Urbanization And Development Routledge

Originally published as a special issue of Research in Dance Education, now with an added chapter, this text acknowledges and celebrates the increasingly diverse careers and employment networks in which dance professionals and dance educators are engaged. Addressing issues and developments relating to the workplace of dance, the text explores what it means to transcend the boundary between dance as passion, and dance as employment. Chapters explore challenges of professional practice including limitations on access, precarity, bodily risk, gender inequality, and sexual harassment, and challenge the status quo to offer readers new ways of thinking about dance, and how this might translate into professional practice and work. Ultimately celebrating the passion which motivates dancers to embark on a professional career, and highlighting the elation and joy which such employment can bring, this volume encourages dance professionals, students, and educators to imagine things differently and develop teaching approaches, curricula, work

places, and communities which capitalise on the diversity and dedication of individuals in the field. This text will be of great interest to graduate and postgraduate students, researchers, academics, professionals in the field of Dance, Dance Education, Choreography and related art forms, Curriculum studies and Sociology of Education.

"Smallcreep's Day is Peter Currell Brown's only novel and was first published by Victor Gollancz Ltd in 1965. The story is a surreal satire on modern industrial life. The central character Pinquean Smallcreep works in the slotting section of a vast and labyrinthine factory and has done so for years. He becomes curious about the purpose of the pulley that he puts the slots in and one day, having become obsessed by an idea, leaves his machine and goes exploring through the strange world of his factory. On a quest to find meaning in his monotonous existence, Smallcreep experiences many surreal and disturbing situations."--Wikipedia.

In this volume distinguished scholars from both sides of the Atlantic explore the work of Tacitus in its historical and literary context and also show how his text was interpreted in the sixteenth

through eighteenth centuries. Discussed here, for example, are the ways predilections of a particular age color one's reading of a complex author and why a reexamination of these influences is necessary to understand both the author and those who have interpreted him. All of the essays were first prepared for a colloquium on Tacitus held at Princeton University in March 1990. The resulting volume is dedicated to the memory of the great Tacitean scholar Sir Ronald Syme. The contributors are G. W. Bowersock ("Tacitus and the Province of Asia"), T. J. Luce ("Reading and Response in the Dialogus"), Elizabeth Keitel ("Speech and Narrative in Histories 4"), Christopher Pelling ("Tacitus and Germanicus"), Judith Ginsburg ("In maiores certamina: Past and Present in the Annals"), A. J. Woodman ("Amateur Dramatics at the Court of Nero"), Mark Morford ("Tacitean Prudentia and the Doctrines of Justus Lipsius"), Donald R. Kelley ("Tacitus Noster: The Germania in the Renaissance and Reformation"), and Howard D. Weinbrot ("Politics, Taste, and National Identity: Some Uses of Tacitism in Eighteenth-Century Britain"). Originally published in 1993. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. This key text presents an accessible and diverse exploration of spirituality in mental health practice, broadening the definition of spirituality to comprise a variety of transcendent experiences. Chapters include a brief history of the tensions of spirituality in mental health practice and consider a range of emerging topics, from spirituality among the elderly and energy work (Reiki), to spirituality in addiction recovery, incarceration, and hospice work. The book offers a close examination of the limits of the medical model of care, making a case for a more spiritually sensitive practice. Rich case examples are woven throughout, and the book is paired with podcasts that can be applied across chapters, illuminating the narrative stories and building active listening and teaching skills. Suitable for students of social work and counseling at master's level, as well as practicing clinicians, *Spirituality in Mental Health Practice* is an essential text for widening our understanding of how spiritual frameworks can enrich mental health practice.

"The relationship between Africa and Europe is of high strategic importance. This volume studies the ongoing dynamics between the two continents by adopting a pluralist understanding of international relations which encompasses non-state actors as well as states. Going beyond pure intergovernmentalism, this focus of this book is on activists, business people, religious believers, local politicians as well as transnational networks and by hybrid coalitions. Such plurality of socio-economic and political interactions underpinning the relationship between Africa and Europe is underexamined and yet of great importance. The text identifies new patterns of cooperation and recurrent obstacles in the African-European multi-stakeholder dynamics, thus opening the way for a more accurate understanding of the future relationship between Africa and Europe. This book brings African and European reflections together, on an equal standing, in order to achieve a true dialogue among civilizations. This book is aimed at all those who are interested in the African-European relationship, including students and researchers, as well as activists, business people, civil servant and functionaries at local and national level"--

This book is one of the first to present a definitive history of the Christian Ashram Movement. It offers insights into the development of the Movement, Europe's Orientalist view of Eastern mysticism and how the concept of the "ashram" spread beyond the borders of India. Drawing extensively from ashram literature and the author's field research, the book critically analyzes the notions of inculturation in the encounter between Christianity and Hindu spirituality and ritualism. It looks at how the Movement grew out of the colonial encounter and how it evolved through the years, which was contingent on developments within Christian churches outside India. The volume also discusses the reinterpretation of the idea of the "ashram" by Christian theologians, the introduction of elite Brahmanical concepts within the Movement and the unique theological perspectives which were nurtured in these ashrams. The book offers an alternative perspective to the generally perceived history of Christianity in India. It will be of interest to scholars and researchers of religious studies, Christianity, sociology, social anthropology and religious history.

This third book in the GISDATA series focuses on the widespread use of geographical information systems GIS in European local government. The editors include a wide range of applications carried out by different professional groups, and offer the opportunity of studying the extent to which diffusion of innovations like GIS are sensitive to national issues such as cultural context, institutional setup and the availability of data.; The book answers key questions such as: what can be learnt from research on organizational behaviour in relation to technological innovation?; what are the classical features of the GIS diffusion process?; to what extent is the adoption and utilization of GIS facilitated - or impeded - by the organizational culture within which it takes place?; and what mechanisms can be applied to enhance the diffusion of GIS? The book covers

aspects of diffusion in the following European countries: UK, France, Italy, Poland, Denmark, The Netherlands, Germany, Greece and Portugal.

Originally published in 1969, this book discusses the many factors which atomised German society from 1870 onwards and thus assisted Nazi evil, and it shows that Hitler and Nazism were mere phenomena of a mass age. The author wrote with the twin qualifications as historian and survivor of the camps. To have lived through it and then dissect it as a scholar is an astonishing achievement and it is this achievement that this book records.

This book is a translation of *La Nazione del Risorgimento*, one of the most important and influential works on modern Italian history published in recent years. It analyses the aspects of the ideas of nationhood and patriotism that impassioned and energized the Italian Risorgimento movement during the first half of the nineteenth century. Employing an innovative interdisciplinary approach that examines the cultural production and consumption of the period, the author has challenged the orthodoxies of post-1945 Italian historiography. He explores the developing themes that gave strength to the idea of the Italian 'nation', and in the process persuasively explains why so many young men and women were willing to lay down their lives for the 'patria' and its independence.

Air safety is right now at a point where the chances of being killed in an aviation accident are far lower than the chances to winning a jackpot in any of the major lotteries. However, keeping or improving that performance level requires a critical analysis of some events that, despite scarce, point to structural failures in the learning process. The effect of these failures could increase soon if there is not a clear and right development path. This book tries to identify what is wrong, why there are things to fix, and some human factors principles to keep in aircraft design and operations. Features Shows, through different events, how the system learns through technology, practices, and regulations and the pitfalls of that learning process Discusses the use of information technology in safety-critical environments and why procedural knowledge is not enough Presents air safety management as a successful process, but at the same time, failures coming from technological and organizational features are shown Offers ways to improve from the human factors side by getting the right lessons from recent events

Originally published in 1986, this book subverts an attitude towards the moral dimension of life which the author terms 'ethical cynicism'. It discusses a theory of moral powers - a theory which shows that moral values are immensely potent sources of power. The author argues that there is a conceptual affinity between the Wittgensteinian account of language and the Marxist theory of history such that the two complement and even require one another in various aspects.
