The Routledge Handbook of Mega-Sporting Events and Human Rights is the first book to explore in depth the topic of mega-sporting events (MSEs) and human rights, offering accounts of adverse human rights impacts linked to MSEs while considering the potential for promoting human rights in and through the framework of these events. Drawing on the contributions of an international group of leading researchers, practitioners and advocates, the book introduces key concepts in human rights and considers how they relate to ethical, social, managerial and governance issues in contemporary MSEs, from inclusion and welfare to corruption and sustainability. It examines the role of key stakeholders in the delivery of MSEs, including organising committees, sport governing bodies, governments, athletes, sponsors and broadcasters, as well as the role of activists and advocates, and presents historical and contemporary case studies of human rights as an active issue in MSEs. The book provides new perspectives on human rights as a lens for understanding modern sport and as a guiding principle for responsible sport that protects the interests of individuals and communities, as well as offering guidance on best practice. It is essential reading for all advanced students, researchers, practitioners, policymakers and stakeholders with an interest in organisation and delivery of MSEs, as well as general sport management, sport policy, sport governance, the ethics of sport, event management, political science, development studies, ethical business or the significance of sport in wider society.

Sport, Politics and Society in the Middle East Teacher Created Materials

This volume aims to stimulate interest in the under-researched role of silent partners (SPs) in multicultural education. Silent partners include formal and informal places/spaces in schools (e.g. architecture, classroom facilities, libraries, corridors, playgrounds, canteens), objects (e.g. teaching aids, furniture, wall decorations and overall interior design), interactive technologies (use of devices and applications) but also often taken-for-granted and not immediately visible patterns of thought, ideologies and assumptions. People involved in education all engage and work with a number of SPs that contribute to the delivery of curricula, but also to social life and well-being in and out of schools. The way places/spaces, objects and technologies influence the school community's experiences of learning, well-being and social justice is rarely observed and problematised in education - hence the adjective 'silent' in the term 'silent partners'. This book not only fills a significant empirical gap, but it can also inject public debate over future working environments in schools for multicultural education. It will be relevant to both researchers interested in developing their knowledge on these issues from a different perspective but also educators in search of inspiration for multicultural education. Praise for Silent Partners in Multicultural Education: "How to organize your classroom's configuration in such a manner that all pupils feel welcome and comfortable? While most of those invested in multicultural education focus on the optimization of various linguistic aspects, Itkonen, Dervin and their colleagues give voice to the non-verbal aspects of education. In this book they elaborate how formal and informal places/spaces in schools

can unintentionally reflect ideologies and cultural assumptions. They illustrate this perspective with telling examples that come from what is widely perceived as one of the best educational systems in the world. This book is an important, innovative contribution to the question of inclusion of all pupils in our school systems. It provides an eye-opening perspective to researchers in the field, teachers, principals and stakeholders willing to work for social justice in their schools". ~ Emmanuelle Le Pichon, Vorstman, Researcher and Assistant Professor, Languages, Literature and Communication Department, Utrecht Institute of Linguistics "Congratulations are in order for this ground breaking and significant book. As the editors and authors convey convincingly and often poignantly, multicultural education is an increasingly politicised phenomenon that needs all the friends and allies that it can garner. The book's coverage of silent partners in education ? objects and technologies operating in specific places and spaces ? is therefore timely. Yet, as the book also highlights, these silent partners can exert negative power as well as positive influence on educational outcomes. The book presents a compelling account of the fundamental ambivalence framing these partners and formal educational provision more broadly. Rendering these silent educational partners visible and open to scrutiny is a significant scholarly achievement by the Education for Diversities Research Group in the Department of Teacher Education at the University of Helsinki, Finland, building on their well-deserved reputation for exploring the implicit and tacit and yet impactful dimensions of intercultural education and understanding. The book is appropriately diverse and inclusive in its concerns, with attention being directed at education in Finland, France, and the United States. Likewise the coverage traverses international and national schools, higher education, teacher education and productive methodologies for researching silent partners. This innovative and thought-provoking volume is highly recommended for its originality in helping us to see education for diversities in a new and powerful light." ~ Patrick Alan Danaher, Professor in Educational Research in the School of Linguistics, Adult and Specialist Education, Associate Dean (Research and Research Training) in the Faculty of Business, Education, Law and Arts, Toowoomba campus of the University of Southern Queensland, Australia; Adjunct Professor in the School of Education and the Arts, Central Queensland University, Australia. "Silent partners do not only reflect the ways we conceive of education but they also influence our practices as educators. Being silent, they are often taken for granted. The strength of this book lies in its critical questioning of the notion of silent partners. The chapters enlighten about the untold and the effects they have in an educational environment. The readers, especially in the fields of education and social justice, will definitely acquire a more sensitive perception of how silent partners affect our approaches to multicultural education." ~ Dr. Regis Machart, Senior Lecturer, Universiti Putra Malaysia; Adjunct Professor, University of Helsinki, Finland

Sport in the Middle East has become a major issue in global affairs. The contributors to this timely volume discuss the intersection of political and cultural processes related to sport in the region. Eleven chapters trace the historical institutionalization of sport and the role it has played in negotiating "Western" culture. Sport is found to be a contested terrain where struggles are being fought over the inclusion of women, over competing definitions of national identity, over preserving social memory, and over press freedom. Also discussed are the implications of mega-sporting events for host countries, and how both elite sport policies and sports industries in the region are being shaped. *Sport, Politics and Society in the Middle East* draws on academic disciplines from the humanities and social sciences to offer in-depth, theoretically grounded, and richly empirical case studies. It employs diverse research methodologies, from ethnography and in-depth interviews to archival research, to make a lasting contribution to this critical subject.

Current Municipal Problems Taylor & Francis

Sport is a global phenomenon engaging billions of people and generating annual revenues of more than US\$ 145 billion.

Problems in the governance of sports organisations, fixing of matches and staging of major sporting events have spurred action on many fronts. Yet attempts to stop corruption in sport are still at an early stage. The Global Corruption Report (GCR) on sport is the most comprehensive analysis of sports corruption to date. It consists of more than 60 contributions from leading experts in the fields of corruption and sport, from sports organisations, governments, multilateral institutions, sponsors, athletes, supporters, academia and the wider anti-corruption movement. This GCR provides essential analysis for understanding the corruption risks in sport, focusing on sports governance, the business of sport, planning of major events, and match-fixing. It highlights the significant work that has already been done and presents new approaches to strengthening integrity in sport. In addition to measuring transparency and accountability, the GCR gives priority to participation, from sponsors to athletes to supporters an essential to restoring trust in sport.

Much philosophical work on pop culture apologises for its use; using popular culture is a necessary evil, something merely useful for reaching the masses with important philosophical arguments. But works of pop culture are important in their own right--they shape worldviews, inspire ideas, change minds. We wouldn't balk at a book dedicated to examining the philosophy of *The Great Gatsby* or *1984*--why aren't *Star Trek* and *Superman* fair game as well? After all, when produced, the former were considered pop culture just as much as the latter. This will be the first major reference work to right that wrong, gathering together entries on film, television, games, graphic novels and comedy, and officially recognizing the importance of the field. It will be the go-to resource for students and researchers in philosophy, culture, media and communications, English and history and will act as a springboard to introduce the reader to the other key literature in the field.
