This guide is designed to assist all those who are responsible for providing or overseeing formal

education or practical experience that forms part of the initial professional development of aspiring professional accountants, or the continuing professional development of professional accountants. It is particularly relevant to professional accountancy organizations. It is also intended for policy makers and regulators who determine which organizations are licensed to certify professional accountants and related specializations, for

example, audit professionals. The purpose of the guide is to

- increase understanding of the gap between the current skills of many accountants in some regions and the skills that are relevant in increasingly digitized and globalized economies;
- convey the essential features of Competency-Based Accounting Education, Training, and Certification (CBAETC);
- provide a common reference framework for organizations pursuing CBAETC and the

consultants working with them;

- assist countries in developing in-country plans and implementing in-country processes that produce accountants with higher-order skills relevant to their economy's rapidly evolving needs;
- improve financial reporting, auditing, and regulation.

This guide complements and builds on International Education Standards (IES™) of the International Accounting Education Standards Board™ (IAESB™). Builder's Guide to

### The MultiCapital

Scorecard John Wiley & Sons

“A superb . . . how-to book for any entrepreneur who not only wants to get their thoughts down to share with the world, but to leverage off their expertise.” -Geoff Hetherington, JG

Hetherington, The Clarity CEO With the availability of self-publishing services and the rise of the entrepreneur as a thought leader, writing a book is becoming more appealing to an increasing number of small business owners. The problem? Most businesspeople aren't writers, have never written a book before, are time poor and don't know

where to start. While many want to write a book, they worry about investing months of their time and thousands of their dollars to write something that isn't any good, or even whether they will finish. Book Blueprint gives a step-by-step framework that any entrepreneur can follow to write a great book quickly, even if they're not a writer.
