A "Dutch-Uncle" approach to advising those who assume "first" command. Written by an Army officer primarily for Army company commanders, the book contains information, suggestions, & insights applicable to other services. A ready reference for the company commander. Identifies tasks to complete & how to set new directions for the company; inspires confidence to command with authority. Includes chapters on military justice & administrative law matters. Comprehensive do's

& don'ts of a winning command philosophy.

*Equipment Improvement Report and Maintenance Digest* DIANE Publishing

This regulation encompasses garrison, field, and subsistence supply operations. Specifically, this regulation comprises Army Staff and major Army command responsibilities and includes responsibilities for the Installation Management Command and subordinate regions. It also establishes policy for the adoption of an à la carte dining facility and for watercraft to provide subsistence when underway or in dock. Additionally, the regulation identifies DOD 7000.14-R as the source of meal rates for reimbursement purposes; delegates the approval authority for catered meals and host nation meals from Headquarters,

Department of the Army to the Army commands; and authorizes the use of the Government purchase card for subsistence purchases when in the best interest of the Government. This regulation allows prime vendors as the source of garrison supply and pricing and provides garrison menu standards in accordance with The Surgeon General's nutrition standards for feeding military personnel. Also, included is guidance for the implementation of the U.S. Department of Agriculture Food Recovery Program.

To meet the challenges facing the Army, the Army needs predictor measures that will enhance entry-level Soldier selection and classification. One of the purposes of the Army Research Institute for Behavioral and Social Sciences (ARI's) Army Class project is to provide the Army with recommendations on which predictor measures, in particular measures of non-cognitive attributes (e.g., interests, values, and temperament), demonstrate the greatest potential to inform entry-level Soldier selection and classification decisions. The present report documents the development of criterion measures to assist in these analyses. A second purpose of the Army Class project is to develop and pilot job knowledge tests (JKTs) that can be used to aid reclassification decisions. If Soldiers are shown to possess critical knowledge, skills, and attributes (KSAs) for their new jobs, this could reduce training requirements and increase force readiness. This report documents the development of reclassification JKT test items.

ADP 3-0, Operations, constitutes the Army's view of how to conduct prompt and sustained operations across multiple domains, and it sets the foundation for developing other principles, tactics, techniques, and procedures detailed in subordinate doctrine publications. It articulates the Army's operational doctrine for unified land operations. ADP 3-0 accounts for the uncertainty of operations and recognizes that a military operation is a human undertaking. Additionally, this publication is the foundation for training and Army education system curricula related to unified land operations. The principal audience for ADP 3-0 is all members of the profession of arms. Commanders and staffs of Army headquarters serving as joint task force (JTF) or multinational headquarters should also refer to applicable joint or multinational doctrine concerning the range of military operations and joint or multinational forces. Trainers and educators throughout the Army will use this publication as well.

With the entrance of the European Union into the field of International Investment Law and Arbitration, a new specialist field of law, namely 'European Investment Law and Arbitration' is in the making. This new field of law draws on EU Law, Public

International Law, International Investment Law, International Arbitration Law and Practice and International Economic Law, while others fields of law such as Energy Law are also relevant. The European Investment Law and Arbitration Review is the first law periodical specifically dedicated to the field of 'European Investment Law and Arbitration'. The timing could not be better. The first EU integrated investment treaties with Canada (CETA), US (TTIP) and Singapore (EU-SING) are either negotiated or about to be signed and ratified by the EU and its Member States. These are "integrated" investment treaties in that they combine free trade agreement provisions with international investment agreement norms. Moreover, the Court of Justice of the EU (CJEU) is about to deliver its first judgments and Opinions directly relating to intra-EU BITs and the EU-SING FTA. More generally, the public debate and discussions within academic and practitioner circles about the pros and cons of investor-state dispute settlement (ISDS) and investment treaties in general is intensifying almost on a daily basis. The Review will cover all these issues, but also goes beyond that by offering space for more innovative approaches and themes.

### **The Resident Course**

FM 21-11 1943: Basic field manual, first aid for soldiers.(OBSOLETE) "The purpose of this manual is to teach the soldier what he can do for himself or a fellow soldier if injury or sickness occurs when no medical officer or Medical Department soldier is nearby. Information is also given concerning the use of certain supplies which are for the purpose of helping to keep well. This field manual addresses wounds, fractures/dislocations/sprains, common emergencies and health measures, effects of

severe cold and heat, measures for use in the jungle/tropics and in aircraft and tank injuries, transportation of sick and injured, war gases, and description and uses of first-aid kits and packets.

### *Calibration and Repair Service in the Theater of Operations*

This manual provides maintenance and maintenance management personnel with policies and procedures pertinent to maintenance management of aeronautical equipment. This manual applies to all elements of the Army including the Army National Guard, Army Reserve and contractors engaged in the operation, maintenance or storage of Army aircraft, aviation associated equipment and applicable components owned and managed by the Army.

### Aviation Intermediate Maintenance Manual

The AHS (Army Health System) is a component of the Military Health System (MHS) that is responsible for operational management of the health service support (HSS) and force health protection (FHP) missions for training, predeployment, deployment, and postdeployment operations. The Army's MEDLOG system (including blood management) is an integral part of the AHS in that it provides intensive management of medical products and services that are used almost exclusively by the AHS and are critical to its success. Also key to this success is the delivery of a MEDLOG capability that anticipates the needs of the customer and is tailored to continuously provide end-to-end sustainment of the AHS mission throughout full spectrum operations. Providing timely and effective AHS support is a team effort which integrates the clinical and operational aspects of the mission. The provision of MEDLOG support requires collaboration between the medical logisticians, clinicians, and other health care

providers within the operational environment and encompasses the following functions: Medical materiel procurement and distribution (acquisition, receiving, shipping, storage, and stock record/property accounting); Medical equipment maintenance and repair; Optical fabrication and repair; Management of patient movement items; Production of medical gases; Blood storage and distribution; Medical hazardous waste management; Management of medical facilities and infrastructure; Medical contracting support; Total product life-cycle management of medical materiel and equipment. This manual describes the capabilities of the MEDLOG system and its role in sustaining the AHS mission. Medical logistics support for deployed forces is the primary focus of this manual. However, generating force or national strategic-level MEDLOG support is also addressed to present a clear picture of the processes involved and resources expended to guarantee a Class VIII support infrastructure. This Class VIII infrastructure ensures the seamless delivery of health care from the point of injury through successive roles of care to the continental US (CONUS) support base. This publication opens with an overview of Army MEDLOG, followed by a description of each MEDLOG unit, the capabilities available, and role of care
