-Indochina War in 1954 to the advisory and combat support activities of some 700 Marines at the end of 1964. As the introductory volume for the series this account has an important secondary objective: to establish a geographical, political, and military foundation upon which the subsequent histories can be developed.

The Angel from Vietnam: A memoir of growing up, the Vietnam War, a daughter, and healing... Vernon Press

Why have nuclear weapons not been used since Hiroshima and Nagasaki in 1945? Nina Tannenwald disputes the conventional answer of 'deterrence' in favour of what she calls a nuclear taboo - a widespread inhibition on using nuclear weapons - which has arisen in global politics. Drawing on newly released archival sources, Tannenwald traces the rise of the nuclear taboo, the forces that produced it, and its influence, particularly on US leaders. She analyzes four critical instances where US leaders considered using nuclear weapons (Japan 1945, the Korean War, the Vietnam War, and the Gulf War 1991) and examines how the nuclear taboo has repeatedly dissuaded US and other world leaders from resorting to these 'ultimate weapons'. Through a systematic analysis, Tannenwald challenges conventional conceptions of deterrence and offers a compelling argument on the moral bases of nuclear restraint as well as an important insight into how nuclear war can be avoided in the future.

A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war,

memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required

reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.
