Containing an in-depth study of the emerging theory and core of ecological law, this book insightfully proposes a 'lens of ecological law' through which the disparity between current laws and ecological law can be assessed. The lens consists of three principles: ecocentrism, ecological primacy and ecological justice. These principles are used within the book to explore and analyse the challenges and opportunities related to the transition to ecological law and to examine three key mining case studies.

The weird, fetid, familiar discomfort of family is front and centre in these short stories of all the ways we remain a mystery to each other. The mysteries of kinship (families born into and families made) take disconcerting and familiar shapes in these refreshingly frank short stories. A family is haunted by a beast that splatters fruit against its walls every night, another undergoes a near-collision with a bus on the way home from the beach. Mothers are cold, fathers are absent—we know these moments in the abstract, but Adui makes each as uncanny as our own lives: close but not yet understood.

Today he is known as Dr. Q, an internationally renowned neurosurgeon and neuroscientist who leads cutting-edge research to cure brain cancer. But not too long ago, he was Freddy, a nineteen-year-old undocumented migrant worker toiling in the tomato fields of central California. In this gripping memoir, Alfredo Quiñones-Hinojosa tells his amazing life story—from his impoverished childhood in the tiny village of Palaco, Mexico, to his harrowing border crossing and his transformation from illegal immigrant to American citizen and gifted student at the University of California at Berkeley and at Harvard Medical School. Packed with adventure and adversity—including a few terrifying brushes with death—Becoming Dr. Q is a testament to persistence, hard work, the power of hope and imagination, and the pursuit of excellence. It's also a story about the importance of family, of mentors, and of giving people a chance.

Search skills of today bear little resemblance to searches through print publications. Reference service has become much more complex than in the past, and is in a constant state of flux. Learning the skill sets of a worthy reference librarian can be challenging, unending, rewarding, and-- yes, fun.

This book increases the visibility, clarity and understanding of ecological law. Ecological law is emerging as a field of law founded on systems thinking and the need to integrate ecological limits, such as planetary boundaries, into law. Presenting new thinking in the field, this book focuses on problem areas of contemporary law including environmental law, property law, trusts, legal theory and First Nations law and explains how ecological law provides solutions. Written by ecological law experts, it does this by 1) providing an overview of shortcomings of environmental law and other areas of contemporary law, 2) presenting specific examples of these shortcomings, 3) explaining what ecological law is and how it provides solutions to the shortcomings of contemporary law, and 4) showing how society can overcome some key challenges in the transition to ecological law. Drawing on a diverse range of case study examples including Indigenous law, ecological restoration and mining, this volume will be of great interest to students, scholars and policymakers of environmental and ecological law and governance, political science, environmental ethics and ecological and degrowth economics.

*Soldaderas in the Mexican Military* Springer

This book is a collection of studies of drug policies in several Latin American countries. The chapters analyze the specific histories of drug policies in each country, as well as related phenomena and case studies throughout the region. It presents conceptual

reflections on the origins of prohibition and the “War on Drugs,” including the topic of human rights and cognitive freedom. Further, the collection reflects on the pioneering role of some Latin American countries in changing paradigms of international drug policy. Each case study provides an analysis of where each state is now in terms of policy reform within the context of its history and current socio-political circumstances. Concurrently, local movements, initiatives, and backlash against the reformist debate within the hemisphere are examined. The recent changes regarding the regulation of marijuana in the United States and their possible impact on Latin America are also addressed. This work is an important, up-to-date and well-researched reference for all who are interested in drug policy from a Latin American perspective.

Transnational Latina Narratives is the first critical study of its kind to examine twenty-first-century Latina narratives by female authors of diverse Latin American heritages based in the U.S. Heredia's comparative perspective on gender, race and migrations between Latin America and the U.S. demonstrates the changing national landscape that needs to accommodate an ever-growing Latino/a presence. This book draws on the work of Denise Chávez, Sandra Cisneros, Marta Moreno Vega, Angie Cruz, and Marie Arana, as well as a diverse blend of popular culture. Heredia's thought-provoking insights seek to empower the representation of women who are transnational ambassadors in modern trans-American literature.

This pathbreaking anthology of Chicano literary criticism, with essays on a remarkable range of texts—both old and new—draws on diverse perspectives in contemporary literary and cultural studies: from ethnographic to postmodernist, from Marxist to feminist, from cultural materialist to new historicist. The editors have organized essays around four broad themes: the situation of Chicano literary studies within American literary history and debates about the “canon”; representations of the Chicana/o subject; genre, ideology, and history; and the aesthetics of Chicano literature. The volume as a whole aims at generating new ways of understanding what counts as culture and “theory” and who counts as a theorist. A selected and annotated bibliography of contemporary Chicano literary criticism is also included. By recovering neglected authors and texts and introducing readers to an emergent Chicano canon, by introducing new perspectives on American literary history, ethnicity, gender, culture, and the literary process itself, *Criticism in the Borderlands* is an agenda-setting collection that moves beyond previous scholarship to open

up the field of Chicano literary studies and to define anew what is American literature. Contributors. El presente estudio de caso analiza la tendencia a la fragmentación del derecho internacional desde la ciencia política y el derecho internacional y su relación con la injerencia de los Estados en la redacción del Proyecto de Responsabilidad del Estado por el Hecho Internacionalmente Ilícito, el cual estudia como documento legal y posible modelo de análisis político internacional. El texto busca definir la tendencia a la fragmentación del derecho internacional, analiza la injerencia del Estado en el Proyecto a favor de las tesis bilateralistas en razón de su interés nacional, como manifestación de esa tendencia y ofrece evidencia de la participación e injerencia del Estado respecto al trabajo de la Comisión de Derecho Internacional.
