This volume offers a synthesis of current expertise on contact-induced change in

Arabic and its neighbours, with thirty chapters written by many of the leading experts on this topic. Its purpose is to showcase the current state of knowledge regarding the diverse outcomes of contacts between Arabic and other languages, in a format that is both accessible and useful to Arabists, historical linguists, and students of language contact.

Mauritania y España, una historia común
Città Nuova

Le civiltà che si fronteggiano sul Mediterraneo, hanno innescato nei secoli contaminazioni culturali e al contempo rapporti di opposizione, i cui esiti ancora oggi si estendono ben oltre le fasce costiere del bacino. L'architettura è una chiave per raccontare questa lunga storia di continuità e rotture: mentre nel Secondo dopoguerra l'Europa vive una profonda crisi economica, il Nordafrica attraversa un periodo di fermento culturale durante il quale si incrociano le

voci dei progettisti del Movimento Moderno e delle sue diverse declinazioni. Questo libro riguarda proprio una di queste voci, quella di André Ravéreau (1919-2017), architetto francese che, dopo aver peregrinato nel Mediterraneo, approda a metà degli anni Cinquanta alle rive di Algeri, spingendosi poi fino alle porte del Sahara, nella valle del M'Zab. Figura a tutt'oggi poco studiata poiché a lungo considerata fuori dal coro del Movimento Moderno, Ravéreau elabora un linguaggio personale strettamente legato alla propria esperienza biografica, alle suggestioni dell'architettura vernacolare: i suoi progetti accolgono e reinterpretano la tensione con l'"altro Mediterraneo", senza scadere mai nella mimica. L'opera di Ravéreau è analizzata attraverso una selezione di progetti per la valle del M'Zab, tappe salienti verso la definizione della sua architettura, e lavori in cui l'architetto risolve in maniera migliore il confronto con tradizione e territorio. *Giustino storico illustre, ne le Historie esterne di Trogo Pompeo* CRC Press
A guide to help planners and engineers to the improvement of future water projects. The past century of global experience on

water projects is presented as the basis for creating new approaches. First-hand analyses, including 35 case studies from 25 countries, portray the influence of politicians, biologists, engineers, computer models and physicians on the spectacular successes and failures of the builders of canals and dams. By drawing on this experience, the author outlines methods for assessing, predicting and preventing major water-associated diseases around large dams, canals and irrigation systems. *Grandi progetti di sviluppo e risposte locali. En lo que se ha convertido en la peor crisis global de refugiados desde el final de la Segunda Guerra Mundial, Europa ha visto, a lo largo de 2015, cómo llegaba a sus costas, de manera irregular, un número sin precedentes de personas.

This volume is the outcome of collaborative European research among archaeologists, archaeobotanists, ethnographers, historians and agronomists, and frequently uses experiments in archaeology. It aims to establish new common ground for integrating different approaches and for viewing agriculture from the standpoint of the human actors involved. Each chapter provides an interdisciplinary overview of the skills used and the social context of

the pursuit of agriculture, highlighting examples of tools, technologies and processes from land clearance to cereal processing and food preparation. This is the second of three volumes in the EARTH monograph series, *The dynamics of non-industrial agriculture: 8,000 years of resilience and innovation*, which shows the great variety of agricultural practices in human terms, in their social, political, cultural and legal contexts.

Valla (1407-1457) was the most important theorist of the humanist movement. His most famous work is the present volume, an oration in which Valla uses new philological methods to attack the authenticity of the most important document justifying the papacy's claims to temporal rule.

En este libro se reúnen investigadores provenientes de Chile, Argentina, Ecuador, Colombia, Haití, México y España para

realizar un nuevo aporte al análisis de las migraciones internacionales, siendo la primera obra en torno a la materia que publica el sello editorial de la Universidad Santo Tomás. Estos son trabajos que permiten entender el fenómeno de manera multidimensional, caracterizándolo como una de las problemáticas de mayor relevancia en la actualidad. La obra gira en torno a dos grandes temáticas como son: la alteridad y los procesos sociopolíticos, dentro de los cuales se cobijan aspectos como el límite y otredad; el desarraigo y la cuestión multicultural; entre otros.

This book compiles the main findings of the multidisciplinary long-term research program developed in the continental margin of one of the more productive and unknown areas of the world oceans, Northwest Africa. The more than 25,000 preserved fishes and benthic invertebrates and quantitative data collected in 342 trawling stations, the 267 oceanographic

profiles, the 211 sediment samples and the 28,122 km² prospected by multi-beam echo sounding allowed to obtain an overview of the amazing biodiversity of the demersal and benthic fauna inhabiting soft- and hard-bottom habitats, as well as the fascinating geomorphology and oceanography, hidden in the Mauritanian slope.
